

Wizard 665

Chapter 665: Third-circle! (3)

After being away for so long, he was indeed a little worried.

Inside the treehouse, Leah and the lady boss stood obediently beside Levi. In front of a group of Wizard Lords, they were as reserved as helpless kittens.

"Teacher, this is a wizard seedling that I accidentally discovered. She has a dual-elemental affinity. I thought that such a good talent couldn't be wasted, so I brought her back. I hope everyone can take her in," Levi said as she stroked Leah's head.

Leah blushed and lowered her head, not daring to speak.

She was only familiar with Levi and was very distant from other wizards.

"She actually has double affinity!" Winnie was surprised.

A double affinity was considered a top talent in the outer sea region.

"In this day and age, it's indeed rare to see a double affinity seedling that hasn't been taken away by a wizard. I think this little girl is quite cute. Levi, you're so considerate." Marlene looked at Leah, who was hiding behind Levi, wondering why this strange witch was looking at her.

"It looks like the little girl is very afraid of me," Marlene said with a smile.

"Leah, don't be rude. Call teacher." The lady boss was perceptive enough to pat Leah on the head.

"Hello, Teacher. My name is Leah. I'm twelve and a half years old. I like to sing and dance..." Leah said weakly, grabbing Levi's robe.

"Alright! You are in the prime of learning and seeking knowledge. From now on, you will learn the spells of the Ocean School of Thought from me. This way, you can protect yourself and your mother in the future," Marlene said.

She looked at the lady boss again and said, "Follow Winnie to report there later. In the future, you can do some chores in exchange for resources. In here, as long as you don't slack off, you'll have a better life than outside."

The lady boss did not have any wizard talent. Otherwise, she could also become an apprentice wizard.

With that, Levi had solved Leah's problem.

"Levi, are you about to advance to the third-circle?" Marlene asked.

"I'm still far from it, but I believe I can advance to the third-circle," Levi said confidently.

"Will you still leave after you come back this time?" Winnie looked at Levi, whose hair was already white.

"After some time, I want to stay in the Giant Tree Secret Realm for a while," Levi said.

He mainly wanted to ask the Lush Forest Witch about refining third-circle potions.

"That's good. Don't give yourself too much pressure. Relax when you need to. Rest well and don't think about taking revenge for the Gray Tower.

"Morpheus has the support of the Black-Eyed Crow. It is best not to provoke him even if you advance to the third-circle.

"Although our Gray Tower has been disbanded, everyone is living well. There's no need for revenge."

Marlene had known Levi for a long time. Although Levi kept many things to himself, Marlene, who had always been sensitive, could feel it.

"I understand, Teacher. The past is the past. The most important thing now is for everyone to live well," Levi said.

"By the way, Teacher, how far are you from the second-circle senior realm?" Levi asked.

Marlene thought for a moment and said, "I have 62 points of spiritual force now. I'm still missing 8 points."

Levi was a little emotional. When he was still an apprentice wizard, his teacher had already advanced to the second-circle. Now that he was about to advance to the third-circle, his teacher was still an ordinary second-circle.

At this moment, he realized even more how terrifying his cultivation speed was with the cheat.

He sighed in his heart and took out a portion of the excess meditation potion that he had previously used for his second-circle cultivation. Then, he said solemnly, "Teacher, use the potion for yourself. Don't tell the others..."

If he could help his teacher advance to the third-circle, it would undoubtedly be best if she could live for another 200 years.

Even if she couldn't advance to the third-circle, Levi wouldn't have any regrets if he did his best before his teacher left.

"Levi, this... You have to be careful when you're outside. Don't do anything illegal." Marlene looked at the precious potion Levi had given her and couldn't help but worry.

Second-circle meditation supplementary potions were all very precious. Although she was a Second-Circle Pharmacist, she did not even have the corresponding potion formula.

Even with the formula, with her financial resources, she could still use the meditation supplementary potion to cultivate for a long time.

She guessed that Levi might have gotten these from doing illegal things, so she was naturally worried.

"Teacher, don't worry. I'm still the naïve and kind Levi from before. The source of these potions is definitely legal. However, the second -circle meditation supplementary potion is extremely precious. You should not reveal your wealth, Teacher," Levi said.

He had signed a confidentiality agreement with the military. Otherwise, he would have directly given the formula for the second-circle meditation supplementary potion to his teacher.

Marlene nodded and suddenly sighed. "Sigh... If only the Tower Master was here. He would be happy to see you now."

"It's fine. When I'm strong enough one day, I'll go to the Myriad Machine Plane to find the Tower Master and bring this guy who abandoned the Gray Tower back." Levi thought of the Tower Master who had eloped with his lover and was a little depressed.

In the following days, Levi was not in a hurry to leave the Giant Tree Secret Realm. Instead, he stayed for the time being.

He chatted with his friends from Gray Tower all night and held a bonfire ball.

On the next day, he came to the tower of the Lush Forest Witch.

"Please report that Levi requests an audience," Levi said to the guard downstairs.

After passing the test, Levi saw the Lush Forest Witch's hairy monster with the humanoid girl's head..
