

Wizard 667

Chapter 667: Third-circle! (5)

If he followed Levi, he would be the founding partner. In the future, Levi would advance to the third-circle. He would probably be able to get some benefits.

In this way, Levi could cultivate peacefully.

He arrived at the deepest part of Black Fire Island. This was the place with the densest underground fire.

He felt the scorching hot air, but his body did not feel any discomfort. He felt comfortable instead because of Red Lotus' existence.

His current fire element resistance was comparable to a fire element giant of the same level unless it was a Burning Faction spell with a higher number of rings than his first-circle.

To Levi, combustion spells of the same level would only cause limited damage.

Holy Brilliance Calendar Year 1068, Month of Germinal.

Year 31 of the Great Expedition.

Coulomb, the errand boy, finally gathered all the ingredients for the Epiphyllum Potion for Levi. Levi rewarded Coulomb with some Aether Stones.

He began to refine the Epiphyllum Potion.

Levi's Pharmacy was already at the maximum of level 10, which meant that he was a second-circle senior.

However, because his spiritual force was not up to standard, he could not break through this restriction.

The refinement of the Epiphyllum Potion was very successful. After all the materials were used up, Levi refined a total of four portions.

However, this potion could only be used three times at most. The increase in spiritual force obtained each time was only a flash in the pan.

Therefore, Levi only had three chances to refine the Lake Fairy Potion.

He needed to complete the prerequisite steps of the Lake Fairy Potion before taking the Epiphyllum Potion and forcibly refining the Lake Fairy Potion.

"Come on, let's do this one time."

Levi encouraged himself.

On the Black Fire Island, he began the refinement of the Lake Fairy Potion.

Currently, the defense of the entire Black Fire Island could be said to be impregnable.

Levi's second-circle maze, killing array, and defensive array were set up inside.

Gustav, Raja, Mountain Giant, Lindt, and Tyrant II were guarding various places on Black Fire Island.

It could be said that without the Black-Eyed Crow, the configuration of Whale Song Island would not be comparable to Levi's luxurious lineup.

A small Black Fire Island was comparable to a Third-Circle Wizard organization. However, the members here were not human.

Under such safety protection, Levi began to refine the potion wholeheartedly.

A month later.

In the Pharmacy room, Levi was completely focused. Beads of sweat appeared on his forehead.

Beside him, there was a jar filled with wasted medicinal ingredients.

A month ago, his first attempt at refining the Lake Fairy Potion had failed.

This was already the second time. If he didn't succeed this time, Levi would only have one last chance.

If he failed three times, he could only ask the Lush Forest Witch or Huffman to refine it for him.

Fortunately, he had enough ingredients for the Levi Lake Fairy Potion. He was able to withstand a few failures.

In the end, after the process was completed step by step, it was time for the crucial potion fusion segment.

Levi drank the Epiphyllum Potion. In an instant, his mind began to churn. At that moment, his spiritual force actually broke the limit of 100 points and even showed signs of gasification.

At this moment, Levi barely had the mental strength of a third-circle.

He quickly chanted an incantation and began to Assemble the medicine.

As the light circulated, the potions in the crucible began to boil and sublime.

There were even hazy demoness songs, demon whispers, and Undead roars. Three different strange sounds echoed, disturbing one's mind.

If not for Levi's strong willpower and the fact that he had gone through the experience of mortalization, it would have been challenging for him to withstand these disturbances.

Finally, at the bottom of the crucible.

A wisp of medicinal concoction condensed into a mini black figure. The small figure closed its eyes tightly, looking a little strange.

The potion figurine suddenly stood up and spun around the bottom of the crucible like the dancer in the music box.

"It's done... This potion looks a little strange."

Levi looked at the potion, but he was very sure that his potion had been successfully refined.

This was the Lake Fairy Potion recorded in the formula.

It was normal for things that belonged to wizards to be strange. Levi was already used to it.

"The potion is done. The next step is the long gasification process. When I reach the last step of gasification, I'll take the Lake Fairy Potion and succeed in one go," Levi muttered to himself.

In the Black Fire Island.

Levi began to cultivate the Earth and Fire Gasification Technique. He breathed in the scorching hot air and held the Stone Heart in his palm.

At some point, Levi opened his eyes and realized that there was a new skill on his proficiency panel.

Levi—

Underground Fire God Tempering Technique: Level 1 (1/1000).

"I didn't expect this gasification technique to be on the proficiency panel." "If that's the case, this will be easy. I'll cultivate until my liver explodes." Levi was pleasantly surprised.

However, this Earth and Fire Gasification Technique was called the Underground Fire God Tempering Technique on the proficiency panel.

Just like that, Levi began the gasification process on Black Fire Island.

According to the information he had gathered, the gasification process would take at least half a year, three to five years, or even ten years.

The more talented he was, the faster he could gasify.

Of course, this was not absolute. Some people's gasification process was very slow, but slow work produced fine work.

After the successful gasification, the quality of his spiritual force was higher than that of ordinary wizards. It was equivalent to laying the foundation for the liquefaction of his spiritual force in advance.

Time passed quickly.

In the blink of an eye, half a year had passed.

The Black Fire Island was peacefully hibernating on this vast sea, just like its master.

In the underground fire, the earth elemental power in the Stone Heart in Levi's hand visibly thinned..
