

Wizard 669

Chapter 669: Divine Tower! (1)

The wizard tower.

In a sense, it was the symbol of a wizard.

Wizard towers were divided into broad and narrow terms. Broadly speaking, they referred to the residences of wizards.

In a narrow sense, the wizard tower was essentially a self-contained wizard cultivation ecosystem.

The wizard towers of some high-level wizards were often a small world.

High-level wizards were the masters of small worlds. They were the ones who set the rules and ruled everything in the wizard tower.

The first step for high-level wizards to build such a wizard tower was to construct a prototype of a wizard tower in their minds.

It was also the Divine Ring Tower in Levi's mind.

The Divine Ring Tower was similar to the Purple Mansion in some cultural symbols in his previous life.

The Purple Mansion was the place where immortals lived. It was also the stage of cultivation. It was the place where the “immortal” in his body was hidden.

Similarly, if the Divine Ring Tower wanted to retain a wizard, it needed an Immortal’s Purple Mansion in its body, and the spiritual wizard tower in its mind was born.

Levi had never thought that he would be able to give birth to the prototype of the “Divine Ring Tower” at the Third -Circle Wizard stage.

As far as he knew, in the history of the wizard civilization, most of the wizards only began to give birth to the “Divine Ring Tower” after reaching the high level.

Only some Children of the Elements or those with great opportunities and luck could start building the “Divine Ring Tower” at the Intermediate Wizard stage.

However, considering his Proficiency cheat, he should be able to become a person with great luck...

At this moment, in Levi’s mind.

The jade-white exquisite small tower emitted a dazzling light.

This small tower was completely illusory. This was because Levi’s current realm was too low, and his spiritual force was far from enough to materialize the complete Divine Ring Tower.

After all, the Divine Ring Tower in his mind was similar to a premature baby.

Next to the small tower was the magic ring, which was also called the spiritual force ring, the soul ring, the Sauron ring, and so on.

As the ancestor of wizards, the basic settings of many wizards were named after Sauron.

If one looked carefully, the magic ring was like the Milky Way.

It was composed of boundless spiritual energy astral particles. Every single one of them was a star.

The jade-white small tower was the center of all of this.

The Divine Ring Tower had endless uses.

The lowest function was to rely on the enhancement and adjustment of the Divine Tower to make Levi's mental power spellcasting smoother.

Increases Levi's casting tempo and casting speed.

For Levi, he did not need to use a magic wand to cast spells, although he did not rely on a magic wand from the beginning to the end.

In addition, the existence of the Divine Ring Tower could also better protect Levi's mental strength and soul.

After the Divine Tower was consolidated, it would become Levi's place of entrustment.

With the protection of the Divine Ring Tower, some attacks that directly affected the spiritual force or soul would be greatly weakened.

Of course, the most important function of the Divine Ring Tower was still to build Levi's wizard tower in the real world.

After Levi built the wizard tower according to specific steps and methods, the Divine Ring Tower would become the control center of the wizard tower.

Levi knew everything about the wizard tower with a single thought.

He was the Tower Master of the wizard tower and the god of all wizards under the Wizard Tower system.

Sorcerers who owned a wizard tower were also known as “Divine Tower Sorcerers”.

The strength of Divine Tower wizards was usually far stronger than ordinary wizards.

This was because their spellcasting and attacks were often enhanced by their wizard tower.

In other words, each of their attacks slightly amplified the power of the wizards who relied on the Divine Tower to cultivate.

Powerful Divine Tower wizards projected their own Divine Towers with powerful Dimensional Door spells to some small, ownerless plane near the Wizard World.

They built the wizard tower in another plane and used it as a foundation to lead the wizards under their command to spread out and conquer the plane, becoming the Plane Lord.

Of course, this was usually a domain that only high-level wizards or even Grand Wizards could come into contact with.

Levi’s current realm was far from that level.

Even if it was the smallest plane, he couldn't conquer it with his current strength as a Third-Circle Wizard.

"Sigh, a Plane Lord sounds great," Levi muttered to himself.

His dream was to find a quiet plane and build his own wizard tower.

Then, he would allocate land to farm, nurture transcendent creatures, build the Dusk Holy Temple, and silently cultivate his experience.

It would be best if he had a few good friends who were also Plane Lords. If he had nothing to do, they could visit each other, play chess, and drink tea. Wouldn't that be perfect?

Levi still liked to distance himself from worldly affairs because of his small farmer mentality.

However, he had to end his unrealistic fantasy and return to reality.

No matter what, with the Divine Ring Tower, Levi's starting point was higher than many Third -Circle Wizards. He opened the proficiency panel.

Levi—

Meditation Art: Level 8 (1/100,000), Aether Dominance.

Pharmacy: Level 11 (234/300,000)

"Level 8 of the Aether Meditation Art. He has officially stepped into the third -circle ordinary realm. My pharmaceutical skills, which have been stuck for a long time, have also broken through to level 11 and reached the third-circle pharmacist realm." "What a rich harvest."

Levi was in a great mood.

"However, breaking through to the third-circle is later than I imagined. I... I m already 80 years old." Levi looked at his old and frail self in the mirror.

"A new realm, a new atmosphere. I've broken through to the third-circle. There's no need to be like this anymore." The age spots and wrinkles on Levi's face had all faded..
