

Wizard 678

Chapter 678: Fusion! (4)

Lady Whitewater looked into the distance with a long gaze. "That makes sense, but if there's a chance, I still want to try."

In the blink of an eye, a month had passed.

On the Black Fire Island.

Levi's weakened state had long passed, and his condition had reached its peak again.

The spoils of war from the previous battle had also been counted, with Morpheus as the leader, as well as the other dark wizards killed by Bo Gang and Raja, and the spoils of war of the Sea Clan.

Levi seized a total of 150,000 Aether Stones.

That was only one-third of Rex.

The weakness of the outer sea region's third-circle organization was evident.

The long-term war had consumed a lot of Aether Stones.

Of course, including other Wizard Tools, spell books, casting materials, and so on, it could also be converted into a lot of money.

All in all, it was definitely profitable. Dark wizards were still Levi's biggest source of income.

No matter how much money he made legally, it was still not as fast as killing and arson.

So far, Levi had nearly 400,000 Aether Stones.

He planned to find time to return to Riptide City to see the situation there and consider buying some spell models to study.

Now, Levi was sitting cross-legged in the cave abode.

In front of him, a tall Sea Clan member covered in hideous wounds stood there.

Levi's healing potion and the powerful physique of the Sea Clan had basically healed the Sea Clan's injuries. Their strength had also almost recovered.

After Levi's interrogation, he learned that the Sea Clan's name was Baghdad.

Furthermore, he was indeed the fierce person who almost destroyed Whale Song Island during the sea beast tide.

"Baghdad, return to the sea and continue to be the lord of the Sea Clan. Wait for my orders," Levi said.

"Yes, Master. If there's nothing else, I'll leave first!"

"Alright, you may leave."

With Levi's permission, Baghdad left the cave abode and jumped into the sea, disappearing without a trace.

Levi asked Baghdad to go back and gather the Sea Clan in the ninth region. At the same time, he also arranged for more sea beasts and Sea Clan scouts to keep an eye on Whale Song Island and Ocean Current Island.

He didn't lack third-circle helpers. He lacked an organization that could help him gather information and clues.

The Sea Clan was undoubtedly a good choice.

"Next, let's see what the Black-Eyed Crow will do next. Morpheus is dead, and he has one less general. I wonder if he will be desperate.

"However, the two people from Ocean Current Island, Lady Whitewater and the Extreme Fire Ancestral Wizard, are not ordinary people. Perhaps they also have a fourth-circle wizard behind them. Otherwise, how can they resist the Black-Eyed Crow?"

Levi did not greet the two Third-Circle Wizards from the Tower of Ocean Currents.

However, he had used Perception from afar and could tell that Lady Whitewater's spiritual force fluctuations were extremely vast.

They were both at the third-circle, but the other party's spiritual force was much stronger than his. She should be close to the 200 maximum.

Perhaps Lady Whitewater had already mastered a fourth-circle spell.

"Lady Whitewater seems to be one of the maids of the Flower Knights. I've already seen three of the 24 Flowers... To be honest, the maids of the Flower Knights are indeed very beautiful.

"Violet's tranquility, Rose's passionate moves, White Narcissus's coldness... Tsk, tsk, tsk. If I married the Flower Knight and obtained the 24 Flowers, I would really make a killing.

"I wonder which wizard will benefit from a proud daughter of heaven like the Flower Knight."

Levi's imagination ran wild. In any case, it couldn't be him.

He was only a Third-Circle Wizard. The difference in strength and status between him and the Flower Knight was too great.

He had just gotten rid of the low-level wizards of the Endless Sea, and she was already at the top of the Endless Sea.

They were not of the same level. In addition, Levi was not interested in matters

Rif

Therefore, Levi did not have any improper thoughts about the Flower Knight.

He had a clear understanding of his position.

"It's better to cultivate my experience honestly. Only the proficiency panel is my only family! It's also my only reliance in this chaotic world!"

Levi calmed down and continued to cultivate. After his Third-Circle Wizard realm stabilized, he planned to leave Area 9.

There was no way for him to improve if he stayed here. He needed a wider stage.

As for where to go next, Levi had not thought of it yet. This would depend on the future war situation.

Holy Brilliance Calendar Year 1070, Month of Northern Wind.

In Area 10.

In a sea surrounded by black fog, an island emitting a deathly aura sat there.

On the island, there was a lone wizard tower.

A wizard in a black robe walked out of the wizard tower with a gloomy gaze.

"I just went into seclusion and Morpheus, that bastard, died. To think that I even bestowed him with a Wizard Tool and sent people to him. He was incompetent and ruined everything. His death is not worth pitying!"

This wizard was the Fourth-Circle Wizard, the Black-Eyed Crow Modi.

A fourth-circle wizard's status in the Black Sun Steeple was not low.

Modi was also sent by Black Sun Adam to the outer sea region to organize the dark wizards in Area 8, Area 9, and Area 10 to wage war against the righteous wizards.

Currently, Area 10 had already been taken down by the dark wizards. In Area 8, only some small wizard organizations stubbornly resisted and fought guerrilla warfare.

All that was left was Area 9.

The Black-Eyed Crow originally thought that Area 9 was the easiest to take down. After all, he had killed the supervisor of Area 9, Rick.

However, he did not expect Morpheus to be able to play such a good card to this extent..
