

Wizard 680

Chapter 680: Fusion! (6)

"Let's hope the war is over by the time we return."

Area 9 was where Levi had first entered the Wizard World. Here, he got to know Marlene and the others, became a Legendary Wizard, and became an official wizard. He had also spent a long time here.

Now that he was leaving, he was indeed a little reluctant and emotional.

"Let's go..."

He did not linger. He sat on the back of the griffin and left the Black Fire Island.

The Black Fire Island stood quietly in the sea.

Time flew by, and a year passed.

On this day, a black-robed wizard came to the sky above the Black Fire Island.

He looked at the empty island below.

"The fire elemental power here is not bad. It can be used as the base of the Black Crow Tower in the future."

At this point, Area 9 had completely fallen and became a subsidiary area of the Black Sun Steeple.

Holy Brilliance Calendar Year 1073, Month of Beginning.

Yellow Earth continent.

Rogue Rift.

This place was plagued by wind and disasters all year round, and there were very few people there.

Levi had just finished cultivating the Maya Breathing Technique in a hidden cave in one of the canyons.

"Another level 13 breathing technique. Next, I can begin the great fusion between Maya and the Silver Mountain Dragon. I wonder what this dragon and eagle will become?"

It had been two years since Levi left the Black Fire Island and fled to the ends of the earth.

He was not in a hurry to go to Riptide City, instead, he went to the Yellow Earth Continent.

On the way, he thought of an excellent place to live in seclusion and cultivate.

That was the Rogue Rift that was plagued by wind disasters.

Considering that his Maya Breathing Technique was almost at the maximum of level 13, he came here without hesitation and began to cultivate the Maya Breathing Technique in peace.

Just like that, two years passed in a hurry.

In the past two years, his cultivation of the Meditation Art was average.

Without the third-circle meditation supplementary potion, coupled with the third-circle, cultivation became more and more difficult.

Even Levi's current elemental affinity talent had only increased by 2 points of spiritual force in two years. On average, it increased by 1 point per year. This meant that if he wanted to reach the limit of 200 points.

It may take 100 years in the absence of other bonuses.

It was already not bad to be able to step into the fourth-circle before the age of 200.

Of course, this speed was not slow. To other wizards, it could even be described as very fast.

It was just that Levi was used to the rocket-like speed before the third-circle. Now that it had slowed down, he was slightly unused to it.

In addition, in the past two years, the Divine Ring Tower in Levi's mind had also been constantly solidifying. However, the changes were too small. It was better than nothing.

The current Divine Ring Tower was only an incomplete product. Other than increasing Levi's casting speed, the other effects could not be displayed.

Haste makes waste. Levi was already delighted that the Divine Ring Tower was born in advance.

He believed that as his spiritual force grew, the effects of the Divine Tower would be displayed bit by bit.

At the very least, according to Levi's knowledge, solidification of innate spells and ordinary spells on the Divine Tower would be much more powerful than magic rings.

Therefore, Levi was still looking forward to the subsequent performance of the Divine Tower.

He threw away all distracting thoughts.

Levi opened the proficiency panel.

Levi—

Maya Breathing Technique: Level 13 (1/400,000, can be fused). Special Effect: Unending Body (Level 1), Wind Abandonment.

Silver Mountain Dragon breathing technique: Level 13 (34,567/400,000, can be fused). Special Effect: Mountain Dragon Spine (Level 1), Lightning Remnants.

"A dragon and an eagle, wind and lightning."

"Fuse. Don't disappoint me, panel!"

With a thought, the seed of Maya and the seed of the Silver Mountain Dragon in Levi's heart jumped up one after another. Carrying their respective vast power, they collided with a bang. Wind and lightning surged, and the small world in Levi's body changed color.

Countless lightning bolts and violent winds wreaked havoc in his body, causing Levi to convulse uncontrollably.

"It feels so good."

A month later.

In the cave of the Great Rift.

"As expected of the endurance breathing technique. It took a month to complete the fusion."

The pale Levi heaved a sigh of relief and muttered to himself.

He had personally witnessed Maya and the Silver Mountain Dragon, these two long-lasting beasts, fight for a full month without sleep or rest. The other Bloodline Seeds had also watched the show for a full month.

In the end, the two giant beasts disappeared without a trace and merged into one, at Levi's current heart.

A pure white dragon with eagle wings, eagle claws, dragon head, dragon scales, and dragon tail floated in the void.

The Dragon Body of this dragon was pure white and flawless. Its wings were wrapped in strong winds and lightning, as if it was the ultimate evolution of the Wind Thunder Winged Dragon. It had also bought the plus version of the “wing fashion” in the Game Shop.

"As expected, it's still the Dragon Clan." Levi breathed a sigh of relief..
