

Wizard 681

Chapter 681: Sky Dragon! (1)

He opened the proficiency panel.

Levi—

Sky Dragon Breathing Technique: Level 13 (34,567/400,000). Special Effect: Sky Dragon Pillar (Level 1), Wind Thunder Remnants, 3000 Fallen Feathers.

"Sky Dragon?"

Levi's heart skipped a beat.

"It seems pretty good."

He looked at the skill introduction.

[Sky Dragon Pillar: The Sky Dragon is the ruler of the sky and the messenger of lightning and wind. The power from the spine of the Sky Dragon gives you the endurance and tolerance of a young Sky Dragon. The Dragon Pillar contains a trace of the Wind Thunder Power of the Sky Dragon. It can increase the power of your wind and lightning-related spells.]

"The increase in endurance and the increase in the power of the spells of the Storm Faction and the Lightning Faction, " Levi muttered in his heart.

The spine in his body was bright silver and emitted a luster. Surging energy circulated in it endlessly.

As for the second Wind Thunder Remnants, it was a fused version of the Wind Abandonment and Lightning Remnants. At the same time, it increased their affinity with the Wind Lightning Element.

The third Special Effect made Levi's eyes light up.

[3000 Fallen Feathers: Unfurl your Sky Dragon Wings and expend all the Sky Dragon Power to launch all the feather swords to attack all targets within the attack range.]

Levi arrived at the Rogue Rift. He ignored the wind disaster in the rift and swam in it to his heart's content.

He felt that he had transformed into a wind elf and was less affected by the violent wind.

This should also be thanks to the Sky Dragon Breathing Technique.

At the same time, a pair of dragon wings containing the power of wind and lightning appeared behind Levi. At this moment, the dragon wings closed and wrapped around Levi.

On the surface of the dragon wings were 3,000 feathers that were as white as jade. The feathers emitted a metallic luster, like sharp swords.

“3000 Fallen Feathers!”

Levi willed.

The Sky Dragon Bloodline Seed erupted.

The power of the Sky Dragon in Levi’s body surged into the wings on his back. Then, the feather swords trembled continuously and emitted a buzzing sound.

3000 Fallen Feathers!

Levi spread his wings.

3,000 Dao Feather Swords had to be reduced. All of them scattered in all directions.

Swoosh!

It was like the true Return of Myriad Swords!

Countless feather swords shot out, blasting the cliffs on both sides of the Rogue Rift until they were full of holes.

Mountain rocks shook and dust flew, dissipating in the great hurricane.

When the dust settled, Levi looked at the potholes on both sides.

"The power of this attack is not inferior to a ranged third-circle attack spell at all.

Levi was pleased with himself.

This should be the spell-like ability brought about by the Sky Dragon Breathing Technique.

Every attack was comparable to an ordinary third-circle spell attack.

The disadvantage was that these attacks were not under Levi's control. The trajectory of the attacks was too scattered and extremely energy-consuming.

Once used, the Sky Dragon Bloodline Seed would enter a deficit state for a period of time and could not be used normally.

"No matter how powerful it is, this move... is really cool!"

Levi clicked his tongue in admiration. In the future, he would also be a man with handsome long-range attacks, instead of relying on transforming into monsters to fight hand-to-hand.

He returned to the cave abode.

Currently, among the six dimensions, his defense, physique, speed, and endurance had all reached the Small Accomplishment realm.

Golden Snake, Death Ember, Scarlet Dragon, and Sky Dragon—the embryonic form of the Four Great Dragon Clans had already appeared.

Now, he only needed to combine the strength dimension into four to create the fifth Dragon Clan. In a short period of time, Levi's goal of fusing the breathing technique would be completed.

As for Sixth Dimension Perception, this could only be left to fate.

Perhaps in the future, if he was lucky enough to get a legendary Perception breathing technique, his Perception would soar to the sky in a single step.

Levi used the Rowling Crystal Ball to test his blood.

Then, he discovered that other than a small number of bloodline components, the rest of the bloodline components were all from the Unknown Dragon Clan.

It could be seen that the database when Madam Rowling created the Rowling Crvstal could no longer keeD uD with Levi's evolution.

It was worth mentioning that Levi still had a total of 95% of the human bloodline.

After such a long period of mutation, he was still an absolute human!

This was indeed a happy thing!

"It's time to leave. I've had enough of this godforsaken Rogue Rift."

Levi flew into the sky and looked down at the entire Great Rift. Then, he left without looking back.

He was already 83 years old. However, compared to his lifespan of at least 500 years, he had only walked less than one-fifth of his life.

This was the charm of cultivation.

Before leaving the Yellow Earth Continent, Levi came to Mirror Lake and revisited the old place.

Now, this place was still quiet. The residents of the small city were still living the same life as before. They were busy and calm.

As for the wizard relic under Mirror Lake, Levi did not go there again.

He had already plundered all the knowledge related to the Nightmare World from the relic. Regardless of whether he could use it in the future, it was better to be prepared.

Not long after, Levi arrived at Lion King City. It had been more than ten years since they last met, and he wondered if Emperor Mu had broken through.

Lion King City.

Golden Lion Castle.

Compared to before Levi left, the entire city was even more depressing and desperate.

The pressure from the Black Water Tower gave the Golden Lion Jostar Family no chance to catch their breath.

Hearing Levi's arrival, a trace of spirit finally appeared on Old Golden Lion's weathered face.

"Quick, invite Levi in."

He stood up.

"Sir Lyon, how have you been?" Levi smiled and said confidently.

Now that he had advanced to the third-circle, he was already on the same level as Old Golden Lion..
