

## Wizard 682

### Chapter 682: Sky Dragon! (2)

"Sir Levi, it's been over ten years since we last met. Your strength has improved again." Lyon felt that Levi was different from before and was a little shocked.

He knew that Levi had advanced to the third-circle.

Levi did not deliberately hide his cultivation level. Although it was difficult for the Children of Chaos to advance to the third-circle when he was almost 100 years old, it was not impossible.

Besides, other than his good friends in the Gray Tower, no one knew what kind of talent he had.

"Sir Lyon, where's Emperor Mu? I didn't sense his aura," Levi asked.

"Emperor Mu... he's missing." Lyon seemed to have expected Levi to ask this. He sighed and said.

"Missing?"

"That's right. A year ago, Emperor Mu suddenly went crazy and attacked the people of Golden Lion Castle. I stopped him, but he was no match for me, hence he left Golden Lion Castle. Until now, his whereabouts are unknown."

"What? Emperor Mu lost control?" Levi's expression changed.

Could he have become a Lunatic Knight?

That shouldn't be the case. As a legendary knight, Emperor Mu wouldn't be so affected by his beast nature.

"It must be the Golden Spine Bone. There's something wrong with this thing!" Levi guessed.

Emperor Mu had also shown Levi the Golden Spine Bone.

At first, Levi thought that it was a legendary organ left behind by Golden Knight Gregor.

Later on, he thought that something was wrong. The legendary organ of the Golden Horn Breathing Technique should be the horn on Levi's forehead, not the Golden Spine Bone.

Coupled with the fact that the Golden Spine Bone seemed to show some independent consciousness, he guessed that the spine should be a parasite.

It was similar to the venomous microorganism he had obtained. It parasitized the host's body and transformed into a part of the host, giving the host transcendent power.

Levi did not persuade Emperor Mu to give up on the spine.

Thinking about it from another perspective, Emperor Mu had finally come to the Wizard World. He had no wizard talent, no proficiency panel cheat, and only had the cultivation of a knight. In this world, he could be said to be inconspicuous.

To Emperor Mu, this Golden Spine Bone was his proficiency panel. It was his only reliance in this Wizard World where experts were as common as clouds.

Emperor Mu must have known that there was something wrong with the spine, but he had no choice.

"Sir Lyon, Dinos isn't here either?" Levi asked.

Lyon said tiredly, "Dinos went to look for Emperor Mu. According to the information from Dinos' investigation, Emperor Mu should still be in the Yellow Earth Continent. It seems that he has caused many murders and panics in many places."

Lyon was already tired.

With external and internal troubles, his Third-Circle Wizard's shoulders could not support this family anymore.

"I got it."

Levi said calmly.

Then, he left Lion King City.

Lyon gave Levi some clues. They were all possible locations where Emperor Mu might have appeared that Dinos had investigated recently.

Levi was going to look for it.

His team members might have transformed into monsters and become a threat to the mortals and wizards on the Yellow Earth Continent.

As the leader, he had to resolve all of this.

"Find Emperor Mu. If there's no way to salvage the situation, kill him."

Levi sighed.

After many searches and investigations,

Three months later.

In the end, Levi met Dinos, who was chasing after Emperor Mu in a small city in the middle of the Yellow Earth Continent.

This city was called Sand City. It was a city controlled by the Black Water Tower.

Seeing Levi's arrival, Dinos was overjoyed. He seemed to have rekindled hope.

"Captain, you're finally here. Teacher Emperor Mu, he lost control," Dinos said.

"I got it. It's probably because of something inside him," Levi said.

"I saw with my own eyes that there was a hideous golden centipede behind Teacher Emperor Mu. The centipede had pierced deep into his flesh and blood, and its tentacles had even pierced into Teacher Emperor Mu's head. It seemed to be controlling every move of Emperor Mu," Dinos said with lingering fear.

"That's the Golden Spine Bone. It's something Emperor Mu found in the place where a legendary knight died. It should be some kind of transcendent parasitic creature," Levi said.

"Previously, I thought this was Teacher Emperor Mu's legendary organ. I didn't expect it to be a parasitic creature."

"Where is Emperor Mu now?" Levi asked.

"Three days ago, Emperor Mu attacked a dark wizard stronghold in Sand City and killed three First-Circle Wizards and even a Second-Circle Wizard.

"Then, he was caught by a Third-Circle Wizard who happened to be on his way to this stronghold. He should be brought to the Black Water Tower now.

"I'm guessing that Teacher Emperor Mu has temporarily awakened his rationality, so he deliberately attacked the dark wizard stronghold so that the dark wizards could capture him and prevent more innocent people from being killed because of him," Dinos said.

Levi rested his chin on his hand in thought.

It seemed that Emperor Mu had become a legendary knight. Otherwise, he wouldn't have been able to kill a Second-Circle Wizard.

Of course, it was also possible that the power of the Golden Spine Bone had awakened, giving Emperor Mu the strength to kill a Second-Circle Wizard.

"What's the name of that Third -Circle Wizard? Where is the Black Water Tower?" Levi asked.

"That Third-Circle Wizard is called Yefa. He's a wizard from the Ocean School of Thought. It's said that he's the brother of the Tower Master of the Black Water Tower.

"In the past ten years, this pair of brothers led the Black Water Tower and fought many battles with our two families. We lost more than we won. We were no match for the Black Water Tower.

"Our families are planning to leave the Yellow Earth Continent," Dinos said..
