

Wizard 684

Chapter 684: Sky Dragon! (4)

"The third battle group, the Steel Battle Group, is mainly made up of alchemical creatures. When I have the chance, I'll buy more alchemical creature blueprints and hire some alchemical wizards to develop more mass-produced alchemical creatures. Different alchemical creatures will be reasonably matched to form my Steel Battle Group."

These three battle groups were Levi's initial plan.

He wasn't acting on a whim, but considering that he had already given birth to the Divine Ring Tower.

In the future, he would build his own wizard tower.

Otherwise, it would be a waste of the Divine Ring Tower's trump card.

The wizard tower needed the corresponding guards and strength to form a battle group to guard the wizard tower in advance. It could be considered a

Precaution.

Moreover, if Levi wanted to explore other planes, he could not be alone.

To become a Plane Lord, one had to have their own forces and army.

Many other wizards used their families as a link. If Levi did not have a family, he would establish his own centralized battle group.

They relied on battle groups to rule and manage their own plane.

Levi was a Plane Lord.

If an enemy invaded, he would give the order and the various battle groups would attack to suppress the enemy.

"I can start the Thousand Beast Battle Group now. Let those transcendent creatures train and familiarize themselves with each other and learn how to fight in a team."

Transcendent creatures, especially different types of transcendent creatures, fought on their own. Therefore, training these guys to cooperate was indeed a problem.

However, Levi was not in a hurry. The nurturing of battle groups and forces was a long-term and huge project. There was no way to see any benefits in the short term.

While waiting for the two families to reply, Levi cultivated alone in the ancient forest.

At the same time.

In the Black Water Tower.

In Clay's laboratory, a monster was sleeping inside a large transparent container.

The monster could vaguely be seen in human form. It had a back with hideous centipede-like scars. Two sharp tentacles pierced into the monster's head.

Emperor Mu's appearance could be vaguely seen on the monster's face.

It was precisely because of the Golden Spine Bone that Emperor Mu lost control.

Clay was flipping through the information at this moment. Wizards were a group that liked to study, and Clay was even more so.

Being able to create a Venom Body Refinement Technique was enough to explain everything.

However, Clay's research was very unpopular.

He was holding a yellowed ancient book and reading the information on it seriously.

The name of this book was “The Tomb of Fireflies”.

The author was unknown. He was suspected to be from another plane.

In the vast Land of Darkness, there were too many planes. Although the wizard civilization controlled 50 planes, it was still only the tip of the iceberg compared to the entire Land of Darkness.

There were many planes near the human world and the Wizard World that had yet to unveil the mystery.

There were also countless planes of various sizes or plane fragments hidden in the darkness.

Clay had been studying this ancient book all his life.

This was because this ancient book introduced a transcendent system that was completely different from the wizard civilization.

If his Venom Body could be cultivated, it would be inseparable from this ancient book.

And now, he had even obtained a new spoil of war.

Thinking of this, Clay looked excitedly at Emperor Mu in the transparent container.

On the surface of Emperor Mu's body, a golden centipede that looked like it was made of gold poked its head out. Its strange gaze met Clay's.

"A real totem insect. I didn't expect... there to be such a strange thing in the Wizard World. Even in its original world, this was a rare totem insect.

"Someone gives me a pillow when I'm sleepy. If I can refine this totem insect and light up my totem light, my strength will make a qualitative leap."

Clay's laughter echoed in the wizard tower.

Month of the Furnace.

Levi, who was cultivating in the ancient forest, suddenly felt an aura approaching. He opened his eyes and looked into the distance.

"Here we go."

Not long after, three powerful auras descended.

They were the three Third-Circle Wizards from the Golden Lion Jostar Family

And the Wham Family.

Old Golden Lion looked at Levi and said, "Sorry to keep you waiting, Sir Levi."

Levi smiled and said, "It's fine. Clan Leaders, are you ready?"

Golden Lion nodded. "Originally, we had already decided to leave the Yellow Earth Continent, but it's our last resort.

"Now that we have your help, after our discussion, we might as well fight to the death with the other party.

"Now that the Wizard World is in chaos, there is no absolutely safe place. If we leave the Yellow Earth Continent, we have no better place to go. Furthermore, our foundation is here, it is too difficult to leave."

"I heard from Golden Lion that your strength is extraordinary. Now that I see you, you should have just stepped into the Third-Circle Wizard realm..." Clan Leader Wham asked hesitantly.

"That's right," Levi said.

"I wonder how confident you are in taking down the Black Water Tower?" Clan Leader Wham asked. Clearly, he was not confident.

Seeing how confident Old Golden Lion was, he thought Levi was at least a third-circle senior wizard.

After sensing Levi's mental energy fluctuation, it would be a lie to say that he was not disappointed.

"If everyone tries their best, I have an 80% chance of destroying the Black Water Tower, " Levi said..
