

Wizard 69

Chapter 69: Extreme Forging, Craftsmanship Special Effect

This revenge against the Bird of Death's Voice was too satisfying.

Levi could finally hold his head high after the three assassination attempts.

The organization had lost three official knights and mentors, as well as a large number of apprentices. He had also robbed the gold coins in the stronghold. Even for a large organization, it was a heavy loss.

After this battle, Levi had a preliminary understanding of his strength.

Three low-level knights and so many apprentice assassins were utterly helpless against Levi. It would be difficult for an ordinary high-level knight to achieve such a feat.

After returning to Black Water Valley, Levi stored all the 1,000 gold coins he had plundered in his shelter. Then, he opened the breathing technique inheritance map he had just obtained.

On the screen, a fat yellow worm with thorns all over its body crawled out from a vast swamp. It looked ferocious and looked down at the swamp. Surrounding the worm were small people with strange and distorted postures and movements.

This was a legendary terrifying worm monster that lived in the swamp. It was said that every time it appeared, it could devour countless creatures around it.

Levi counted and found that there were a total of 36 miniature figures on the inheritance map.

Levi muttered, "Why are there only thirty-six? This was only one more than the Man-Faced Spider Breathing Technique."

According to the pattern he had discovered before, the more little figures on the breathing technique inheritance map, the higher the quality.

"Is this not an excellent breathing technique? The creator of this breathing technique inheritance diagram lied?"

"Or could thirty-six be the number distinguishing between the shallow and excellent levels?"

The Black Snake Breathing Technique, an excellent breathing technique, had 71 tiny human images.

Levi could not figure it out, no matter how hard he thought about it. This question required more breathing techniques to verify.

He had already issued a request in the Shining Tavern. He should be able to obtain more breathing techniques next.

"Forget it. Let's cultivate first."

Levi did not rest and started to study the inheritance diagram.

The Vortex Beast Breathing Technique was a breathing technique that focused on one's powerful physique.

After cultivation, a knight's physique would be even more different from ordinary people's.

This physique mainly focuses on the body's resistance, immunity, and self-healing ability.

As for the exact effects, Levi would only know after he cultivated.

In the blink of an eye, the Month of Winter passed.

In New Year's first month of the year 1008 of the Holy Brilliance Calendar, the Black Water Valley was filled with a joyous and peaceful atmosphere.

Sir Fred's body had recovered a lot; he could move normally but still could not exercise strenuously.

Fortunately, Levi's soldiers had almost completed their training. Most of them had mastered the Basic Swordsmanship that Sir Fred had taught them, but the degree of mastery varied.

According to Levi's proficiency panel, the skill could be divided into three levels. The first level was beginner, the second level was proficient, and the third level was the maximum.

Only Captain Sam had trained to the maximum level among the soldiers under his command. That once cowardly young man had now genuinely grown into a man and was Fred's successor.

The others were either at levels 1 or 2.

This was the proper standard of an ordinary person.

Because Levi had the proficiency panel, his speed was several times faster than that of an ordinary person.

In short, his team of fifty people had already taken shape.

The Scarlet Warhorses were ready, and the next step was to undergo targeted training on horseback.

The horse armor forging also proceeded.

After equipping his army with cavalry armor, Levi devoted himself to forging horse armor, aside from his daily breathing technique training. His Forging proficiency increased rapidly day by day,

As for the deal with the Wild Boar Knight, Levi paid little attention.

After all, he had money now, so he had to prioritize the supply of weapons and equipment to his territory. He would discuss this matter after ensuring he had at least 50 fully armed cavalries.

Due to the Wind Axe Special Effect, Levi's Forging efficiency was extraordinarily high. The Blacksmith Apprentices completed most of the preparatory work for him, while Lvei focused on achieving the last and most technical forging work.

Therefore, not long after the Month of Vitality arrived, the last set of the 50 sets of horse armor was completed.

[Forging: Level 4 (19912) → Level 5 (Maximum)]

[Special Effect "Fine Grade Certainty" → "Fine Craftsmanship"]

Following the notification on the proficiency panel, Levi knew he had pushed his lifestyle skills to the limit.

"So, Level 5 is already the limit."

"I can be considered a Blacksmith Master. "

Levi looked at the proficiency panel. Unknowingly, he had already reached the same forging realm as the legendary Blacksmith Master, "Flaming Hammer" Hagrid Eamon.

"After all, it's a life skill. The proficiency panel confirms that the limit is just that.'

Levi opened his proficiency panel.

[Forging: Level 5 (Maximum). Special Effect: Fine Craftsmanship, Wind Axe]

[Fine Craftsmanship: Every item you forge represents the pinnacle of the current material level.]

"Fine Craftsmanship has replaced the initial Fine Grade Certainty."

"The two special effects of a maximum level Forging, one represents quality, while the other represents efficiency. They complement each other perfectly." Levi was pleased as he stretched.

"Phew. One thing off my chest. I feel much more relaxed all of a sudden."

Every time Levi reached a skill's maximum level, he felt a sense of accomplishment and relief.

It was as though he was playing a game and unlocking one milestone after another. Only those who made outstanding achievements in the game could only feel this feeling.

However, Levi did not enjoy freedom for too long. A few days later, after Levi had cultivated the Vortex Beast Breathing Technique, his proficiency panel showed this excellent breathing technique had reached level 1.

[Vortex Beast Breathing Technique: Level 1 (1/1000)]

"Alright, that's another one. This is a happy worry."

Levi smiled. After over a month, he finally mastered the Bloodline Breathing Technique, which was even faster than the Frost Wolf Breathing Technique.

This also confirmed Levi's theory. As he increased the number of breathing techniques he had mastered, the speed of his breathing technique mastery and cultivation would also increase.

After practicing so many breathing techniques, Levi was highly familiar with these things..
