

Wizard 710

Chapter 710: Crimson Emperor Dragon! (4)

If he couldn't wash away these imprints and rashly absorbed them, at best,

Levi would be mentally deranged, and at worst, his life would be in danger.

As for how to remove the mark, there did not seem to be a good solution in the Wizard World.

Therefore, Soul Artifact fragments were meaningless to most wizards except for their collection value.

Levi, on the other hand, had some ideas, but they needed to be tested.

Levi immediately thought of the Purification Elixir developed by the Bug Luminist.

This Purification Elixir was very domineering. It could directly wash away all the attributes and negative energy of the young terror bug and turn it into a totem insect similar to the pure law.

If Levi could study it, he might be able to refine a potion that could wash away the mark on the Soul Artifact fragment, leaving only a clean primordial soul power.

After all, the original owner of the Soul Artifact fragment had long died. Even if Levi did not wash it, these marks would slowly wear away as time passed.

Levi was just trying to find a way to speed up the process.

Similarly, Levi was determined to pay attention to the Soul Artifact fragments that had escaped from the ancient ruins.

The owners of these Soul Artifact fragments were basically dead wizards, so one could collect them with relative ease. It would definitely be easier for the Divine Ring Tower to refine and absorb the origin power on them.

If this path could work, Levi might have completed the initial condensation of his Divine Ring Tower before he became a high-level wizard, allowing the Divine Ring Tower to play a greater role.

Holy Brilliance Calendar Year 1080, Month of Beginning.

Reports of the Five-Realm Great Expedition came one after another. However, with the internal and external troubles of the wizard civilization, the control over the Federation Plane below became weaker and weaker. Some ambitious people from the Federation Plane began to stir.

The war between the dark and righteous wizards in the Endless Sea also had its own victories and losses. It was difficult to see the future situation in the short term.

The repair of the legendary Wizard Tool, Skynet's Heart, was not over yet. The identity token system was also popularized in the Wizard World.

The entire world was chaotic and upsetting. There was no sense of security at all.

During this period of time, the Black Pearl Wizard Market had also been attacked by some dark wizards.

In the end, with the combined efforts of the market manager and the wizards, they passed through safely.

Unknowingly, Levi had been at the Black Pearl Wizard Market for three years.

It was also his 90th birthday.

In the past three years, he had been quietly cultivating in the Black Pearl Wizard Market and rarely went out.

He felt that the outside world was changing day by day, as if the sky of the Wizard World was about to collapse.

For the past three years, he had participated as much as possible in every gathering of wizards and auctions in the market.

Slowly, he gathered all the ingredients for the third-circle meditation supplementary potion.

With the help of potions, Levi's cultivation speed was finally faster than before.

Currently, his spiritual force had already reached 110 points, increasing from 1 point of spiritual force every year to 1.5 points.

This speed was more comfortable.

This meant that if the supply of potions could be maintained continuously,

Levi could cultivate his spiritual force to the limit of 200 points as a Third-Circle Wizard when he was about 150 years old.

In that case, it would not be a problem to advance to the fourth-circle before the age of 200.

This speed was no slower than the Children of the Elements.

After all, after reaching the third-circle, the difficulty of advancing became higher and higher.

Even the Children of the Elements could not guarantee that they would advance 100%.

The money Levi had saved up previously was enough for him to cultivate in peace for a long time.

The collection of ingredients for the Purification Elixir was also proceeding in an orderly manner.

The level 7 Maximum Five Fireballs Technique had also successfully advanced to its superior spell, Sun Flame Explosion. Its power was extraordinary.

However, Levi still had not decided on the first innate spell.

Sun Flame Explosion was not bad, but Levi was more inclined to create his own third-circle spell as an innate spell.

This day was Levi's birthday, except maybe he was the only one in the world who knew how special it was.

In the wizard tower, Levi performed the Dragon Demon Breathing Technique for the last time.

As his Proficiency reached level 13, he heaved a sigh of relief.

He looked at the can-be-fused options of the four strength breathing techniques on the proficiency panel. "Finally, I can fuse them... now fuse!"

Levi gave the order.

At his heart, the bloodline seeds of the four strengths all erupted with majestic auras and began the fusion process.

Red Lotus, Dragon Demon, Black Whale, King Kong! The battle between the ancient beasts was playing out in Levi's heart.

At first, Levi thought it would last for a long time, but not long after, he realized that Red Lotus seemed to be stronger than he had imagined. This breathing technique had not mutated until now. It was still of the initial quality.

It was also a breathing method that could give birth to legendary creatures. The Red Lotus Seed was obviously higher than the other levels, even stronger than the mutated Dragon Demon and King Kong.

This made Levi realize that some breathing techniques had a legendary limit.

It was purely because the server version was only available here. It did not represent its true potential.

Thus, from the start to the end, it was Red Lotus who led the fusion process. In the end, the four breathing techniques slowly disappeared on the proficiency panel.

At the same time, brand-new words began to appear.

"Crimson Emperor Dragon...."
