

Wizard 726

Chapter 726: Returning To Star Sea

'After all, from the looks of it now, if I didn't have the polygon panel, the first transformation of the Blood Source realm would only be able to compete with an ordinary Third-Circle Wizard. If I wanted to compete with Fourth-Circle Wizard, I would have to be at least at the third transformation of the Blood

Source realm.'

'When my five-dimensional breathing technique advances to the Second Transformation of the Blood Source Realm, I should have the strength and confidence to fight against an ordinary Fourth-Circle Wizard. With the Furious Dragon Lord and the Giant Dragon Warrior, I should be able to easily kill ordinary Fourth-Circle Wizards in close combat.'

Levi analyzed the process of the battle.

By using this Level 4 demon, he had basically measured the limits of his current strength.

"But I still can't be arrogant. After all, I can't use Furious Dragon Lord's state often." Levi warned himself.

As for Old John's storage bag, there wasn't much inside. Most of it was medicinal materials that weren't worth much.

In addition, there were more than 60,000 Aether Stones, some potion formulas, spells, and a Wizard Tool that Old John loved. Levi also planned to find an opportunity to get rid of it.

The next day.

At home, Levi continued to study the Purification Elixir. As for ingredients like the Saint Fruit, which did not exist in the Wizard World, Levi had no way to analyze its composition and compare it with the medicinal herbs in the Wizard World to find a specific target.

He could only rely on his imagination and guesses, combined with the effects of the herbs that already existed in the Wizard World, to try them one by one.

This was no doubt a laborious task, but Levi was happy about it.

Even if the final purification potion research failed, he could still gain and accumulate a lot of pharmaceutical knowledge and practical experience.

These were all invisible wealth.

At this moment, Old Xavier's voice came from outside the door.

"Levi, are you home?"

With a thought, the door opened automatically, and the magic array opened a path for Old Xavier.

Old Xavier walked in in a gloomy mood. Algerta silently poured Old Xavier his favorite wine.

"Thank you, Algerta." Old Xavier picked up his wine and drank it quietly.

"Sigh, Old John left just like that. He was the first friend I made when I first came to this wizard's market. At that time, we were just apprentice wizards." Old Xavier said emotionally.

"My condolences, Old Xavier." Levi also took a glass of wine and gulped it down.

"We were still not strong enough..." Old Sha had been hit hard by John Senior's death.

The cultivation of a wizard was lonely, and it was not easy to have a true old friend.

"Levi, I heard that the Black Pearl Wizard Market is going to be bought by the

Thunder Dragon Family. In the future, this place will become one of the Thunder Dragon Family's bases. Lord Garcia is leaving the Wizard Market. In his place, a Fifth-Circle Wizard from the Thunder Dragon Family will be stationed here." Old Xavier suddenly said.

"Is this news true?" Levi frowned.

"The news is spreading around, so it shouldn't be fake. Garcia and the Black

Pearl four wizards didn't come out to refute the rumors. As far as I know, a few Fourth-Circle Wizards have already left the Black Pearl Wizard Market and gone to other places," said Old Xavier.

"This... I just got here, and my butt hasn't even warmed up yet." Levi smiled bitterly.

"It can't be helped. In recent years, the Wizard World has become more and more chaotic. Many wizard families have taken advantage of the chaos to wantonly acquire small wizard organizations or markets to strengthen their family's power."

"As you know, the traditional wizard family system and the new wizard organization system have always conflicted."

"Some large wizard families have long been dissatisfied with the rule of the

Wizard Council because many of the reforms and innovations initiated by the

Council had touched their interests."

"It is said that those conservative Legendary Wizards are the patriarchs of several top wizard families in the current Wizard World, so you understand why some people don't want the war to end."

"Some big shots were taking advantage of the war to make profits. Even Legendary Wizards were no exception. One could imagine the situation on the ground."

"In fact, this is normal. Every man for himself, even the heavens would destroy the earth, especially the wizards. At the beginning of the establishment of the Council, many of the actions of the Wizard Ancestor Sauron won the favor of many low-level wizards, but there was no doubt that it also touched the interests of a small number of upper-level wizards."

"Before Sauron disappeared, he relied on the deterrence of the wizard ancestor status to deter other upper-level wizards from making trouble."

"But now, it's impossible. Sauron was an existence in ancient times. Now, there is a high probability that he had fallen in a foreign land. Unless he was truly promoted to a God, even a Legendary Wizard would only have a lifespan of 10,000 years. His influence had long faded."

"I have a feeling that we will have to live our peaceful days day by day now." Old Xavier sighed.

With the establishment of the Pan-Plane Wizard Council as a node, the wizards divided the history of the wizard civilization into two stages.

Before the Council was established, it was the ancient era. After that, it was the modern and contemporary era ruled by the Council.

Old Xavier had done a lot of research in this area. When he was free, he liked to study the history of the wizard civilization, and he highly respected the ancestors of the wizards, Sauron, and his ideas.

"So, what do you plan to do next?" Levi asked.

"I'm leaving the Black Pearl Wizard Market as well. I'll most likely head to the Star Sea to see if I can get an interview to join a high-ranking wizard organization." Old Xavier was not very confident. The requirements of high-level wizard organizations, especially those in the Star Sea, were very high. With his aptitude and age, there was not much hope..
