

Wizard 729

Chapter 729: Magma Ocean

Due to the demonic aura of the Thousand -Eyed Demon King, the Hundred-Eyed Demon Territory became a forbidden land in the human world, where demons wreaked havoc.

However, as time passed and the demon-hunting wizards in Riptide City worked hard, Levi did not see a single monster while he was traveling in the Hundred-Eyed Demon Territory.

A beautiful witch was sitting in a wizard airship, leading Levi.

"Senior, that sub-dimensional portal node is closer to the center of Hundred-Eyed Demon Territory. There might be some powerful monsters left behind. You have to be careful," said Miss Messenger Eve.

Eve now respected and worshipped Levi more than before.

Some time ago, when Levi was researching the Purification Elixir, he had accidentally developed a special potion formula.

Although this potion formula could not achieve the purification effect that Levi needed, it could at least remove some of the aftereffects of casting spells.

After Levi's experiment, the effect of the potion was very good. After he gave the potion to the owl, Miss Eve actually changed back.

Levi called this potion [Water of Eve].

The invention of the Water of Eve excited Levi for a while.

The one who was more excited than Levi was Eve, who could turn over a new leaf.

After all, she could only cast simple spells in her owl form. She couldn't meditate, and her cultivation level stagnated.

Not long after, Levi arrived at the coordinates of the sub-dimensional portal node under Eve's lead.

This sub-dimensional portal node was located in a cluster of underwater volcanoes.

Lava erupted and condensed at the bottom of the sea. White smoke filled the air, and the smell of sulfur filled the air.

"Such a large-scale land of underground fire is quite suitable for cultivating the Burning Faction," said Eve.

"The fire elemental power inside is mixed with the demonic aura of the Demon Lord. If I cultivate it, I will definitely go berserk." Levi shook his head.

"I see... Senior, the sub-dimensional portal node is on the ocean plains ahead." Eve reminded him.

She had passed by this place when she sent a message. She felt the dense fire elemental power in this sea area and thought that she was still lacking a stalk of Crimson Fire Grass, so she came down to look for it. Who would have thought that she would encounter a wild sub-dimensional portal node?

Levi came to the plains that Eve had mentioned and was slightly stunned.

There were no plains in front of him, only a huge pit with a diameter of nearly a thousand miles. It was filled with extremely high-temperature underground fire lava.

It was also an underground fire, but the temperature was several times higher than the underground fire on Black Fire Island.

"Eh, why is such a large plane gone... Senior, I didn't lie to you. This is where the sub-dimensional portal node is!" Eve's expression changed. She was obviously very anxious, worried that Levi would vent his anger on her.

"Don't panic. It should be here." Levi pondered for a moment before calling Joann out from Alice's ring.

"Senior... Aiyō, it's so hot!" Before Joann could fawn over Levi, he discovered a boundless sea of magma in the deep pit ahead. There was actually such a magical place at the bottom of the sea.

"Joann, use your knowledge as a Ruin Hunter to determine if this deep pit was once the location of an ancient ruin.'

"Alright, Senior. Let me take a look." Traces of light flickered in Joann's eyes. In his world, the omnipresent magnetic force was circulating in an orderly manner. However, in the deep pit, the magnetic force was chaotic and disorderly.

After a long while, Joann said with a serious expression, "Senior, there seem to be traces of an ancient wizard relic here. From the magnetic field, the space here seems to be distorted. Also, I felt a strong spell fluctuation in this magma sea... This wasn't formed naturally. It's man-made."

Levi nodded and said, "It seems like this ancient wizard relic place is where the

Hundred-Eyed Demon King was sealed."

"What? Then isn't this place very dangerous? Senior, let's leave quickly," said

Eve.

"It doesn't matter. From what I can sense with my Perception, there are no more demons in the Hundred-Eyed Demon Territory. The demons have either been killed or have already infiltrated the wizard's gathering place. They won't stay here obediently."

"This deep pit was probably formed after the legendary forbidden spell struck the Abyss Well. The legendary forbidden spell had changed the landscape here, turning the plains into a deep pit. The lava also spewed out and drowned the place."

"The two of you can enter the ring. I'll be entering the magma ocean after that. With both of your cultivation, you guys won't be able to last more than a minute before you're burned to ashes," said Levi.

"Alright, be careful, senior."

At the edge of the huge magma ocean, Levi was as tiny as an ant.

"Is this the power of a Legendary Wizard? It truly changes the world, and it has the unfathomable power of gods and ghosts!" Levi muttered.

He could feel a magical radiation from the lava.

The radiation was actually trying to invade and change Levi's body. Unfortunately, Levi's body was too strong, and the radiation could not do anything to him.

"Even the residual radiation is so powerful."

Levi's protective force field lit up. He had to go down and see if the sub-dimensional portal node was still there.

With the power of a legendary spell, it was very likely to be destroyed.

The moment he entered the lava, the terrifying heat burned Levi's protective force field. With his second-circle protective force field, he would not be able to hold on for long before he was melted..
