

Wizard 730

Chapter 730: Spatial Vortex

He decided not to waste any more spell power. Golden scales covered his body, and the true form of the Fire Dragon appeared. He directly used his body to resist the power of the lava.

He released Ace from Alice's ring. Ace jumped into the magma ocean like a fish in water, feeling very carefree.

"Ace, you're in charge of keeping me alert. My Perception is affected here," said Levi.

Perhaps due to the obstruction of the terrifyingly high-temperature lava and the fluctuations of the legendary spell, both the wizard's Spiritual Perception and Levi's Intuition were affected to varying degrees.

Although it was unlikely that there were living creatures in the sea of lava, Levi could not let his guard down.

Ace nodded and immediately began to patrol around Levi. His body turned into countless fire elemental particles that were full of spirituality and fused into the lava. This way, he could expand the range of detection.

After revealing his Fire Dragon's true form, Levi's resistance was comparable to that of a Flame Giant, so the lava was not as hot to him anymore.

Levi carefully explored the bottom of the lava. When he could no longer hold on, he would crawl out of the magma ocean and mark the places he had patrolled.

This cycle continued for three days.

In the end, Levi found a swirling lava vortex in the northeast corner of the magma ocean.

"It should be here. This vortex is probably driven by the distorted spatial power." Levi casually took out an alchemical creature he had created and sent it into the vortex before it was melted by the lava.

In an instant, Levi saw the alchemical creature begin to disintegrate into nothingness.

"A first-circle alchemical creature that was mixed with mithril was instantly disintegrated. This is the power of space distortion. No wonder we need to make a teleportation portal. Otherwise, the protective force field of a low-level wizard would not be much better. I just don't know if my body can withstand this power of space distortion."

Levi walked forward. His Spider Sensing only sensed a faint sense of danger, which meant that the power of space distortion should be dangerous, but not very dangerous.

He pondered for a moment, then his right arm suddenly turned into a bloody fog. It continued to extend and finally stopped in front of the vortex.

At the end of the blood fog flesh and blood condensed, and dark golden scales covered his palm.

Levi extended his arm into the vortex, ready to cut it off at any moment.

Then, an ear-piercing friction sound came from the vortex.

The friction of the spatial power caused Levi's golden scales to produce sparks. After about a minute, Levi's scales were all shattered. Before Levi could reach out his palm, the palm quickly disintegrated and became a bloody mess.

Levi stretched his arm back and looked at the Death Ember Power repairing his arm calmly.

"It's not as terrifying as I imagined. If I resist with all my might, coupled with those spells, protective force fields, and the Great Black Sky Curtain, I should be able to hold on for a while."

Compared to the power of space distortion between different planes, the power of space distortion between the different sub-dimensional portals of the same plane was not very exaggerated.

As far as Levi knew, the reason why only high-level wizards could travel between planes was because only high-level wizards' protective force fields could pass through the dimensional portal formed by dimensional spells. "This way, I can enter the sub-dimensional portal node after I've made some preparations." Levi was m a gooa mooa.

"D*mn the Thunder Dragon Family, d*mn the dark wizard. They've turned the Wizard World into a mess. Rather than being disturbed here every day, I'd rather go back to the human world and hide. The only thing I need to worry about is Saint Estella, but it's still better than being in the Wizard World."

"As for the problem of the elemental power being too thin, there was a small elemental conversion array in the Book of Cypher that could convert the elemental power of the Aether Stone for my cultivation. Although this is a waste of Aether Stone, it can't be helped."

"Moreover, with the awakening of the Dark Wave, the elemental power in the human world is also constantly increasing. It should be no problem for me to at least cultivate."

Levi had a premonition.

The convergence of the Heavenly Sphere, the awakening of the Dark Wave, the Great Expedition of the Wizard World, and the dark and righteous war all happened at the same time.

The old order and structure would be broken.

The human world was the origin of the wizards. It was definitely not as simple as it seemed.

The agreement between the wizards and the Seven Gods that they would not disturb each other could also be broken because of this incident. At that time, the human world would be interesting.

"No matter what, if I can't make a decision, I'll just hide in the human world. At the very least, the Saints in the human world are stronger than me, but there's a limit to their strength. The gods can't directly reach their hands into the human world to hit me... But those big shots in the Wizard World are much f*cking stronger than me."

Thinking of the Thunder Dragon Family that had broken his peaceful life time and time again, Levi felt a wave of despair.

And the Thunder Dragon Family was just a dog raised by a true big shot in the

Wizard World.

"The waters are too deep."

The next day.

After Levi finished all the preparations, he returned to the space vortex.

However, when he was about to step into the spatial vortex, his Spider Sensing signaled to him a stronger sense of danger.

Levi quietly took a few steps back.

"Why don't I learn a third -circle defensive spell first? It's safer this way."

With the principle of quality over quantity, Levi had not cultivated any third-circle defensive spell until now. But now, he had no choice but to start cultivating it in advance..
