

Wizard 731

Chapter 731: Return Home!

He left the spatial vortex and found a place to stay. He said to himself,

"Actually, I don't have to go back in such a hurry. This place is actually not bad. No one will disturb me. I might as well cultivate here for a while, sort out my spell library, and fuse an original spell that belongs to me."

Therefore, in order to pass through the sub-dimensional portal node without any risk, Levi began to research his original third-circle defensive spell.

At present, Levi's spell library has 536 cantrip spells, 124 first-ring spells, 35 second-circle spells, and only eight third-circle spells.

"Most of the spells in my current spell library are from the Ocean Faction. I'll

Combine a few and get a third-circle Ocean Faction defensive spell."

Levi opened up a cave abode at the bottom of the sea and set up all kinds of arrays. He also asked Mountain Giant and the others to protect him.

He began his long journey of spell research.

To synthesize a third-circle spell, Levi would need to master at least a dozen similar cantrip and first-ring spells, which would take a lot of time.

Cultivation had no time limit.

Year 1085 of the Holy Brilliance Calendar, the Month of Flowing Fire.

The 49th year of the Great Expedition.

The Wizard World was in constant war.

The dispute between the dark and the righteous had entered an even more intense stage.

There were more than 240 regions in the outer sea region, and nearly 100 regions had already been taken by the dark wizard. This was because the Star Tower had already given up on the outer sea region and focused on attacking the dark wizard forces in the inner sea region.

Both sides were attacking with a strategy of inflicting 1,000 damage to the enemy and 800 damage to themselves.

War was like a meat grinder, causing the wizard civilization to suffer heavy losses.

In comparison, the situation at the front line of the Five Sector Expedition was much better.

Under the leadership of the five Legendary Wizards, the expeditionary army had won time and time again. The battles between the four Evil Gods of Chaos and the Legendary Wizards were also repeatedly at a disadvantage.

However, it was not enough to help the Wizard Council.

For the Wizard Council, the most important thing now was not the Five Sector Expedition. Losing five planes was a huge loss, but if they lost this civil war, it would be the end.

And in the Star Sea, amidst the flames of war, a fifth-circle wizard organization named [Starfire Wizard Academy] quietly rose up.

The Starfire Wizard Academy did not set a wizard talent threshold. Anyone with wizard talent, even if they were Children of Chaos, could enter and enjoy wizard education after paying a relatively low tuition fee.

This allowed Starfire Wizard Academy to gather a large number of apprentice wizards and wizards in a short period of time. Among them, most of them were nomadic wizards.

The teachers and students of Starfire Wizard Academy were also actively involved in the war against the dark wizards and received strong support from the Star Tower.

Of course, the rise of Starfire Wizard Academy naturally had many obstacles. It was said that its principal, Garcia, had encountered several failed assassinations.

As for whether the mastermind behind the assassination was from the dark wizard or the righteous wizard organization, that was unknown.

In Area 7, the Thunder Dragon Family used various methods to merge with other forces, eventually forming a large-scale Thunder Dragon Battle Group. After the Thunder Dragon Battle Group was established, it also strongly supported the Star Tower's cause of fighting against the dark wizards.

This caused the reputation of Thunder Spear Soret to soar in Area 7. The other two fifth-circle wizard families that were passively resisting the dark wizards were strongly condemned by the outside world.

The outside world was stormy and lively.

At the center of the Hundred-Eyed Demon Territory, on the shore of the huge magma ocean.

Unknowingly, four years had passed.

In his mind, next to the gaseous spiritual force magic ring, there were many spell models revolving around the magic ring. There were cantrip models, first and second-circle spells, and only three third-circle spells.

Sun Flame Explosion, Glacial Sword Finger, and a brand new spell model.

Levi opened his eyes, and as he chanted a spell, black water as thick as ink gathered around him from all directions, forming a wriggling ball of ink.

Occasionally, a drop of this black water would fall on the ground, and it was enough to create a deep pit. It could be seen how heavy and dense the black water was.

"Bo Gang, attack me fiercely. "

After receiving the order, the Mountain Giant fiercely attacked outside the inkball. The inkball kept trembling, but it steadily blocked Bo Gang's third -circle spell attack and brute force attack. It only shattered after a minute.

"My self-created third-circle spell, Heavy Water Barrier, is finally completed.

This defense is really good."

The defensive strength of the Heavy Water Barrier should be a Grade A spell among the third-circle spells. It was already the top-notch third-circle defensive spell. With the addition of the Aether Dominance Special Effect, the actual defensive strength was no different from a Grade S.

After all, a Grade S spell was one in ten thousand. It was not easy to create them. Otherwise, they would not be called "top-grade spells."

The Heavy Water Barrier was Levi's third-circle protective force field, so it was completely qualified.

"Once it reaches Grade S, it will be qualified to be my first innate spell. With the enhancement of the Aether Rule Special Effect, it's equivalent to me mastering a fourth-circle innate spell in advance. What a pity... However, there's still a chance to improve its quality in the future. There's no hurry."

Apart from that, his proficiency in the Golden Snake Breathing Technique had also reached four-fifths of level 13, and he was closer to the second change of the Blood Source realm.

After level 13, the cultivation speed of the Knight Breathing Technique was obviously much slower. One of the main reasons was that the quality of Levi's secret medicine could not keep up with the increase in his realm.

The resources of transcendent creatures in the Wizard World had been depleted over the years, and they were getting lesser and lesser.

There were only a few of them, and they were all hidden in their own resource secret realms by the large organizations. It was not for Levi who was a nomadic wizard.

This was an almost unsolvable problem unless Levi could find a new plane.

Levi left the cave abode and put Bo Gang and the others away.

Unknowingly, he had been cultivating in this place for four years. Other than loneliness and boredom, there was no other danger.

His spiritual force had reached 115 points. The Glacial Sword Finger was already at the peak of level 8. This was a spell he had created when he had advanced to the third-circle. It was relatively ordinary and could not keep up with the progress of his strength.

As for the Sun Flame Explosion, it was being cultivated methodically, and its power was slowly increasing, making up for Levi's lack of spell attacks.

Now that everything was ready, he felt that he could go to the sub-dimensional portal node to take a look.

Not long after, Levi arrived in front of the spatial vortex again.

"It's still here."

Layers of protective spells lit up around his body. The Heavy Water Barrier covered him, and the golden scales assembled. It could be said that stacked armors were stacked to the extreme.

He used the same trick again, using his broken arm as the price to experiment.

This time, due to the increase in his proficiency with the Golden Snake Breathing Technique, Levi was able to last longer.

"With the protection of the barrier, there should be no problem." Levi arrived less than a meter away from the vortex.

His Spider Sensing only sensed a faint sense of danger.

After hesitating for a moment, Levi stepped in with a determined expression.

Without the protection of the sub-dimension portal gate, Levi was able to see everything that was happening outside of the sub-dimensional portal.

Darkness, deathly stillness, shattering, and nothingness were the main melody.

The spatial energy in the passage tore apart Levi's defensive field.

The Heavy Water Barrier was broken after a while, and the defensive field below was also destroyed layer by layer.

As soon as the power of space distortion touched Levi's Golden Snake Scales, he disappeared from the tunnel.

And in the human world, in the boundless sea, and on an active volcanic island filled with black smoke...

A group of lizardmen covered in fine scales and holding spears were holding a sacrifice under a volcano.

The sacrificial offerings were sailors who were tied up. There seemed to be a young knight among them.

A huge Lizardman chief, who was twenty feet tall, held a staff in his hand and wore bone armor. He put his hands together, stuck out his forked tongue, and chanted, "The ring that circles the world."

"The primate of all scale insects."

"The Holy Spirit that controls reincarnation."

"Great Supreme Holy Snake."

"Yegu!"

"Your pious servant sincerely pleads you to advise us."

As soon as the chief finished speaking, a terrifying explosion sounded from the crater with a loud bang.

The chief and the lizardmen looked at the place filled with black smoke with solemn expressions.

A raging pillar of fire rose from the sky and reached the heavens. This active volcano had erupted..
