

Wizard 743

Chapter 743: Mortal Barrier! (2)

"Mixed Venom!"

Levi placed his palm between Cui Li's eyes.

The Mixed Venom True Form appeared, and the asphalt-like Toxic Swarm turned into a thin line that surged in.

Then, the corpse poison particles in Cui Li's body were all devoured by the Toxic Swarm.

After a period of time, Levi withdrew his palm.

An incomparably foul-smelling substance appeared in his palm.

"Even the Toxic Swarm can't eat it. This is really too disgusting." The Toxic Swarm could devour all kinds of poison, but it could only suck out this corpse poison and not digest it.

Ghouls were an extremely dirty race. It was said that they believed in the

Father of Plagues, one of the Four Evil Gods of Chaos. They believed that the Father of Plagues was the source of all poisons and the most impure person in the world.

Levi was not in the mood to find the mastermind behind this plague. That was what the Church should do.

He only wanted to develop a special potion formula so that his people and soldiers could take the potion and be immune to the zombie plague.

Putting away his Mixed Venom True Form, Levi pointed at Cui Li's glabella.

In a daze, Cui Li woke up and rubbed her eyes. She looked at the back of her hand. Although the abscess was still there, the pain was gone, and the stench began to dissipate.

She knew that the lord in front of her had saved her.

"Thank you, Lord."

"You're welcome. I've only temporarily forced the source of the plague out of your body. You might still be infected by the plague."

Generally speaking, although knights were also infected with the plague, the probability was far lower than that of mortals.

Therefore, apart from potions, physique was also the key to resisting the plague.

However, the ordinary people in this world did not have the qualifications to cultivate the Knight Breathing Technique.

This must be the sorrow of the lower class.

Levi was not a god, and he could not save these people.

It could only be said that if he could help, he would not reject it.

For the rest of the time, Levi studied medicine, pharmaceuticals, plagues, ghouls, and other related knowledge in the Flower Castle all day long.

In the blink of an eye, three months had passed.

Three months later, Levi finally successfully developed a drug to fight the corpse poison.

Because it was developed in Flower City, he called it the Hundred Flowers Potion.

The materials needed for the Hundred Flowers Potion were not high-level materials. They were all very common potions in the Wizard World. They were also distributed in some places in the human world.

After all, this corpse poison was not a very difficult virus.

In Levi's opinion, the reason why the plague could wreak havoc for such a long time was purely because these people from the Church were obsessed with power and money, but they did not have true research ability.

After the Hundred Flowers Potion was successfully developed, Levi immediately conducted experiments in his territory. The results were quite good. After taking the potion, the symptoms of the infected quickly eased. A month later, they returned to normal. Other than some scars, they were no different from ordinary people.

Holy Brilliance Calendar Year 1088, Month of Beginning.

In the past period, the plague in Flower City and Storm City was gradually contained.

It was said that there was a wandering doctor called Watson who often appeared on the streets and alleys of these two cities, selling a medicine called Hundred Flowers Potion.

All the patients who took the Hundred Flowers Potion soon recovered.

The Hundred Flowers Potion was very cheap. Even the most ordinary serf could afford it.

Gradually, titles like “Miracle Doctor Watson” and “Hundred Flowers Doctor” spread widely in the southern region.

Many aristocratic lords were looking for this doctor anxiously.

However, this doctor’s whereabouts were uncertain. Until now, no one had seen his appearance.

The mortals who bought the potions only said that Miracle Doctor Watson was wearing a common bird’s beak mask and was tall and thin. As for his specific characteristics, no one could say for sure.

After that, the legend of Miracle Doctor Watson also appeared in Redbud City, Emerald Tree City, and other cities in the south.

Not long after, the plague in these cities subsided.

Miracle Doctor Watson appeared in more than ten southern cities one after another and disappeared without a trace. No one found any traces of him again.

Some people said that because Miracle Doctor Watson had been fighting the plague for a long time, he had encountered an even more terrifying plague and died.

Some people said that Miracle Doctor Watson had obstructed the financial path of some people who had made a fortune from the plague and was killed.

In short, Miracle Doctor Watson had disappeared.

However, many cities were still suffering from the plague.

The mortals were praying for the appearance of Miracle Doctor Watson, but their hopes were disappointed time and time again.

In the end, they could only pray to the gods in their hearts.

Peacock Capital.

Headquarters of the Church of Holy Light.

At the peak of Heavenly Mountain, a young man in sackcloth was sitting under the statue of the Heavenly Father. A saint hurriedly flew in front of him and bent down to deliver a small bottle of medicine to the young man in sackcloth.

"Lord Saint, this is the Hundred Flowers Potion."

Saint Ye Lin took the bottle of potion and sized it up calmly.

"It's obviously the work of a wizard," Ye Lin said with a smile.

"Lord, do you need us to intensify our efforts to find that Miracle Doctor Watson?" the saint asked.

"There's no need. This bottle of medicine is enough. To be able to develop a targeted medicine in such a short period of time, the other party's cultivation realm and knowledge must not be low. If he wants to hide, you won't be able to find him," Saint Ye Lin said..
