

Wizard 75

Chapter 75: Breathing Technique Fusion!

[Siren Breathing Technique: Level 5 (Maximum)], Special Effect: Intermediate

Speed, Bone Shrinking Transformation.]

"So, the fifth level is the limit of the Siren Breathing Technique?"

Levi felt the black gas from the Siren Seed entering his limbs.

He quickly punched out. His fists were like phantoms, and each punch carried wind.

Then, with a whip kick, the air seemed to crackle.

"My attack speed has increased quite a bit. Let's go test my running speed." Levi came to the venue where he had tested himself before.

His entire body tensed up, and his back arched slightly like a cheetah with its eyes on an antelope. Then, with a bang, the black gas from the Siren Seed and the Frost Wolf Seed burst out from his legs and core area!

Levi turned into a blur.

His current speed was much faster.

One, two, three, four seconds.

In just four seconds, Levi had reached the finish line.

"Beginner Speed is 100 meters in five seconds; Intermediate Speed is 100 meters in four seconds. It may seem like it's only reduced by one second, but it's a qualitative leap."

"The process of cultivating the breathing technique is to continuously transform the body and use the black gas to repeatedly break through the limits of the human body. Every second, even a millisecond, of progress is crucial!"

Levi panted slightly, feeling satisfied.

The cheetah's fastest speed was less than three seconds for a hundred meters.

As long as his speed improved, he would be comparable to the king of sprinting in his previous life: the cheetah.

A hundred meters in three seconds was too fast for a mortal's eyes to capture. They could only see the afterimages of the cheetah's limbs.

"Other than the Siren Breathing Technique during this cultivation period, the greatest breakthrough was the Seal of Flame."

[Seal of Flame: Level 1 (300/1000)]

Although he was still at level 1, Levi's hand-forming speed had increased after a period of practice. This meant that his spellcasting speed had also increased.

As his proficiency increased, his compatibility with the mysterious Aether power in the world also increased. With every improvement in spellcasting, the scale of the flame flow expanded.

Levi arrived in front of a large tree about a meter away from him. Then, he slapped his palm in the air, and a flame stream about a meter long gushed out like lava!

The high temperature exploded. Boom!

Half of the thick tree trunk was charred in the next moment. Levi turned it into ashes with a touch.

The air was filled with the smell of sulfur.

Levi blew out the white smoke in his palm.

"If the people from the church had discovered my attack, they would have thought I was a wizard. "Therefore, this is my trump card. I can't let anyone know about it. Anyone who has seen this move of mine must be dead."

"Although Winchester said that since the first year of Holy Brilliance, the connection between the gods and the church has been decreasing, and there has been no miracle in the past thousand years, the foundation that the church has accumulated over thousands of years is still not something that a half-experienced exorcist like me can compare to."

"Even those powerful and mysterious wizards can only hide in the Realm of the Unbelievers to avoid being watched by the gods. With the gods around, I have to be even more low-key and cautious," Levi kept reminding himself.

However, his strength was different now that he possessed the Seal of Flame. "My hands are itching. I wonder if I can fight a grand knight now."

"No, I can't have such dangerous thoughts. It's more suitable for me to crush the opponent. Before the Duke of Montenegro and the Bird of Death's Voice find trouble with me, I'll continue to develop quietly."

"It won't be too late to settle the score when I become a grand knight!" It had been more than eight years since the 1000th year of the Holy Brilliance Calendar.

He had also grown from a ten-year-old child to an eighteen-year-old adult.

After reaching 1.9 meters tall, he grew very slowly. Although his body size was wildly exaggerated, many strength-type knights were even more outsized than him.

"The Black Snake Secret Medicine is almost gone. I've only reached one-third of the fifth level, and I must worry about ambergris again."

Levi opened his proficiency panel.

[Black Snake Breathing Technique: Level 5 (8123/30000), Special Effect:

[Vortex Beast Breathing Technique: Level 2 (1000/5000)] [Giant Rhinoceros Breathing Technique: Level 3 (1011/10000)] [Raging Bull Breathing Technique: Level 3 (3233/10000)]

[Man-Faced Spider Breathing Technique: Level 4 (12333/20000). Special Effect: Beginner Vibrosensing, Spider Sensing.]

[Siren Breathing Technique: Level 5 (Maximum)], Special Effect: Intermediate Speed, Bone Shrinking Transformation.]

[Giant Bear Breathing Technique: Level 4 (Maximum). Special Effect: Beginner Strength.]

[Frost Wolf Breathing Technique: Level 4 (Limit)]. Special Effect: Beginner

"I have eight types of breathing techniques," Levi could not help but exclaim.

Suddenly, he noticed a new option in the Special Effect section of the Frost Wolf Breathing Technique.

With a thought, he clicked on the option "Can be fused."

[Do you wish to merge the Frost Wolf Breathing Technique into the Siren Breathing Technique?]

After merging, Frost Wolf Breathing Technique will disappear, while Siren Breathing Technique's quality will increase slightly. When its quality reaches a certain level, Siren Breathing Technique will break through its limit.] [Note: The current fusion is limited to the fusion of the same type of skill.]

[Note: The fusion will consume a certain amount of mental and physical strength. Please ensure that the fusion is done safely!]

"Hmm? This was possible?"

"What should I do with the Life Seed after I merge with it? Will it improve me greatly?" Levi muttered.

However, the proficiency panel only gave a mechanical prompt and no follow-up.

"Forget it; I'll give it a try. This Frost Wolf Breathing Technique is too trashy, and its special effects overlap with Siren's."

"Let's fuse them." After Levi prepared all kinds of food and water, he began the fusion in the shelter.

At the same time, Levi noticed something.

The Frost Wolf Seed and Siren Seed in his heart started to move.

Like a world-destroying demon, the Siren Seed waved its eight twisting tentacles wildly, tightly binding the Frost Wolf Seed. The Frost Wolf's body kept shrinking. Ultimately, the Frost Wolf disappeared in an extremely unwilling and aggrieved mood.

The Siren Seed stretched its tentacles comfortably, looking satisfied after eating its fill. It also became fearless when facing the Man-Faced Spiders it had been afraid of.

However, the Siren Seed prostrated before the Black Snake Seed circling high above. It recognized its status in the family.

"I feel like these life seeds are alive," Levi said.

He opened the proficiency panel again, and the Frost Wolf Breathing Technique had disappeared.

The Siren Breathing Technique had also changed.

[Siren Breathing Technique: Level 5 (Maximum, breakthrough available, current progress 1/3), Special Effect: Intermediate Speed, Bone Shrinking Transformation.]

"A Frost Wolf Breathing Technique at the limit of the fourth level can only increase the breakthrough progress by one point. In other words, I still need two speed-type breathing techniques at the limit of the fourth level to break the limit?"

"That's so cunning," Levi could not help but curse.

D*mn, the proficiency panel. In his previous life, he had completely understood the tricks of some pay-to-win online games.

According to the nature of the system, as the quality of the breathing technique becomes higher and higher in the future, the number of powerful breathing techniques needed to break the limit will also increase.

At the moment, it was not very useful.

However, this would be very useful if Levi needed to break through the restrictions and upgrade to perfect or legendary breathing techniques. After all, perfect and legendary breathing techniques could only be encountered by luck. Levi did not expect to obtain them at all.

However, he could collect a large number of shallow and excellent grades.

As long as he learned enough breathing techniques, he would eventually be able to master them!

Then he could create a legendary breathing technique himself.

Perhaps even beyond legendary!
