

Wizard 750

Chapter 750: Level 14! (4)

Every Ancient Saint was the Commander of a tribe with at least a few hundred thousand members. They controlled a large area of the Ancient Saint Empire.

And with Kaku's experience, he had no idea what was outside the Ancient Saint Empire.

The Ancient Saint Empire was filled with ferocious beasts, and there were even Ancient Beasts that were comparable to Ancient Saints.

Ancient beasts were descendants of powerful ancient bloodlines. Their physical bodies were comparable to Ancient Saints; they even grasped supernatural abilities that could destroy the world.

If not for the thirteen Ancient Saints guarding the empire and deterring those ancient beasts, a small tribe like Kaku's would have long been flattened by powerful ferocious beasts.

Therefore, for most ordinary Lizardmen, it was impossible for them to leave the Ancient Saint Empire in their entire lives. They did not know much about the outside world.

Levi explored the temple and activated his Intuition. He did not miss a single trace.

In the end, he found nothing.

This was a completely abandoned temple. Other than the altar, there was nothing special about it. Levi also did not find anything left behind by that ancient wizard.

"Let's begin. The main purpose of this operation is to understand the situation in the Ancient Saint Empire and this plane. It would be best if the cultivation method of Ancient Saints could subdue an ancient beast."

Levi let Kaku enter Alice's ring while he walked alone.

He no longer used the transformation ability of the Scarlet Dragon. Instead, he revealed his true form of the Fire Dragon. After some changes, Levi looked like an ordinary Fire Lizardman.

Crimson scales, a ghastly snake tongue, and a hideous Lizardman's head covered in scales.

According to Kaku, the Fire Lizardmen Tribe was one of the strongest tribes in the Ancient Saint Empire. Their Commander was the second Ancient Saint, Hellfire Ancient Saint.

The Fire Lizardman was one of the few crawlers who could naturally use simple fire-type spells. The strongest, Hellfire Ancient Saint, had even developed this ability to the extreme.

It was Levi's first time here, so he didn't dare to fly. Instead, he moved quietly on the ground.

Not long after, a creature that looked like a two-legged Velociraptor appeared in Levi's vision.

He used the First-Ring Spell, Wizard's Hand, and grasped the air.

Levi dragged the Velociraptor over. Levi immediately drew out its blood and tested it through the Rowling Crystal.

After the test, he frowned slightly.

"It's just an ordinary wild beast, not a transcendent creature, let alone a mixed-blood Dragon Clan. I feel that the creatures in this plane are a little similar to the dinosaur era in my previous life. They are all mainly reptiles. Could it be that these reptiles evolved from these reptiles?"

Levi suddenly thought of the fur clan. That clan might have evolved from various fur beasts.

These two races had some similarities.

Not long after, Levi found an ordinary-looking herb at the root of a huge tree.

The plants emitted a green fluorescent light and a strange fragrance.

"Greenheart Grass. The ingredients needed to refine the third-circle meditation supplementary potion are extinct in the Wizard World. They can only be found in some resource secret realms and Shadow

Realms. They are controlled by the wizard families and wizard organizations. Even if nomadic wizards have money, they can't buy it..." Levi's eyes glowed.

He immediately collected the Greenheart Grass.

He had left the Wizard World for many years and had already used up all the meditation supplementary potions he had accumulated.

Due to the lack of materials, he had Pharmacy skills, but he could not refine meditation supplementary potions for himself. He relied on the proficiency panel to cultivate bit by bit.

Unexpectedly, not long after he started exploring this alternate plane, he discovered a precious material he needed.

"This is indeed an undeveloped treasure land. These Crawler Civilizations are too backward. They haven't developed a pharmacist and weapon craftsman system like wizards. Therefore, the demand for resources is far inferior to the Wizard World."

I wonder if there are any Aether Stone mines in this plane. If there are, I'll be really rich. I'll just sit on the gold mine and lie flat. There's no need to work so hard. "

Levi began to fantasize.

After that, Levi was not in a hurry to leave the forest. Instead, he kept searching for other potion materials.

Foxtail Grass, Duck Tongue Grass, Rooster Flower, Heaven Silkworm Flower... Levi took all kinds of precious medicinal herbs from the forest.

With his knowledge as a Third-Circle Pharmacist, there were many medicinal herbs that he did not recognize, but that did not stop him from putting them away.

He had to go back and slowly study these medicinal herbs to see where they could be used.

Of course, Levi did not take away the unripe medicinal herbs. That would be destroying the sustainable ecology here.

In the future, his Dusk Holy Temple would be established here, so he naturally could not drain the pond of all the fish.

A day later, Levi was still happily collecting herbs in this primitive forest.

Relying on Intuition, he could avoid most wild beasts in advance, allowing him to quietly search for herbs.

In one day, he had collected 26 known herbs and seven unknown herbs.

Levi had collected several types of ingredients to refine the third -circle meditation supplementary potion.

Suddenly, there was movement in front of them.

Trees crumbled, and something huge seemed to be charging toward Levi.

Roar!

A twenty-foot-long beast covered in green scales rushed over aggressively.

"It's at the level of a first-circle transcendent creature.."
