

## Wizard 751

Chapter 751: Level 14! (5)

He gently dodged the giant beast's attack and slapped it away.

Levi stepped on the giant beast's head, immobilizing it. As usual, he extracted its bloodline and tested it.

[Green Iguana Bloodline 68%, Titan Snake Bloodline 54%... Jade Dragon Bloodline 1.5%.]

"Eh, it actually contains the Jade Dragon Bloodline. Although it's not of much use to me now, it's not bad to collect it to fill the extraordinary bloodline library. Take it all away!"

With Levi's realm and the richness of the Dragon Clan's Bloodline, it was not difficult for him to tame these ordinary first-circle mixed-blood dragons.

Before long, Levi sent the green-scaled beast into Alice's ring.

This giant beast was most likely a new species. Levi named it Jade Dragon Lizard.

"The existence of a mixed-blood Dragon Clan is a good sign. This plane is probably also a plane left behind by the Dragon Clan. There should be other mixed-blood Dragon Clans. I have a plan for my breathing technique secret medicine."

According to Levi's research and experiments during his time in the human world,

After the fusion, Levi's current six-dimensional breathing technique required a certain amount of secret medicine compared to before.

Take the Crimson Emperor Dragon Breathing Technique as an example. It was a combination of King Kong, Red Lotus, Black Whale, and Dragon Demon's strength breathing techniques.

Before fusing, the secret medicine Levi needed to cultivate these four breathing techniques was very mixed.

The Frost Giant and Saint Ape of the King Kong Breathing Technique, the

Ostrich Mountain of the Dragon Demon and Musk Bull, the Red Lotus, the

Black Whale, and so on needed to find secret medicines to cultivate. Every ingredient was very important.

After the fusion, all the breathing techniques were combined into a dragon-element breathing technique, which was the Crimson Emperor Dragon created by Levi.

Such benefits were obvious. The main ingredient for the Crimson Emperor Dragon's breathing technique cultivation had become the bloodline of the fire-element mixed-blood Dragon Clan.

Based on satisfying this condition, the higher the level of the mixed-blood Dragon Clan, the better the cultivation effect.

As for the complicated Frost Giant, Holy Infant, Black Whale, and Ostrich Mountain Bird, they became secondary materials.

Compared to the main ingredients, the quality of these secondary ingredients was insignificant because they had a lower effect on the cultivation speed of the breathing technique.

Even if he didn't, it wouldn't affect him much.

After all, he had the proficiency panel. In theory, he could cultivate without the secret medicine, but the speed was too slow.

Therefore, Levi's goal for infiltrating the alternate plane this time was very clear. Other than various medicinal herbs and minerals,

He also needed various types of mixed-blood Dragon Clan creatures to enrich his bloodline library.

As for the Crimson Emperor Dragon, Levi only had a second-circle Dragon Finch to support him. He couldn't keep up with his strength.

He was not in a hurry for the wind and lightning attribute Sky Dragon for the time being. He could still cultivate the third-circle Wind Thunder Winged Dragon for a long time.

As for what the Golden Snake, Death Ember, and Scarlet Dragon needed, they were somewhat special.

So far, the main ingredients for the Golden Snake's secret medicine had come from Gustav of the water element and the Three-horned Dragon King of the earth element. Levi felt that the Golden Snake Breathing Technique still had room for fusion and advancement. There were still some perfect and excellent defensive breathing techniques in the breathing technique library that he had mastered. When he had time, he would cultivate them and fuse them with the Golden Snake again to mutate a stronger breathing technique. Otherwise, he always felt that the Golden Snake was a little low. It paled in comparison to the Crimson Emperor Dragon in the strength dimension.

As for the Scarlet Dragon Breathing Technique, whether it was the Blood Beasts that focused on blood or the Jade Dragons that focused on poison, they did not have the usual elemental attributes. After Levi studied it, he categorized it as a "negative energy attribute" based on the classification of various factions by wizards.

Unfortunately, negative energy attributes were too rare. If he wanted to completely solve the problem of the Scarlet Dragon's secret medicine, he might have to go to hell, the Abyss, the Underworld, and other places where negative energy gathered to search. Currently, the Scarlet Dragon's secret medicine was still mainly made up of Blood Clan and ordinary Dragon Clan bloodlines.

In the end, the Death Ember Breathing Technique, which was mutated by the Undying Bird and the Ash Dragon, might be from the Dragon Clan, but Levi found that its main secret medicine still could not be separated from the critical first-circle, the Undying Bird. The powerful self-healing ability of the Undying Bird Bloodline was the core of the Death Ember.

Earth, Fire, Wind, Water, Thunder, and Negative Energy Dragon Clan, coupled with the Undying Bird Bloodline, were all goals that Levi would have to fight for a long time.

As his breathing technique changed, it might increase or decrease.

In the following days, Levi wandered in the primeval forest for half a month. It was really because there were too many medicinal herbs and resources here that he couldn't stop and didn't want to leave.

"No, it's time to get down to business. I can't waste time searching for materials. It's better to let the Knights do this in the future. Collecting resources is a matter of strength. No matter how fast I collect them, it's a waste of time."

Levi released Kaku from Alice's ring and said, "Take me to the nearest gathering place."

After Kaku came out of the ring, he couldn't calm down for a long time.

There was such a real small world in Ancient Saint Lord's personal space.

In the small world, there was the sky, Earth, and the sea. There were also many powerful transcendent creatures.

Kaku was inside, trembling in fear, afraid of being beaten.

Now, he was finally out.

Ancient Saint Lord's ability was like that of a god. It was unfathomable.

In terms of transcendent technology, compared to the wizard civilization, the Ancient Saint civilization was similar to the difference between the primitive and modern people in Levi's previous life.

According to Kaku's knowledge, a few years ago, there were two Ancient Saints who fought over an ancient magic ring with a storage function.

In fact, the storage ability of that ancient magic ring might not even be one-thousandth of Levi's Alice's ring.

That was why Kaku was so surprised by the small world in Alice's ring.

Three days later, Kaku led Levi to the nearest crawlers gathering place in the Ancient Saint Empire.

Black Line City.

The one who ruled the city was the Black Line Tribe. It was a large tribe.

Their Commander, Lord Black Line, was an Ancient Serpent-level expert.

To be honest, Kaku's knowledge of this plane was too limited. There were many things that he knew nothing about. If Levi wanted to explore this plane, he had to come into contact with the higher-ups of the Ancient Saint Empire. Only then could he obtain more plane knowledge.

"Kaku, don't tell anyone that I'm an Ancient Saint. I don't want to attract attention on this mission." Levi retracted his Ancient Saint Aura and looked at the black city in the distance.

He did not know much about the situation in the alternate plane, so he definitely could not be too ostentatious.

"Understood, Lord." Kaku nodded.

The master and servant quickly headed toward Black Line City..
