

Wizard 761

Chapter 761: Suppressing Ancient Saint with One Hand! (1)

Black Line City, in Levi's Mansion, on this day, Levi received the meat of the Phosphor Beast and Rift Sky Insect sent by Monka.

He used the Rowling Crystal to test them.

[Ancient Rock Lizard Bloodline 57%... Gloomy Lamp Dragon Bloodline 1.3%.]

[Giant Dragonfly Bloodline 79%... Jade Dragon Bloodline 1.6%.]

"Sure enough, just as I speculated, all the ferocious beasts in this world, traced back to their origins, are descendants of the four ancient kings. The two dragons that can be basically confirmed now are the Gloomy Lamp Dragon and the Jade Dragon."

As for the other two dragons? Levi still needed to collect more Ancient Saint Techniques and ferocious beasts to find out.

In an instant, Levi felt a sudden clarity.

As for the traces of the ancient wizard who entered this place, he learned from Monka that a few years ago, it seemed that ancient ruins had emerged in the Intis Mountains.

After that, many Ancient Saint-level experts from the three major empires entered to explore.

Some died in it, and some found some miraculous items from the relics.

For example, a magic ring that could hold many things.

At that time, in order to compete for this so-called magic ring, the Ancient Saints fought fiercely, and the blood flowed like a river.

For these primitive crawlers, who wouldn't want a space to carry ferocious beast meat and other items?

Actually, there were many other miraculous items that came out of ancient ruins.

However, other miraculous items seemed to be unusable and incomprehensible to the Ancient Saints, and the only one they could use was this magic ring.

After learning about this situation, Levi had an idea.

"The crawler civilization doesn't know what a wizard is or has seen a Wizard Tool."

"In that case, I might as well use this spatial ring as a bait, let those Ancient Saints who don't have a ring kill each other, and then intervene when they are almost done fighting, directly suppressing them!"

"Those who obey me will offer their souls, sign a soul contract, and those who resist will all be killed."

"After the Scarlet Dragon advances, I will enslave one of the most powerful Ancient Saints with the Scarlet Contract, support them to become the lord of the Ancient Saint Empire, indirectly control the Ancient Saint Empire, and achieve unity."

"Next, I will use the Ancient Saint Empire as a stepping stone, move south to suppress the traitorous Sea Crawler Tribe, and go north to subdue the Feather Tribe in the Intis Mountains."

"From then on, the explored areas of this world will be completely under my control, becoming my own resource secret realm!"

Levi contemplated and found it feasible.

The current Ancient Saint Empire was not chaotic enough. The thirteen Ancient Saints were wary of each other and unwilling to easily take action.

Levi needed to ignite this fuse, let them fight each other, and then take advantage of the situation.

In the following days, Levi quietly cultivated in Black Line City.

The concentration of elemental power in this world was excellent, much stronger than the current earthly realm.

Levi's practice of the Meditation Art progressed much faster compared to the human realm.

He became even more determined to turn this place into his stronghold.

He knew that with the intensification of the Dark Wave Revival, more powerful races and forces would come to the Nora plane in the future.

By then, if he wanted to preserve this plane, he would need the strength of high-level primordial soul wizards.

He still had to strive.

One month later, Monka led a large army and completely conquered the White Scale Clan and Swift Tribe.

According to statistics, this battle incorporated fifteen Snake-level experts, over a hundred Lizard-level experts, and tens of thousands of ordinary Insect-level experts.

Now, Black Line City directly dominated this borderland of the empire, becoming a local powerhouse.

Monka's reputation began to spread, and some small tribes began to join.

The overall strength of Black Line City was growing day by day.

When Levi saw the statistics, he was also slightly surprised.

These Lizardmen seemed weak, but in fact, they represented a force that could not be ignored.

A Lizard-level expert was basically equivalent to a First-Circle Wizard. Of course, in terms of overall strength, they were not comparable to wizards of the same realm, but they were enough to contend.

Nowadays, in the Wizard World, even the Jostar Family would be somewhat inferior to the Black Line City in terms of First-Circle and Second-Circle combat power.

If Levi could bring all three major empires under his command in the future, the crawler civilization, despite lacking Fifth-Circle strength, would be stronger than most Fifth-Circle Wizard Organizations.

All of these would be Levi's reliance for facing the Dark Wave Revival in the future.

One day, Levi was meditating when suddenly he felt a restless feeling, preventing him from entering a state of concentration.

He opened his eyes, and looking at the hairs on his arms standing up, he sensed the danger.

"It should be the one coming."

Levi muttered to himself.

The only thing that could make Levi feel dangerous now was an existence above the Fourth Level.

In this Ancient Saint Empire, that meant an Ancient Saint.

"I thought that with the strength I showed, the Cyan Scale Ancient Saint would send his subordinates to conquer Black Line City, but unexpectedly, he actually came in person."

Thinking of this, Monka was summoned by Levi.

"Monka, I'm going out for a while. Strengthen the defense these days; the enemy is coming." Levi said.

Monka's face changed, nervously saying, "Lord, I haven't received any information about the Cyan Scale Ancient Saint mobilizing his troops."

He was shocked. Could it be that the Lord also had the precognitive ability of foreseeing the future?

"Just trust me," Levi said, then turned and left.

Monka felt a great sense of impending danger. He was completely convinced by Levi now, so he naturally followed Levi's orders.
