

Wizard 775

Chapter 775: The Witch's Family (2)

"Winnie asked her friends in Riptide City to find out," said Marlene.

"Alright then..."

"Oh right, that b*stard Tower Master might return in the future. If he didn't die in the Myriad Machine Plane..." said Marlene.

"I also heard that with the Tower Master's abilities, he shouldn't die in battle. He's basically an alchemical creature. As long as he keeps his brain, he can reassemble his body."

"I hope so."

"Teacher, if you had the chance to leave the Wizard World in the future, would you choose to leave?" asked Levi.

"To the human world?" asked Marlene.

"Yes, I know of a place with elemental power that is not inferior to the Wizard World. However, that place needs to be kept a secret. I can only bring some of my most trusted people there." Levi nodded.

He felt that the Wizard World was too dangerous. Although the Giant Tree Secret Realm was temporarily safe, it could not guarantee eternal safety.

Therefore, he wanted to bring those teachers and companions from the Gray Tower who he had a good relationship with to the human world.

"I want to wait for the Tower Master to return before we talk about this again. If we all leave this outer sea region, how will he be able to find us when he returns..." replied Marlene.

"I understand."

Levi sighed.

Tower Master Herman was Wizard Marlene's guide, and he was like a teacher to her.

Teacher Marlene probably wouldn't leave this place in a short period of time.

Levi left some second-circle meditation supplementary potions for Ms. Marlene, as well as an extra portion of the Lake Fairy Potion that he had previously refined.

It would be best if his teacher could break through to the Third-Circle in the remaining decades of her life.

If she couldn't, then Levi had done his best and would not leave behind any regrets.

If the Lake Fairy Potion was sold outside, it would definitely be snatched up by other second-circle and even intermediate wizards. Even if it was sold for 100,000 Aether Stones, there would still be people who wanted it.

Levi had previously refined four of them. He used one for himself and gave one to Ms. Marlene.

There were still two left, and Levi planned to keep them for himself or give them to some important people in the future.

The main reason was that he had already used up the Evil Spirit Dream Fairy's dust.

Otherwise, Levi could still mass-produce the potion.

Before leaving, Levi went to Manla's grave. This good friend he had known as an apprentice had also died of old age.

"Old friend, I hope that you are doing well in the Underworld."

In this chaotic era, which was filled with blood and fire, being able to die of old age was also a kind of luck.

Manla's daughter had become an official wizard and was now teaching in the Lush Forest Tower.

The little girl, Leah, whom he had left behind for his teacher, had become a wizard. However, she had not seen Levi for a long time, so she seemed a little distant.

Levi felt helpless about this.

After all, in Leah's memories, the one she was most familiar with was "Grandpa Keg" who forged iron and bragged while drinking beer in the blacksmith shop.

Leah's mother, the lady boss of the tavern, was already an old granny. Although her hair was white, she was still full of energy. However, Levi could tell from her ashen eyes that she was surrounded by a death aura and was not far from her death.

Levi gave her some ordinary potions that could strengthen her constitution and slightly prolong her life.

Finally, Levi saw Jorman, whom he had not seen for a long time. This good brother who had helped him get through the difficulties in the early days, its life seemed to be coming to an end as well.

Jorman's bloodline was relatively thin, so it would be difficult for it to advance to a third-circle transcendent creature in its lifetime.

From the first Tower Master until now, it was already 500 years old. It was also an old snake and its time was almost up.

"Old friend, come with me. I'll see if I can help you take another step in the future." Levi stroked Jorman's head.

Jorman shook its head.

Levi understood what it meant. It wanted to stay by Granny Marlene and Winnie's side.

"Alright, take care. Live a few more years. When I've developed the bloodline potion for the mixed-blood dragon race, I won't let you die so easily."

Everything in the mortal world could not escape from birth, aging, illness, and death. In fact, it was good to let nature take its course.

However, Levi was unwilling. He wanted to live forever, but he did not want to live forever alone. As far as he could, he also wanted those who had helped him to live as long as possible... After all, they were one of the few beautiful memories on his boring cultivation path.

After settling his worries, Levi left the Giant Tree Secret Realm.

The things he was going to look for next were basically all in the inner sea region, or even in the Star Sea.

Therefore, he might not return for a long time.

Levi secretly went to Area 9. The situation there was no different from when he left.

The Black-Eyed Crow, Modi, occupied his own Black Fire Island and controlled Area 9.

The eighth on the Dark List was a senior fourth-circle wizard. He had mastered at least two third-circle and two fourth-circle innate spells.

His strength was not something that Ancient Saints who could not even fly could compare to.

Therefore, Levi did not have any thoughts of revenge yet.

It was just a loss of an island.

Levi immediately set off for Area 5 of the inner sea region.

Three months later.

Levi visited several wizard markets.

However, he discovered that not only the Black Pearl Market, but the other markets had also become the property of the Thunder Dragon Family.

The medicinal herbs and materials he needed were not sold in the market.

The Thunder Dragon Family monopolized all the raw materials for the meditation supplementary potion and the realm breakthrough potion.

Then, they would let the family's pharmacists make potions and sell them at a high price in the wizard market.
