

Wizard 778

Chapter 778: Flower Knight (1)

"Ms. Celia, is your organization really not recruiting male wizards?"

Levi looked at the sleeping dragon in front of him, unable to take his eyes off it.

He did not expect that he would actually be able to see the real Dragon Clan so quickly.

It wasn't a hybrid, nor was it a sub-dragon. It was a true pure-blooded Dragon Clan!

"Uh, Sir Levi, this is the rule set by the [First Witch]. No one can change it," replied Celia.

"Alright then. I was just joking. Don't take it seriously." Levi smiled and commented, "I didn't expect that your Witch's Family would actually have a giant dragon. I've learned something."

"Actually, the six towers of the Star Sea all have their own [Guardians]. These [Guardians] and the six towers have a symbiotic relationship. Sir Levi, you're probably new here and don't know much about the situation in the Star Sea. You'll know more in the future." Celia smiled.

Then, she looked at the sleeping dragon and said, "This is Lady Idrasala, the guardian of the Witch's Family. She's a growing Immortal Banyan Dragon. 3,000 years ago, she signed a guardian contract with the Witch of that time. We provide her with a salary, and she would guard the Witch's Family and protect us." Celia said proudly.

It was indeed something to be proud of for the organization to have a pure-blooded dragon.

"Legend has it that the Immortal Banyan Dragon is staying on the World Tree... Could this tree be the World Tree?" Levi asked.

"You can say so. This is the [Original Root] of the [Pandora's mother tree] that our [First Witch] borrowed from Sir Sauron. Later, the First Witch and other masters of the Ocean Faction came to the Endless Sea and planted this root here using a secret technique."

"Tens of millions of years have passed, and the roots have grown into a towering tree. We call it the Magic Tree. The Magic Tree can only grow one centimeter a year, one meter a hundred years. From the height of this Magic Tree, you can see the changes in the growth rings of time."

Levi looked at the Magic Tree and estimated that it was about 3,000 meters tall. In other words, it had been 300,000 years since the end of the Antiquity Age!

"Wow, the Emerald Kingdom has disappeared in a thousand years. According to the estimation of a kingdom in a thousand years, during the growth of this Magic Tree, there may have been 300 Emerald Kingdoms in the human world."

What was the meaning of the vicissitudes of life? This was it!

"If it was my previous life, I would have developed advanced technology long ago. However, this transcendent world can only repeat the cycle without any improvement... At the very least, the wizard civilization has made great progress in the past 300,000 years. Compared to the ancient era, which has a longer period, it has developed faster." Levi sighed inwardly.

"Follow me, Sir Levi. I'll bring you to report for duty," said Celia.

"Thank you."

Levi no longer looked at the dragon.

Although it was only a sub-adult Immortal Banyan Dragon, its strength should be at the level of a high-level primordial soul wizard.

In front of this dragon, Levi was extremely insignificant.

Not long after, Levi followed Celia to the root of the Magic Tree.

Around the Magic Tree, there were wizard towers of various shapes surrounding it, like stars surrounding the moon.

According to Celia, these wizard towers belonged to high-level primordial soul wizards.

They spent most of their time cultivating in the tower, living in seclusion, and rarely appearing in public. However, in recent years, a portion of them had gone out to fight with the dark wizards. Now, only a few stayed behind to guard the headquarters of the Witch's Family.

"What dense elemental power."

Levi could not help but sigh.

"Of course. The Pandora's mother tree itself is a divine tree. It can absorb the waste energy released by wizards and some transcendent creatures during their cultivation and transform it into pure elemental power for cultivation." Celia was proud of it.

"The disparity of the world..."

Levi felt bitter.

If the density of the elemental power in the outer sea region was one standard unit, then the elemental power in the inner sea region was 2, and the Star Sea was 3.

In the Witch's Family, it was above 5. If some high-level elemental convergence arrays were added, the difference would be even higher.

'In the future, I'll plant the roots of the entire Pandora's mother tree in the plane where the Ancient Saint Empire is located... I want to plant trees too! In fact, when I build a wizard tower, I might as well use this kind of divine tree as the main body to build a wizard tower.'

Levi suddenly thought of a bold idea.

Of course, without the roots of Pandora's mother tree, it was all nonsense.

Potion Hut.

This was the place where the pharmacists of the Witch's Family were in charge.

A temporary pharmacist like Levi was also managed by the Potion Hut.

The interior of the house looked similar to the mortal world. It was very warm and simple, and there was even a fireplace.

On the table, there were a few books that were casually placed. Levi glanced at them.

"Introduction to Advanced Potioneering", "Ancient Potionology", "Hundred Herbs Comprehensive Mirror" et cetera.

It was said that some wizards preferred to read books on paper, and Levi guessed that the owner of the Witch's Hut was the same.

However, even though they were paper books, they were still protected, so Levi could not casually check them.

"Madam Triss, I brought a newcomer," said Celia.

"Wait a while." An elegant and magnetic female voice came from the attic.

"Alright, Madam. Sir Levi, let's take a walk outside. I'll take this opportunity to tell you some things to take note of," said Celia.
