

Wizard 780

Chapter 780: Flower Knight (3)

"The Flower Witch came from the Witch's Family. She's currently a high-ranking member of the Witch's Family. The Sword Flower Tower is an organization she founded on her own outside. She can be considered a member of the Witch's Family."

"I see. Your Excellency Celia, if there's nothing else, I'll take my leave first. This is the list of potion materials I need. Please help me collect them from the Witch's Family. I'll buy them at market price," said Levi.

"Okay, if you don't have enough money, you can deduct it from your remuneration." Celia looked at the list of materials that Levi needed. They were all materials for refining the third-circle meditation supplementary potion, and they were all very expensive.

It would be very difficult for a nomadic wizard like Levi to gather enough money.

After all, she was also a third-circle wizard. She had been in the Witch's Family for so long, but she could not completely use the meditation supplementary potion. It was not bad to use a few in a year.

"Thank you."

"Goodbye, Sir Levi. Welcome to the Witch's Family again." The little witch said sweetly.

"Goodbye, Kelly."

Levi waved his hand and left.

He had taken ten sets of potion materials from the Witch's Family. He had to complete the refining job within half a month and hand them over in full on time.

"I can increase my proficiency in making potions again. I even got a potion formula for free."

Similarly, the formulas were all signed with confidentiality agreements. They could only be consumed by themselves and could not be used for any profit-making activities.

Levi's current pharmaceutical skills were already at level 11. Perhaps he could even raise them to level 12 here, which was the standard of a third-circle senior pharmacist.

He rented a place in the Nether Capital and planned to stay in the Wizard World for a while to collect more resources and knowledge unique to this place and bring them back to the human world.

A month passed quickly.

Apart from refining potions, Levi was also in the Nether Capital collecting a large number of low-level spellbooks in preparation for fusing with third-circle innate spells.

He had also received a few third-circle spells, but not many. This was because spells, potions, and arrays knowledge above the intermediate rank were basically controlled by the wizard organizations and families. It was very difficult for nomadic wizards to obtain them.

This was also the reason why Starfire Wizard Academy could rise so quickly.

The threshold of the Wizard Academy was low, and at the same time, it also gave the nomadic wizard a way to obtain resources.

In the afternoon.

In a small tavern, Levi and Rose Witch sat opposite each other, drinking wine.

"Violet is currently in seclusion, trying to break through to the third circle. Otherwise, I would have brought her along to meet you. You were very memorable to her and she often mentions you. Even our master is interested in you," said Rose Witch.

Levi said with a bitter smile, "I'm just an ordinary wizard, I barely make a living in the Wizard World. I'm homeless and don't even have an organization. I'm not worthy of being remembered by a big shot like the Flower Witch. By the way, is she also part of the Witch's Family now?"

"After Master advanced to a primordial soul wizard, she first took the initiative to participate in several battles against the primordial soul wizards and made many contributions. Later on, she was preparing to build her own Divine Tower. In order to collect some materials, she left the Wizard World and traveled to other planes. She has been gone for more than ten years. I don't know when she will return," replied Rose.

It was common for primordial soul wizards to travel across dimensions for decades or even centuries.

The lifespan of a sixth-circle primordial soul wizard was as long as 2,000 years. As far as Levi knew, the Flower Witch was currently less than 300 years old.

Moreover, after becoming an intermediate wizard, another wizard would become slower and slower in their cultivation, but she was getting faster and faster.

As a result, there were many rumors in the outside world that the Flower Witch might be the reincarnation of a Grand Wizard or even a Legendary Wizard.

Of course, the Flower Witch did not admit to this rumor.

However, Levi felt that this was highly possible.

Now that he had the proficiency panel, coupled with those elemental affinity talents and resources, his cultivation speed was basically not inferior to that of a conventional Children of the Elements.

However, it had been eighty years since he started his journey as a wizard, and he had only managed to reach the third-circle realm.

Levi estimated that it would take four to five hundred years to reach the higher levels.

Although there were differences in talent between the Children of the Elements, and there were also some other variables that would affect the speed of cultivation, the difference was not that huge.

In Levi's opinion, only those who had reincarnated and re-cultivated could soar so high.

"Sigh, when will I be able to catch up to the Flower Knight and take in... Knights!" Levi was still thinking about recruiting Flower Knight.

While he was daydreaming, Rose's voice sounded, "Sir Levi, are you still researching and collecting transcendent creatures?"

She looked at the Alice ring on Levi's finger.

"Yes."

"I wonder if Sir Levi is interested in the [Crimson Netherworld Sparrow]?"

"Crimson Netherworld Sparrow? Wasn't this transcendent creature declared extinct in the Wizard World a thousand years ago?"

The reason why Levi had heard of this kind of bird was because he had seen its information when he was collecting the Undying Bird Bloodline creatures.

"To tell you the truth, my two friends and I found a long-lost entrance to a secret realm in the Endless Sea some time ago. There is an ancient wizard relic inside, which seems to have been left behind by an Intermediate Wizard Organization."

"There was a large botanical garden inside. There were many rare potion resources in the outer area. Unfortunately, there was a large black bird in the botanical garden. My two friends and I were both third-circle wizards, and there was no lack of a third-circle veteran wizard among us."
