

Wizard 781

Chapter 781: Flower Knight (4)

"After a fierce battle, we weren't a match for that bird. We had no choice but to withdraw. We made plans again and came out to investigate. That bird was actually the [Crimson Netherworld Sparrow]."

"This transcendent creature had an extremely strong self-healing ability. Coupled with the strange array in the botanical garden in the relic, it could almost reach the point of immortality. Unless a Fourth-Circle Wizard attacked and killed it instantly with its soul destroyed, the bird would be resurrected."

"However, if we found a Fourth-Circle Wizard... I think we won't have a share of those precious medicinal herbs. I thought that you're a transcendent biologist, so perhaps you should have a solution. Therefore, I would like to ask for your help. After the matter is done, we can distribute the herbs in the botanical garden, as well as the other resources in the ancient wizard relic, according to our contributions."

"Isn't Wizard Newt also a transcendent biologist?" Levi asked instead of answering.

"If we want to get those resources, there's a high chance that we'll have to kill the Crimson Netherworld Sparrow... You also know that Newt hates these things the most. I didn't even dare to tell him about it." the Rose Witch said helplessly.

"Actually, I don't like to fight and kill transcendent creatures either. However, Lady Rose is my friend. I can consider it and give you an answer later." Levi explained.

"I understand," Rose covered her mouth and smiled.

After catching up with Levi, Rose left.

"Crimson Netherworld Sparrow... It's actually this kind of transcendent creature. I've finally found the secret medicine to cultivate the Dead Ember Breathing Technique."

The Black Flame Demonic Bird could no longer support Levi's cultivation. This caused his Death Ember Breathing Technique to stagnate at level 12, making it difficult for him to advance.

"However, there are certain risks in going to the ancient wizard relic and exploring the mythical realm, especially if you team up with others... Lady Rose is fine. From my Danger Perception, she doesn't have any ill intentions. However, it's hard to say about her friends. If I go, I have to be fully prepared. It's best if everyone signs a non-harm agreement before the exploration."

The last time Levi teamed up with someone was when he was hunting Earthly Dragon Beasts in the human world. At that time, he was backstabbed by his teammate.

Fortunately, he was powerful and successfully counterattacked.

He definitely had to go. After this village, there might not be this shop anymore.

Besides, Levi could even kill a Fourth-Circle Wizard, so he would not be defeated by a few Third-Circle Wizards. However, he had to be careful.

Three days later.

Levi replied to Lady Rose that he would participate in the exploration.

Lady Rose said that she had an array wizard friend who needed to prepare some restraining circles against the relic in advance, so she tentatively decided to explore it in a year.

Levi naturally had no objections. He also needed to prepare.

In the Nether Capital.

The cooperation between Levi and the Witch's Family went smoothly. The quality and success rate of the potions he refined were recognized by the Witch's Family.

On the other hand, Celia had also helped Levi collect all the potion materials and asked Levi to go get them.

When he arrived at the Witch's Family, the little witch quickly calculated the cost.

"Kelly has done the calculations. A total of 105,000 Aether Stones will be needed. 3,000 Aether Stones can be deducted from Sir Levi's remuneration for the next five years."

Levi took the goods and looked at them. The materials inside should be enough to make about a hundred meditation supplementary potions, enough for him to cultivate for ten years.

The higher the level of the meditation supplementary potion, the longer the effect would last.

There was no problem with the price. Levi handed over another 100,000 Aether Stones, and now he only had 250,000 Aether Stones left.

Although he was still a wealthy man among the third-circle wizards, he still felt insecure.

Even Celia was surprised. She did not expect Levi, a nomadic wizard, to be so rich.

Even the third-circle wizard of the Witch's Family, excluding those with fixed assets, most of them could not take out so many Aether Stones.

'As expected, Sir Levi is not a simple wizard. Not only is he talented as a pharmacist, but he's also rich. It's just that his looks don't suit my taste...' Celia was fantasizing.

How could she not want to find a rich, talented third-circle wizard with full of potential to travel together on the path of wizardry?

Unfortunately, she did not like ordinary wizards, and the wizards that she liked did not like her...

Therefore, even now, Celia was still alone.

"Thank you, Miss Celia." Levi put away the materials and left.

"Celia is a good person. She didn't kill me after she saw that I was rich. However, I have to be careful in the future. I can't show off my wealth."

In the blink of an eye, a year had passed.

Year 1095 of the Holy Brilliance Calendar, Month of Harvest.

This year, Levi's pharmaceutical proficiency had increased more than in the past few years combined.

Coupled with the materials that he already had, Levi had gathered 100 sets of meditation potion materials. In half a year, he had refined all of them, making a total of 86 successful sets, which was enough for him to cultivate for a long time.

He estimated that after he digested all these potion materials, coupled with the dense elemental power in the Star Sea, his spiritual force would reach 150 points.

As for the Three Arts of the Wizardry, Weapon Refinement, and Array, due to the lack of higher-level blueprints and inheritances, they were still stuck at level 5, which was the level of the second circle.

As for spells, the third-circle spell, Sun Flame Explosion, Levi had already reached the maximum limit, level 9.

"Let's go test its power."

Levi left the Nether Capital alone and found an uninhabited sea area.
