

Wizard 791

Chapter 791: Strength Breaks All Techniques! (3)

It was an emerald green mantis the size of a puppy. However, the difference was that the head of the mantis was... a human head.

It was also a beautiful head. Moreover, this beauty looked exactly the same as the Beauty Snake that Levi had killed previously!

"Death Fall."

Levi was not in a hurry to attack. He wanted to see how Lehger Leo would deal with the other party.

"Master... I'm hungry."

Leon's voice came again.

"Go hungry. I'll give you a good meal when I get out," Levi said.

Golden lightning chains appeared around Lehger Leo's body like tentacles from his golden thundercloud-shaped protective force field vortex. These lightning chains all hit the monster Levi called the Beauty Mantis.

A terrifying electric explosion resounded throughout the botanical garden. Under Lehger Leo's terrifying firepower, the Beauty Mantis died after experiencing pain for a few minutes.

A gray crystal appeared on the ground. Lehger Leo looked at it. This did not seem to be the first time he had killed a Death Fall.

He collected the crystals and Levi noticed that they were much smaller than the Beauty Snake he killed.

According to Owens, the larger the crystals produced after the death of the Death Fall monster, the stronger the monster.

Lehger Leo heaved a sigh of relief. He quietly drank a bottle of spell power recovery potion.

"This thing is an evil spirit. It's especially strange and extremely difficult to kill. If it were an ordinary third-circle transcendent creature, it wouldn't have lasted more than half a minute under my attack," Lehger Leo said with a frown.

"An evil spirit?"

Be it evil spirit or Death Fall, they were just different names for the same thing.

These monsters gave Levi a sense of déjà vu. He had never seen them before.

"A human-headed monster..."

He suddenly remembered the specimen known as the Nightmare Creatures he found at the bottom of the Yellow Earth Continent's Mirror Lake in the Dreamland Steeple branch.

There were frogs with human faces on their backs, human-faced spiders, and even strange birds with human faces on their hips. The mouths of the human faces were the excrement of the strange birds...

"Nightmare World, Ashen World... Are these two worlds related?"

Levi suppressed the doubt in his heart.

Rose and the rest were already walking forward.

Following that, they occasionally encountered some "evil spirits" on the way.

Levi had yet to make a move when these guys were killed by Lehger Leo. Although Levi did not like family disciples, he had to admit that Lehger Leo was a very reliable and powerful teammate.

Every time, he would put away the gray crystal. He did not know what it was for.

Leon kept complaining about his hunger along the way. This strange insect seemed to have entered a state of uneasiness and anxiety after entering this secret realm.

Eventually, Levi and the others stopped in a clearing.

In the fog ahead, there were tall stone pillars vaguely displayed with the trajectory patterns of some array. At the top of one of the stone pillars, a big black bird was entrenched. It seemed to have noticed Levi and the others and opened its eyes that were burning with black flames.

"The Crimson Netherworld Sparrow is indeed a transcendent creature that has been declared extinct," Levi muttered in his heart.

No matter what, he had to think of a way to capture this thing alive. A dead Crimson Netherworld Sparrow could not be provided to Levi to cultivate the breathing technique for a long time.

After legendary, the secret medicines needed to practice the breathing technique required the blood of transcendent creatures. The blood required was not just ordinary blood. It required a lot of blood to purify the bloodline essence into medicine.

Therefore, only living transcendent creatures could be used by Levi for a long time.

In fact, the ideal state was that every transcendent creature could have a partner of the opposite sex. This way, they could pair up and give birth to more descendants in Alice's ring for his personal use.

Unfortunately, it was already very difficult to find just one transcendent creature for most creatures. It was even more difficult to find a pair to breed. Even for these transcendent creatures, with their long lives, it was unknown if they could find their other half. The stronger the transcendent creature, the more difficult it was.

"Do you see that stone array? As far as I know, that's the fourth-circle array, the Undying Windfire Array. It's precisely because of this array that this damned beast is so arrogant. Later, I'll use the third-circle array that I've prepared to temporarily suppress the effect of this array."

"The three of you, especially Sir Levi, must take advantage of this opportunity and remember to kill the other party within a minute.

"My array can only last for a minute. Even if you only leave a trace of life for that beast, it will be reborn in the grand array," Lehger Leo emphasized.

"Understood. Be careful," Lady Whitewater said with concern.

"Thank you for your concern, Lady." Lehger Leo smiled.

Rose looked at Levi. Levi nodded, indicating that there was no problem.

"If you're ready, I'll begin." In Lehger Leo's pupils, golden lightning was flickering.

He chanted a complicated incantation. Golden array flags broke through the fog and rushed into the clouds. Then, a golden eight-pointed star array appeared on the ground and headed towards the stone pillar.

In an instant, the collision between the two grand arrays began.

The stone pillars trembled, and beams of black light connected between the different stone pillars.
