

## **Wizard 794**

Chapter 794: Strength Breaks All Techniques! (6)

He felt that Leon's speech and intelligence seemed to have improved... He was growing.

"Food!" Leon said.

"Forget I asked." Levi was silent.

He now suspected that Leon might have accidentally mutated after the Saint Scorpions ate something similar to these Death Falls.

Levi carefully recalled the food he had fed them.

Seconds ticked by.

Levi wasn't used to not having Owens around to nag.

Unfortunately, he did not have any silver coins left. He had to admit that the ghost behind the scenes had some ability.

As he thought about it, he gradually couldn't tell the difference.

It was sometimes true and sometimes false, and sometimes true and sometimes false.

These were not important.

The important thing was... there was nothing that couldn't be killed. Levi firmly believed in this!

Mortal knights feared the so-called "unkillable evil spirits and undead" because they were ignorant and lacked firepower.

It was the same in the Wizard World. Even wizards had areas beyond their knowledge.

The greatest horror was the unknown.

This was because he didn't know anything about that damned thing, which led to this situation. It didn't mean that the other party was very strong.

If it was really strong, whether it wanted to possess Levi, kill Levi, or had other intentions, it could directly subdue Levi.

However, it did not. It relied on the three teammates who came in with Levi to constantly torture Levi's mind and will.

"By the way, where did the fake me go?" Levi remembered the fake Levi that had disappeared after he returned.

He sent his consciousness into Alice's ring again to confirm that the Crimson Netherworld Sparrow was still there and hadn't turned into anything.

The gray crystals left behind by the Death Fall that he had killed were also there.

All of this should be true!

"Leon, bring me to your food."

Levi waited for a long time, but the existence did not come to him.

Therefore, he wanted to take the initiative to attack.

"Alright..."

The carapace on Leon's back suddenly opened, and a thin membrane-like wing grew out.

Levi followed Leon and disappeared into the empty valley.

After a long time, the fog surged over again, and the botanical garden seemed to have returned to normal.

Levi followed Leon and left the strange botanical garden.

A secret realm was not big to begin with. He did not believe that he could not find that sneaky thing in such a small place.

After that, Levi searched for a long time but could not find Rose and the rest.

He stopped looking for them. Now, it seemed that something might have happened to the three of them.

In the secret realm, Levi's perception of time seemed to have begun to weaken.

He did not know how long he had been walking.

Now, he stopped under a huge tree.

The huge tree was covered in green vines, plants, flowers, and butterflies. The patterns on the butterflies' wings seemed like a pair of big eyes.

"Fortunately, if it's not a human face, it's a normal butterfly," Levi whispered in his heart.

His Intuition sensed a corpse behind the vines.

The flames in his hand burned away the vines, revealing the decayed hollow tree hole inside.

In the tree hole, there was a rotten corpse whose original appearance could not be seen. There was a large number of caterpillars lying on it. Some of them had even formed pupas. The ones hatching from the pupas were the butterflies Levi had just seen...

After being frightened, these bugs quickly ran away and disappeared in an instant.

Levi looked at the robe that was still in good condition. There was a golden lightning pattern on it...

"Lehger Leo?"

Levi did not come to a conclusion.

He spat out a golden snake tongue to collect his aura.

Although the smell of decay was potent and mixed with countless auras, Levi sensed that the aura of this corpse might not belong to Lehger Leo.

"Earlier, a disciple of the Letney Family entered this place and died in this tree hole."

According to Levi's understanding of the decaying speed of a wizard's corpse, this disciple might have only died a few years ago.

"The first person to discover this secret realm was Lehger Leo. Could this be a companion who entered with him and died here?"

Lehger Leo had not mentioned this situation before. It was just Levi's guess.

Levi was on guard as he searched the body.

Unexpectedly, the corpse's storage ring was still there.

Levi broke the restriction on it and opened it. He realized that there were still some pleasant surprises inside.

50,000 Aether Stones, some low-level spell books, and three spell crystal balls.

The crystal ball was filled with third-circle spells.

Thunder Snake Technique, Thunderstorm Force Field, Lightning Chain.

"The Thunder Snake Spell is the advanced spell of the Thunderbird that I need. It saved me a lot of money. The other two are not bad either. That force field should be the one used by Lehger Leo."

Levi put these away.

He also found a scarlet metal the size of a human head in the corner of his storage bags.

"This is actually Heavenly Fire Meteorite Iron, an elemental metal of a higher grade than luminant gold!"

Even with Levi's state of mind, he was excited.

Such a piece of Heavenly Fire Meteorite Iron was worth more than the luminant gold Levi used to forge Tyrant II.

This was because this Meteorite Iron could be used to forge Fourth-Circle, Fifth-Circle Wizard Tools, and even Soul Artifacts.

Even if Levi did not obtain the Crimson Netherworld Sparrow, this trip to the secret realm was worth it.
