

Wizard 802

Chapter 802: Divine Weapon Family, Panel Interface Changes! (1)

At Levi's heart, the Crimson Dragon Slash greedily absorbed the bloodline power from the Crimson Emperor Dragon Seed.

At this moment, Levi could feel that the Crimson Dragon Slash seemed to have a life of its own.

"As a knight, I should indeed have a weapon of my own. When I go back, I have to talk to the Blood Knights and the others about the path of a Blood Source Divine Weapon so that they can increase their cultivation motivation and step into the Blood Source realm as soon as possible to start the path of a Divine Weapon.

If one day, he accidentally dies, the divine weapon can also be a knight's relic and become an ancestral treasure of his descendants. It can be passed down from generation to generation."

From Levi's years of research, there was a very important problem with the continuation of the knight family.

As time passed and generations passed, the bloodline primer in their descendants became thinner and thinner.

Even for some legendary families, it was very difficult for their descendants to produce legends, especially before the Dark Wave Revival. The human world was in the Doomsday Era, and it was very difficult to find high-level breathing technique secret medicine. As a result, ordinary beasts like the Earthly Dragon Beasts had become scarce.

This caused the overall strength of the knights to decrease continuously. This made things worse for the knights who already had a low upper limit.

In the past, in order to prevent the noble bloodline of these knight families from being thinned out, many of them used the method of marriage by close relatives. However, this could not solve these problems at all. The marriage of close relatives would bring more problems.

However, with the Bloodline Divine Weapon, this situation might improve.

After a long period of nourishment and refinement, the divine weapon had already contained a large amount of bloodline power. If there was a suitable technique, this bloodline power should be used to strengthen the bloodline power in the bodies of the descendants of the bloodline.

In fact, if he could develop some knight family techniques in the future, he might be able to use his bloodline and divine weapons as the foundation to connect the divine weapons of the knight family with their descendants and form a sustainable ecosystem of knights.

The knights at the top of the pyramid used their divine weapons to radiate the divine weapons of their descendants. The stronger the cultivation of their descendants, the stronger they would be.

In this way, it was similar to the Divine Tower of a high-level primordial soul wizard.

"Wonderful."

Levi felt more and more that if this idea was successful, it might be able to fundamentally improve the situation of the weak knights.

This was only a preliminary idea. If he wanted to develop it, many problems needed to be solved. It was not something Levi could complete with his current realm. Perhaps he still needed a lot of wizard knowledge.

Levi kept the Crimson Dragon Slash back into the Bloodline Seed to nurture it.

"I wonder who will be the first soul to die under my Crimson Dragon Slash Sword." Levi was in a good mood.

He opened the proficiency panel. When the Crimson Dragon Slash was successfully refined, there seemed to be some changes in the panel interface.

Levi—

Crimson Emperor Dragon Breathing Technique: Level 13 (189,032/500,000). Special Effect: Fire Dragon's true form (Level 1); Exclusive Weapon: Crimson Dragon Slash (Level 1: 1/1,000).

[Crimson Dragon Slash: An exclusive weapon used to carry the Crimson Emperor Dragon's strength and will. It can increase the attack power of the owner of the Crimson Emperor Dragon's bloodline. You can gradually increase the power of your exclusive weapon through bloodline nourishment and battle coordination. You can increase the upper limit of the exclusive weapon's quality by adding higher-level materials through Forging.]

"I see."

Levi looked at the proficiency panel thoughtfully.

"Divine Weapons also have their growth path. Through bloodlines and battles, they can increase the power of Divine Weapons, but this increase is not unlimited.

"If I want to break through the upper limit of the divine weapon, I need to break through the limit just like the breathing technique. The way to break through the limit of the divine weapon is to add higher-level materials and reforge it!"

Levi put away the panel and exhaled a hot breath.

The growth of a Divine Weapon was not something that could be accomplished in a day. It also required a lot of effort and could not be rushed.

As long as it was nurtured in his body at all times, within the growth limit, the Divine Weapon could grow on its own and gradually increase its power. Levi did not have to worry about it.

If it was complemented by suitable battle coordination, it could speed up this process.

Furthermore, other than the Crimson Emperor Dragon, the other breathing techniques would have their unique divine weapons.

However, other divine weapons that were exclusive to breathing techniques might not necessarily be swords.

That was because different breathing techniques had different characteristics. If the characteristics of the weapon and the attributes of the breathing technique were not compatible, it would not work.

The Crimson Emperor Dragon mainly focused on strength and killing. Therefore, it used the sword as a divine weapon to increase the user's attack power.

The Golden Snake focused on defense. If Levi forged a sword, he would not be able to use the power of the Golden Snake.

"A divine weapon suitable for a Golden Snake should be a shield or armor."

Levi was enlightened.

The next day, Levi opened the proficiency panel and found that the proficiency level of the Crimson Dragon Slash had increased from 1 point yesterday to 2 points.

"If we let nature take its course, does one day mean one point? It should take about three years to advance to level 2. It's alright, but it takes more than ten years to advance from level 2 to level 3. From then on, every advancement of the divine weapon would take decades...

"Therefore, just relying on natural nourishment shouldn't be enough. I still have to increase the cultivation speed in other aspects. In the future, I have to try the path of battle coordination."

Levi pondered.
