

Wizard 805

Chapter 805: Divine Weapon Family, Panel Interface Changes! (4)

That was why Levi was so surprised.

"The Water Dragon's Song was accidentally obtained by the primordial soul wizard of the wizard family when he was traveling in the Multidimensional Plane. It should be very beneficial to the cultivation of the Ocean Faction." Celia's eyes were filled with envy. She was also from the Ocean Faction. With this thing, even she could break through to the fourth-circle. At that time, her status in the Witch's Family would increase greatly and she would be directly in the upper-middle class.

"I see." Levi shook her head. After chanting an incantation, he arrived at the Witch's Family's base camp.

He estimated that in the following period of time, there would be many armies from Nether Capital and Star Sea searching for the Truth Oddity.

Even Levi would be lying if he said that he wasn't tempted. However, he knew that this Truth Mysterious Treasure was a hot potato. He didn't want to be sucked into the whirlpool.

"With my current talent and the breakthrough potion, the probability of successfully breaking through to the fourth-circle should be more than 60%. Moreover, I still have the Divine Ring Tower to assist in the spiritual force liquefaction. The success rate is almost 70%. I don't have to force the Truth Oddity..."

On the demonic tree, the Immortal Banyan Dragon, Lady Idrasala, was still sleeping.

This was the daily life of pure-blooded dragons. They were born with 100% dragon blood purity. As long as they grew up step by step and did not die prematurely, they could grow from a young dragon to a strong dragon comparable to a Ninth-Circle Wizard.

Of course, the price to pay was that it was very difficult for pure-blooded Dragon Clans to give birth. There were very few of them. Most of the people who remained in the world were mixed-blood dragon clans.

The Magic Potion Cabin.

Madam Triss was drinking tea and had a charming temperament. Her slender and fair legs protruded from the sleeping robe and rested on the other jade leg. Under the wide sleeping robe, she looked extremely beautiful.

Looking at the charming Madam Triss, it was hard to imagine that she was an old witch who was hundreds of years old.

"Levi, our cooperation can be considered perfect, but our friendship won't end because of this.

"I'm very satisfied with the quality of the potions you made. A pharmacist genius like you shouldn't be buried by those old rules.

"Therefore, I specially applied to the Witch Lord to arrange an assessment for you. If you can pass, you can become an external wizard of the Witch's Family.

"Although the external wizard is not part of the Witch's Family, there are still some benefits that you can enjoy. Of course, in terms of publicity, you are still not a member of the Witch's Family. If you cause trouble outside in the future, we will not acknowledge your identity..."

"What do you think?"

Madam Triss asked with a smile, confident and unhurried.

Joining the Witch's Family was probably an irresistible temptation to any male wizard in the Endless Sea.

After all, this was one of the six towers that represented the highest level of the Endless Sea. It was one of the six permanent council members of the Star Tower, and it was the "six giants" mentioned by countless Endless Sea wizards.

What's more, all of them were beautiful and powerful witches... It was simply a man's paradise.

She believed that Levi would not refuse.

"Thank you, Madam Triss. I want to ask, what do I need to do for the wizard tower to become an external wizard of the Witch's Family? There's no such thing as a free lunch in this world. I know this," Levi asked.

Recent realities had made Levi realize that it was best to find a backer before he rose.

Whether it was the inheritance of knowledge or resources, he could not do without the support of an ancient and powerful organization.

Take the potion ingredients for example. Even if Levi had a small plane in the Ancient Saint Empire, the exploration of the plane would take a long time. Moreover, different planes had their own unique resources. Many of the potion formulas of the Wizard World were based on the unique ingredients of the Wizard World. It was a long process to find substitute ingredients.

This was also the reason why Levi had yet to develop the Purification Elixir that he had been longing for. There was no Saint Fruit in the Wizard World at all, not since ancient times! That thing should be a specialty of the Othar Dimension.

He had spent decades just to find a substitute ingredient for the Saint Fruit, but he had yet to succeed.

"You will join as an external pharmacist. Therefore, your mission in the Witch's Family is to study and refine potions. I won't let you participate in dangerous combat missions, although I know your strength is not bad... Moreover, in most cases, external pharmacists don't need to be stationed in the base camp for a long time. They only need to complete missions regularly. Between you and us, it's a more intimate cooperation and win-win relationship." Madam Triss said with a smile.

"May I ask when the assessment will begin so that I can make some preparations?" Levi asked. He had been convinced.

If the terms of the final contract were like this, it would not be bad. It would not delay his matters and he could even exchange resources from the organization.

"Our Witch's Family values the independent research and innovation ability of pharmacists more. If you have an original potion formula, you can hand it to me. I will judge it and give you bonus points. The official assessment will be held three days later," said Madam Triss.

"Madam, I have an original potion called the Water of Eve. It can be used to eliminate the side effects of the Transformation Spell." Levi took out a potion and handed it to Triss.
