

## **Wizard 813**

Chapter 813: Crimson Dragon Slays the Heavens! (6)

During the trip, Levi did an inventory of the spoils of war and gained a lot.

There were a total of 700,000 Aether Stones. There were more than 400,000 in the Blood Flame Demon Wizard's storage bags alone.

No matter what, it was an organization of Fourth-Circle Wizards. They still had this bit of wealth.

In addition, there were three third-circle Wizard Tools, nine Second-Circle Wizard Tools, and 29 First-Circle Wizard Tools.

As for low-level spell books, they were already in Levi's spell library, so they were not worth mentioning.

The Blood Flame Demon Wizard also contributed two fourth-circle spell models, Blood Demon Flame Palm and Blood Fire Entanglement.

However, both spells required the cultivation of a special "Blood Flame Meditation Art".

Judging from the Blood Flame Demon Wizard's inheritance, he seemed to be a high-level member of a fifth-circle dark wizard organization in the Realm of Crimson, the Blood Fire Demon Tower.

However, to avoid his enemies, he ran to the Endless Sea and tangled with some local wizards from the Burning Faction. Taking advantage of the war, he started his old profession in the Endless Sea.

The Blood Fire Demon Tower was located in the Realm of Crimson, which was the Burning Faction's territory. It was thousands of miles away from here, so Levi wasn't too worried.

Half a month later, Levi arrived safely at the magma sea.

"Let's see if the Fire Elemental Spirit is nearby."

Levi released his Perception, accompanied by the hint of Danger Perception and the faint powerful aura coming from the depths of the magma.

Levi knew that the guy was still there.

After making a decision, Levi sighed and said, "Forget it, let's wait."

Just like that, Levi began to wait in the sea near the magma sea. While waiting, he did not delay his cultivation.

He lacked everything but patience.

On this day, Levi came out of his cultivation state with excitement in his eyes.

It was not because the Fire Elemental Spirit had left... but because while he was waiting, his Scarlet Dragon Breathing Technique had broken through.

Levi—

Scarlet Dragon Breathing Technique: Level 14 (1/600,000). Special Effects: Scarlet Poison Body (level 2), Scarlet Contract (2/3), Thousand Faces, Boiling Blood, Scarlet Escape.

"The Scarlet Poison Body has advanced to level 2. Its speed, poison, and life-saving abilities have increased again. The contract slot of the Scarlet Contract has also increased by one.

"With my current level as a Scarlet Dragon and the speed of the Chariot runes, my speed in my normal state should not be inferior to a Fourth-Circle Wizard. If I use Scarlet Escape, even a Fifth-Circle Wizard might not be able to catch up to me at three times my speed.

"It's about time. Let's go and see if that fellow is still around."

With the enhancement of the Hermit Rune, Levi approached the sub-dimensional portal node. After Perception, he sensed that the level 5 Fire Elemental Spirit should have left.

"I can't be careless. This guy's intelligence is very high. He might be hiding and preparing to ambush me."

Levi no longer hesitated. He used the Hermit Rune to hide his figure and arrived at the entrance of the sub-dimensional portal node. Golden scales covered his body and the Heavy Water Barrier surrounded him. He stepped into the sub-dimensional portal node decisively.

At this moment, Danger Perception started to call the police.

Levi's expression changed as soon as he used Perception.

In the distance, a huge fiery red bird was rushing over at an astonishing speed. The magma around it was stirred up.

"Ambush me, right? When I advance, I'll deal with you sooner or later!"

The moment the subspace power tore open Levi's protective force field, he had already disappeared into the subspace channel.

The huge bird made of flames looked at Levi, who had disappeared into the spatial passage, as if it was thinking and hesitating.

In the end, it made up its mind and took that step.

It turned into a flaming tornado and entered the subspace tunnel.

On the other side, Levi, who had just come out of the volcano, had not relaxed for a moment when Danger Perception sounded the alarm again.

Without hesitation, he used Scarlet Escape and burned the Scarlet Power and the blood in his body. He used all his strength and turned into a blood light that disappeared into the horizon in the blink of an eye.

Not long after Levi left, the silent volcano erupted again. Endless lava rushed into the sky.

Amidst the lava rain, a flaming bird with wings that almost covered the volcanic crater crawled out. It looked at this new world curiously. Its eyes flashed as it chased after Levi.

After traveling hundreds of kilometers in one breath, Levi directly burrowed into the bottom of the sea and hid in the abyss. The concealment array and runes took effect at the same time.

He did not even dare to breathe loudly. This level 5 Fire Elemental Spirit's perception was also very strong. It could be said to be the strongest enemy Levi had encountered so far!

Not long after, in the sky above his head, a flaming divine bird that dyed the sky red and turned the white clouds into burning clouds let out a long cry and flew forward.

Even at a height of thousands of meters, the surface of the sea was boiling and evaporating under this high temperature.

Wherever the giant bird passed, white steam pillars shot into the sky.

After the giant bird left, Levi's expression was solemn when he confirmed that it was safe.

This guy was just passing by, but the energy fluctuations naturally emitted from his body were as high as 8 Cas, which was equivalent to a second-ring spell.

Levi was at the bottom of the sea. It was high in the sky. There was a long distance between them.

This level 5 Fire Elemental Spirit was stronger than he had imagined. Even ordinary Fifth-Circle Wizards were probably not its match...

And the direction in which he saw the giant bird heading was... the Seven Kingdoms Continent.

"Things will change."
