

Wizard 82

Chapter 82: The Power of the Seal of Protection!

The Fist of the Empire!

Even Levi had heard of this person.

The reason was that he was too famous, almost like a White Horse Knight.

No, he was more famous than the White Horse Knight.

This was because he had become a symbol and guardian of the Tuva Empire and the Holy City.

Although he was not a legendary knight, he was more powerful than them.

Such a person was only a step away from becoming a Legend.

Therefore, for someone like him, killing the Earthly Dragon Beasts with his bare hands was not a problem.

Levi also wanted to meet the true experts other than his father.

He asked the staff again but was told that there was no such thing as a Turbellarian Egg. This kind of secret medicine material was too unpopular. It was likely that only the Vortex Beast Breathing Technique needed it.

As for the Core of the Undead and Evil Spirit Dust, the staff had never heard of them before.

This was normal. These were all casting materials, so it was within Levi's expectations that he could not buy them.

As for the breathing technique, it was the same as the Jade Chamber of Commerce. They didn't sell it.

Levi could tell that no matter which country he was in, breathing techniques were not allowed to be sold on the surface. He could probably only buy them from the black market.

Levi asked the Wild Dog Knight to pay 500 Tuva coins to buy the ambergris.

He had exchanged it with gold coins in the black market before he came.

This time, Levi did not bring much money with him. He planned to find a place to live in seclusion in the Holy City for a while, thinking of ways to earn money while buying ambergris for cultivation.

He would not return to the territory for the time being. In any case, ordinary enemies would not pose any threat to the territory.

To Levi, the territory was just a money-making tool. Now that he was a craftsman, he was less dependent on the territory.

Besides the Duke of Montenegro, Levi did not have any enemies. If a top-notch Grand Knight like the Duke of Montenegro went to find trouble with him, he might be in danger even in his territory.

With the help of the Wild Dog Knight, he successfully found a place in the middle urban area to stay.

A month's rent in this area was enough for the civilians in the outer city to rent for a year.

Soon after, he collected the other ingredients for the Black Snake Secret Medicine and concocted it. Then, he immediately began to cultivate the breathing technique.

Time was power, and Levi did not want to waste a single second.

Levi also asked the Wild Dog Knight to help him find a small blacksmith shop for rent in the outer city and the Knight managed to find one that cost 1 Tuva per month.

This way, it would be more convenient for him to earn some money while cultivating. He only had 1,000 Tuva coins left. Although he was definitely considered rich in the Holy City, it was only enough for Levi to buy ten bottles of ambergris.

His plan this time was to bring back dozens of bottles. It was definitely not possible for him not to make money.

These days, it was very lively outside because of the preparations for the grand ceremony. There was a feeling of celebration.

However, Levi did not care at all. He did not step out of the door and quietly cultivated in his residence.

Five days later, the Raging Bull Breathing Technique broke through to level 4.

Just as Levi had expected, the level 4 Raging Bull Breathing Technique was already the limit.

Levi—

[Bull Breathing Technique: Level 4 (Maximum). Special Effect: Beginner strength.]

Levi felt that his strength had increased slightly.

He couldn't help but shake his head. "What a trashy cultivation technique. I'd better look forward to the Giant Rhinoceros Breathing Technique. After all, that technique should be able to break through to level 5."

Fifteen days later, the Giant Rhinoceros Breathing Technique reached level 4.

As expected, level 4 was not the Giant Rhinoceros Breathing Technique's limit.

Levi—

[Giant Rhinoceros Breathing Technique: Level 4 (1/20000). Special Effect:

Beginner strength.]

"I should be able to cultivate it to level 5. At that time, I'll strengthen the giant bear and the barbaric bull for the Giant Rhinoceros to prepare for the breakthrough." Levi was in a good mood.

Apart from the limits of these two breathing techniques, Levi's Black Snake Breathing Technique, with the help of the newly obtained Black Snake Secret Medicine, had once again experienced a huge increase in proficiency.

As long as the Black Snake Secret Medicine was kept up, he should be able to reach level 6 by the end of this year or the beginning of next year and advance to a high-level knight.

His Black Snake aura had already covered his chest.

In this way, his chest would have a fifth layer of defense other than the cloth armor, scale armor, chain mail, and heart armor! The five layers of armor? Who could break his defense?

Levi was satisfied.

In the past few days, he had also allowed the Wild Dog Knight to collect the materials needed to cast the Seal of Protection in the Holy City. Now it was time to experiment.

Levi quickly formed a hand seal and threw out a shimmering casting material. Bang!

Levi felt a mysterious power pouring into his head and then spreading out through his entire body. At the same time, the released material, which was mainly composed of Pyroxene, shone brightly!

The powder began to envelop Levi's surroundings. Faint white light formed lines from dots, and lines formed surfaces. It quickly formed a bell-like shield around Levi's body.

Levi reached out to touch the shield and found that he could reach out. "Hmm? It can't be that it's ineffective, right?"

At the same time, Levi had prepared a mechanism in advance, one that was capable of throwing a rock at him. Levi was also prepared inside the shield. If the shield did not work, he would instantly break the rock.

Bang!

The rock hit the shield. The impact shook it, but the shield didn't break.

"It succeeded?"

Levi looked at the rock that had fallen to the ground and cracked under the shield.

"This defense is not bad. I just don't know if it can withstand the attack of an official knight. However, it's already very good to have such an effect even though I've just entered level 1."

"After all, I mainly want to use this shield to resist the evil spirit's strange attacks. To resist physical attacks, I can mainly rely on the black gas and armor."

"Very good. Now that I have stacked six layers of armor, who can instantly kill me?!" Levi was satisfied and felt a sense of security.

Five seconds later, the shield automatically dissipated.

On Levi's Stats Window, the Seal of Protection appeared.

Levi---

[Seal of Protection: Level 1 (1/1000)]

According to the manual, the duration and defensive power of the shield would increase with the cultivation of the cultivator. Of course, it was also related to the density of the bloodline.

In general, the Seal of Protection was divided into three layers.

The first layer was Pure White Protection.

The second layer was Bright Silver Protection.

The third layer was the Golden Protection.

Levi's white protective barrier was only at its weakest level.

If one reached the Golden Protection realm, they would be physically invulnerable and magically invulnerable to evil spirits! Winchester's ancestor had once reached this level.

This was also Levi's goal.

As the materials he brought to the Tuva Empire were limited, Levi did not waste the proficiency of the Pyroxene Seal of Protection.

The casting materials he had on him now should be enough to cast Seal of Protection ten times and Seal of Flame twenty times. It was enough to be his trump card.

Levi believed that even in the Tuva Empire's Holy City, where experts were as common as clouds, there should be only a handful of people who could make him use the seal.

Moreover, he would not take the initiative to cause trouble. After all, this was the Holy City. Although he was strong, the city was guarded by the Fist of the Empire. He could not afford to cause trouble.

"I'm almost done cultivating. I should go and forge some weapons and sell them in the Shining Tavern." After Levi finished stretching his muscles and bones, he quietly left the house.

In a place as big as the Holy City, there was naturally a branch of the Shining Tavern.

Levi had previously become a noble member of the Shining Tavern through the identity of the Golden Warhammer, so he knew the location of the Shining Tavern in the Holy City.

Not long after, Levi arrived at the outer urban area and found a group of people gathered in front of his blacksmith shop.

"Hmm? Who are you? Where did Old Hank go? He should pay the protection fee." The leader of the crowd, who had a scar on his face, narrowed his eyes and said impatiently..
