

Wizard 833

Chapter 833: Legend of the Crimson Dragon Emperor, Praise the Emperor! (1)

The other knights were dumbfounded as they listened to Levi and Emperor Mu's conversation.

"Commander, is this Thunder Dragon Family very powerful? Why don't we meet this family another day?" The Black Knight was just like the Musk Bull represented by his breathing technique. He was a little reckless. If he could fight, he would definitely not force him.

"We're just a newly established knight organization. The Thunder Dragon Family is an old wizard family in the Wizard World. They have a Fifth-Circle Wizard guarding them... Even I don't want to make an enemy out of them easily," Levi said.

In reality, he was still a younger brother in front of the Thunder Dragon Family.

After all, the Thunder Dragon Family was from the Lightning School of Thought. The Lightning School of Thought was famous for killing.

Perhaps because of the Lightning Meditation Art, the wizards of the Lightning School of Thought were generally a little irritable and unyielding.

In comparison, most of the wizards Levi had interacted with were from the Ocean Faction.

Of course, this was only his metaphysical Perception. There was no scientific explanation.

"Then, Emperor Mu, you can stay in the Realm of Ice... As for the Goddess Knight, you will take the assessment for me first. When you bring her back in the future, you can consider becoming an official member... However, you can tell her how to break through the shackles of legendary first, but you have to sign the corresponding confidentiality agreement," Levi arranged.

He didn't have a spatial passageway to the Realm of Ice. Moreover, he wouldn't be able to find Emperor Mu even if he went there. He might as well let Emperor Mu train and cultivate there.

As for the Thunder Dragon Family, they could only let Emperor Mu hide for the time being.

"Alright, commander. The Goddess Knight has a good character. You will know when you see her in the future. You will like her," Emperor Mu said.

Levi felt a little strange. Why did he feel like he had become Emperor Mu's parent?

"As for the five of you, try your best to stay on Dusk Island during this period of time. The situation in the human world is getting more complex. Our foundation is still shallow, so don't get too involved," Levi said.

"Understood, we will return to Dusk Island now." The Divine Light Knight said.

"In addition, I have a cultivation technique here, Blood Qi Wings. You can come and take a look. It's best if you can remember it in your mind. If you can't, ask me for it when we meet in reality in the future.

"With your level, you should be able to cultivate this technique. The Divine Light Knight and Knight Hogg are still a little lacking. They should be able to break through the legendary shackles.

"The techniques I'm imparting to you are only limited to us official members," Levi said.

After saying that, he placed the Blood Qi Wings technique on the round table in front of him.

From the looks of it, as long as it was something that was not in the storage space carried by the members of the round table, it could be projected into the ancient castle through the round table.

Otherwise, Emperor Mu and the others would have to attend the meeting naked.

"Alright, I've already memorized it in my mind. I'll go back and give it a try," the Blood Knight said. He was a member of the Blood Clan, so he had the ability to fly. However, he didn't like being a member of the Blood Clan and rarely revealed his true form.

Other than that, the Maya Breathing Technique and the Blood Beast Breathing Technique that the Blood Knight cultivated could also fly after reaching a certain realm.

However, according to Levi's suggestion, the only Blood Knight who could break through the shackles of legendary was the Maya Breathing Technique. As for the Blood Beast, it had stopped cultivating, mainly because it was worried about being affected by the evil god, the Blood River.

After all, the Blood Knight did not have a proficiency panel that could fuse and mutate the Blood Beast Breathing Technique.

"Such an exquisite method, it is a pity that with my current blood qi, I cannot do all of this." Divine Light Knight sighed after reading it.

She also yearned to step into the Bloodthirst realm. After all, flying was a long-cherished dream of humans.

When everyone was fine, Levi stood up and said calmly.

"Meeting adjourned."

On this day, the first round table meeting of the Dusk Knights ended perfectly.

With a thought, Levi awoke at the Twilight Round Table.

There was only an empty table in front of him.

"What a magical method."

Levi sighed.

"Sir Mobius, thank you very much," Levi said.

"You're welcome. That's why I exist," Round Table said.

In a shelter in the Realm of Ice, Emperor Mu opened his eyes and walked out of his room.

Outside, there was a continuously snowing mountain, and the wind and snow were raging. A beautiful female knight was wearing thin clothes and practicing her sword skills.

"Elsa, I've contacted the commander. You'll be a trainee member of the organization. I'll take the test for you. I'll also teach you how to break through the shackles of legendary. You can make a contract and swear not to leak it. Whether you can break through the shackles of legendary and take a new step will depend on your ability," Emperor Mu said.

When Elsa heard this, her face turned slightly red with excitement. She took a deep breath and said, "I'm ready, Your Excellency Emperor Mu."

Holy Brilliance Calendar Year 1103, Month of Beginning.

The 72nd year of the Great Expedition.

The Golden Feathers King and his subordinates were still searching for the other two treasures for Levi. There were no results yet.

One day, Levi woke up from his meditative state.

“140 points of spiritual force.”

In Levi’s mind, the Gas magic ring spun slowly, and all kinds of spell models orbited around it like satellites.

“The Heavy Water Barrier is also at the maximum of level 9. Its defense has already reached the highest limit of this spell.”

With a thought, Levi was protected in the center by a barrier surrounded by black heavy water.

The defensive power of this barrier should be superior to most third-circle defensive spells.
