

## **Wizard 838**

Chapter 838: Legend of the Crimson Dragon Emperor, Praise the Emperor! (6)

"Praise the Emperor, praise the Lord of the crawlers!"

"It's our duty to revive the glory of the Ancient Saint!"

The young Lizardmen spoke one after another, their hearts burning with passion.

Old Kane's thoughts returned to the moment he first met Lord Nameless, the Ancient Saint, more than ten years ago.

Ever since the Ancient Dragon Empire was established, Old Kane had never seen the incarnation of the Initial Ancient Saint again.

He knew that the Lord Initial Ancient Saint wanted to go to the Inferno Throne again and use his powerful strength to resist the demons who were trying to invade the Ancient Dragon Empire!

Now, in the entire Ancient Dragon Empire, "Ancient Saint Daoist Sanctums" were established one after another, imparting the eighth version of the Ancient Saint Dharmic Formulation that the Initial Ancient Saint had modified.

Apart from that, there was also a Psionic Academy established in the Intis area.

Lizardmen with the “psionic talent” had a chance to be chosen to go to the academy to cultivate the secret technique of Spiritual Power and master powerful psionic spells!

It was said that apart from being the strongest Ancient Saint, the Initial Ancient Saint was also the strongest Psionites in the world!

In the entire Ancient Dragon Empire, everything was developing in a good direction. It was thriving, and civilization was filled with vitality.

And the mastermind behind all of this had already headed north, passing through the Intis Mountain Range that no one had ever crossed to explore the borders of this world.

"I didn't expect that to the north of the Intis Mountain Range was an endless desert. With the speed of the Crimson Netherworld Sparrow, it flew for an entire day without flying out..."

On the back of a huge black bird with a wingspan of 100 feet, Levi sat cross-legged and looked at the monotonous scenery below.

In the desert, not a single blade of grass grew, let alone rare medicinal herbs and plants.

Occasionally, he would find some medicinal herbs with earth elemental power.

However, the medicinal herbs here were far inferior to those in the Ancient Dragon Continent. To Levi, they had no development value.

"Let's continue forward. I don't believe that this plane is endless. Even the Endless Sea has an end..." Levi muttered to himself.

After three years of intensive construction, the Ancient Dragon Empire had successfully established a country and began to operate independently. He did not need to worry about anything else.

Whether it was the Three Dragon Kings or the Ancient Saints of the Senior State Assembly, they had all voluntarily sworn an oath of loyalty under Levi's Excalibur.

All in all, with Excalibur's control, the chances of them betraying Levi were almost zero.

Of course, Excalibur could only make them loyal. As for how well the country would be governed, that would depend on their ability... Levi was pessimistic about this.

However, to him, the Ancient Dragon Empire was also an experimental country. The most important reason why the Ancient Dragon Empire was established was to gather the power of a country to help Levi develop and manage this plane.

The Ancient Saint Daoist Sanctum and the Psionic Academy that he had established were partly to better collect medicinal herbs, mineral resources, and so on from this plane. On the other hand, it was also to nurture a Transcendent Power that belonged to him. At that time, everyone in the Ancient Dragon Empire would be soldiers. If an enemy dared to invade this place, they would have to consider it carefully.

He only needed to come back every once in a while to harvest some chives.

At the same time, the population of the empire would be artificially controlled to prevent self-defeating actions that would deplete the resources of this dimension. The path of sustainable development was the foundation.

A few days ago, Levi left the Ancient Dragon Empire. After giving instructions, he headed north of the Intis Mountain Range, planning to make a groundbreaking geographical discovery.

"This desert can be called the Yellow Sand Sea. It will be incorporated into the textbooks of the Ancient Saint Empire in the future."

Levi muttered to himself.

Suddenly, he looked down. In the sea of sand below, the Earth churned and yellow sand filled the sky.

An earthworm-like creature that stretched for a hundred meters jumped out and bit at Levi.

"An unknown Ancient Beast. I can use you to test my current spell skills."

Ancient Beasts were slightly stronger than Ancient Saints.

This Ancient Beast was covered in yellowish-yellow scales, similar to burrowing worms. It opened its aberration-like mouth and spat out green poisonous breath.

Levi did not dodge. The Heavy Water Barrier surrounded his entire body. At the same time, blue electric arcs danced on his fingertips.

Dense electric arcs instantly condensed into a lightning snake about ten meters long.

The third-circle spell, Thunder Snake Technique.

After three years of cultivation, thanks to the relatively rich elemental power in this Ancient Saint plane, Levi had already cultivated all the third-circle spells that he had mastered other than innate spells to the maximum.

Crackle, crackle!

Electric currents exploded in the sky.

Levi was protected by the Heavy Water Barrier and the poisonous breath was blocked outside. Just as the worm monster bit Levi and the barrier, an electric current spread throughout its body, and a burnt smell filled the air.

Its sharp teeth tried to bite the Heavy Water Barrier into pieces, and creaking sounds could be heard.

After enduring for ten breaths, Levi's Heavy Water Barrier force field finally shattered.

"Very good."

Levi put away his experimental mentality. His golden scales spread out like a golden light protecting his body. He opened the mouth of the worm, and then his body expanded, forcefully cracking it.

Seeing that Levi was not easy to deal with, the worm tried to escape, but Levi grabbed its tail.

The indomitable Giant Dragon Warrior grabbed the worm's tail and swung it up with a bang, throwing it to the ground.

Yellow sand flew and sand dunes collapsed.

After ten times, the worm was on the verge of death.

Levi's Five Dragon's Might poured out, and the worm finally submitted.

He tested the bloodline and it was similar to what he had expected. This worm had the bloodline of the Immortal Banyan Dragon. It should be a ferocious beast that had mutated after Sauron killed the god and absorbed the blood of the forest king, Diuxis, who represented the Earth. Its bloodline essence could refine a higher-grade Golden Snake secret medicine for Levi.

"In that case, I'll call you Ground-Drilling Earthworm. In the future, go to Alice's ring to loosen the soil and fertilize it..."

Levi placed the Ground-Drilling Earthworm into the ring and entered it with his consciousness. He realized that the current space in the ring seemed to be a little crowded.

The transcendent creatures were too dense, and the elemental power inside was clearly not enough.

Levi had to invest a thousand Aether Stones every year to maintain the size of the space. However, as he collected more and more transcendent creatures and grew larger, this problem was still exposed.

"If I can restore the level of its Fifth-Circle Wizard Tool, the space should be about the same."

Levi shook his head. He couldn't do that at the moment.

He continued forward for another day. The scenery in front of Levi finally changed.

He smelled the sea and heard the surf.

He followed the ocean and continued forward.

Seven days later, Levi returned to the southern sea.

"It seems that this small plane is also a sphere similar to the planets in my previous life... The so-called Land of Darkness and crypts are similar to the universe and the planets inside. However, there is often a layer of crystal wall protecting these inhabited planets to prevent them from being corroded by the unknown strength of the Land of Darkness."

Combined with the information Levi had learned from Mobius and the others, this plane was just a piece of territory under the Chaos Ancient Serpent. Whether it was the Ancient Serpent or the four ancient dragons, they were not natives of this plane.

The natives of this world were actually those reptilian ferocious beasts that were similar to dinosaurs. After the Holy Snake's divine power descended, faith was gradually born.

Levi guessed that after Sauron killed the gods, the corpses of the Ancient Dragons were devoured by these dinosaurs, and the Ancient Beasts were born.

As for the crawlers, under Sauron's catalysis, they gradually gave birth to intelligent races. The Initial Ancient Saint was born here. He obtained the treasure left behind by Sauron and obtained the Ancient Saint Dharmic Formulation. He imparted it to other crawlers, and the Ancient Saints were gradually born. After that, it was the current Ancient Saint Empire.

All of this was just an experiment of Sauron's plane civilization.

"Of the four treasures, there's only the most mysterious Holy Grail of Immortality left. I'll leave it for the Ancient Dragon Empire to slowly search for. Anyway, I've already left behind the emperor's decree. Anyone who finds the Holy Grail can become the Fifth Dragon King under the emperor. Perhaps in the future, there will be a few Holy Grail Wars or Holy Grail Voyages here..." Levi complained in his heart.

After solving his doubts, Levi returned to the temple altar. This place was covered by an array to prevent the Lizardman from entering by mistake. It was the same at the exit of the human world.

The guard Bo Gang was still sleeping. Levi woke him up and gave him some potions to assist in his cultivation as a reward. Then, he left in a hurry.

After all these years of cultivation, his Dream Dragon Breathing Technique was about to reach its maximum. Next, he could fuse with the Sky Nightmare Breathing Technique. The embryonic form of the sixth perception dimension's breathing technique was about to be established.
