

Wizard 840

Chapter 840: Nightmare Dragon! (2)

Levi recalled the last time he went to the secret realm and was played by that damned Man-Faced Spider.

As for the second Nightmare Traveler, it added another function to the original Nightmare Walker.

[Nightmare Traveler: The blood of the Nightmare Dragon in your body gives you the ability to enter the Nightmare World. You can enter any main material plane by consuming the power of the Nightmare Dragon. You can also enter through the "Nightmare" of others and use the power of the Nightmare Dragon to condense a nightmare incarnation.]

[Use the power of the Nightmare Dragon to enter. You will be randomly sent to a certain place in the Nightmare World. You will enter through someone else's Nightmare and appear in a Nightmare Land related to their Nightmare.

[The items you obtain in the Nightmare World can be brought out by consuming the Nightmare Dragon's power. You can also find the nodes of the Nightmare World and the main material plane and bring them out.

[As a Nightmare Traveler, your death in the Nightmare World will not lead to death in the real world. After the Nightmare Dragon's power is exhausted, your consciousness will leave the Nightmare World and return to the main material plane.]

Looking at the introduction of the Special Effect, Levi's expression was solemn.

"Nightmare World?"

This world was the most dangerous and terrifying world Levi had ever come into contact with.

Even if the proficiency panel told him that it was not dangerous, Levi did not want to try it easily.

The Dreamland Steeple had entered the Dreamland Steeple through the hallucinatory potion that he had developed and then disappeared into thin air.

Perhaps once or twice wouldn't be a problem, but walking on the edge of the Nightmare World and the real world for a long time would sooner or later lead him into a nightmare forever.

"The Man-Faced Spider is in the Nightmare World. It should be an overlord of that world. However, at the level of the Man-Faced Spider, it's definitely not the true top level of the Nightmare World. There are existences even more terrifying than the Man-Faced Spider, such as the Sky Demon and the Dream Dragon..."

According to the Dreamland Steeple's research, the Nightmare World was the main spiritual plane on par with the astral world and the Underworld.

If the astral world was a world formed by the Faith and Spirit projection of all living beings,

It was very likely that the Nightmare World was a distorted world refracted by the Nightmare and Fear hidden in the hearts of all living beings.

Over there, everything was chaotic and unreasonable.

Many laws of the main material plane might not be adapted to it, and even spells might not be able to be used. The monsters hidden in the living nightmares also appeared in the Nightmare World to absorb the power of fear to strengthen themselves.

After experiencing the last secret realm, Levi was certain that the Ashen World should be a world corroded by the Nightmare World.

In this world, there were some similarities with the Nightmare World, such as Frenzied Death and Distorted Map of Reality. It was as if this world was being assimilated by the Nightmare World...

Levi sighed. Although there might be some opportunities, resources, treasures, and so on in the Nightmare World... he was not ready to enter yet.

"No matter what, ordinary illusions will be useless to me in the future. This is also a good thing... However, it seems that other than the School of Dreams, the other schools rarely use illusion attacks."

He did not want to think about the nightmare.

Levi walked out of the Extreme Path Palace.

Today was the Oath Conference.

When the vice commander, the Blood Knight, saw Levi coming out of seclusion, he said seriously, "Commander, all the official members of the Dusk Knights and the apprentice members of the Dusk Holy Temple are here!"

In front of Levi, on the square of the Dusk Holy Temple, there were many curious and expectant figures.

They were all staring at the tall middle-aged knight in golden armor in front of them.

His face was resolute, and his bearing was extraordinary. His strong muscles were like the body of a god in a statue.

"This is... a supreme knight?"

"That's right. This is the master of the Dusk Holy Temple, the leader of the Twilight Knights... It's said that he's already more than a hundred years old..."

"What a powerful aura. In front of him, I feel like a grand knight is just an ant."

Levi looked at these young faces and remembered that he used to be one of them.

Without another word, he took out Excalibur and stabbed it into the floor in front of him.

At this moment, the entire island seemed to tremble a little. Many trainee members exclaimed.

Then, Levi's powerful aura swept across Dusk Island. His eyes were like torches, and his voice was deafening.

"Everyone, a storm is brewing in the mortal world. Our Dusk Holy Temple can't just sit and wait for death.

"To strengthen our cohesion, I hope that everyone will swear with me in front of this sword today!

"This oath concerns your future. From now on, your fate will be firmly tied to our Dusk Holy Temple. We will be bound together for good or ill!

"The following path will be extremely difficult and winding. If you want to give up, you can leave now. We will wash away all the memories of your life and cultivation in the Dusk Holy Temple. You will be sent back to the human world and return to your mortal life day after day. You will continue to be that ignorant little noble."

After saying that, Levi looked at the trainee members.

Some people seemed to feel that this oath would be extraordinary, and their hearts moved slightly.

"Commander... I want to quit."

"Me too..."

One after another, some people began to raise their hands and withdraw.

The Blood Knight selected these people and looked disappointed.
