

## **Wizard 841**

### Chapter 841: Nightmare Dragon! (3)

Levi was as calm as an ancient well. When there were too many people, there would be a mix of good and bad. This was all within his expectations.

Therefore, the core of his future would always be the 18 Twilight Cavalry, which focused on the Twilight Round Table.

These trainee members were mainly prepared to nurture the 18 Twilight Cavalry.

Their willpower, loyalty, perseverance, and goals were all uneven, so it was very normal for someone to withdraw.

In the end, out of the 240 members, only 200 remained.

Levi asked the Blood Knight to bring the 40 people away. After that, he would use the memory spell to erase all their memories of the Twilight Knights.

"Very good. The people standing here will become companions of the Knights. Are you ready?" Levi asked loudly.

"I'm ready!" Kelvin Silver Mountain, who was already a peak grand knight and only one step away from becoming a legendary knight, shouted excitedly in the crowd.

After that, more and more knights let out deafening sounds.

"We're ready!"

Then, these knights stabbed their knight's swords into the ground.

Levi nodded. His expression was resolute as he placed his hand on the sword in front of him and swore, "Eternal Night is coming..."

The knight's oath contained many loyalty obligations that the members of the Knights had to fulfill to the organization. These were all adapted by Levi into an "Oath of the Night's Watch" in a fantasy movie in his previous life.

With such an oath as a constraint, these members who stayed in the Dusk Holy Temple basically wouldn't have any traitors... Unless one of them had a cultivation level that surpassed Levi, but that definitely wouldn't appear.

Even Levi himself had made an oath. However, this organization belonged to him. To him, it was naturally not difficult to abide by the oath.

After swearing, the shadow of Excalibur stood in the sky above the Dusk Holy Temple.

Then, it entered the bodies of all the members.

At this moment, the close connection between them and the Dusk Holy Temple was finally established.

Levi didn't need these people to worship him. He only needed them to be loyal to the Dusk Holy Temple and never betray him.

On that point, the humans were not as easy to fool as the Crawlers of the Ancient Dragon Empire.

After all, these knights had different cultures and beliefs.

As for the Crawlers, they basically believed in the Initial Ancient Saint and the Holy Snake. With this natural faith, it was very convenient for Levi to control them.

In the following period of time, Levi personally taught some knight apprentices in the Dusk Holy Temple to cultivate. He came from the group and went deep into the group. While maintaining his supreme dignity, he also left behind a good image of being close to the people.

Under the combination of grace and power, the operations of the Twilight Knights gradually embarked on the path of standardization, standardization, and integration.

After that, with the Truth Magic Mirror as the core, the knowledge-management system was gradually perfected.

The Dawn Holy Temple which could be issued missions and exchanged for resources was also established one after another. In the Dawn Holy Temple, members could exchange cultivation resources and secret medicine materials with each other. They could also exchange them directly at the Dawn Holy Temple at the corresponding price, or accept the mission reward of the holy temple and exchange them with labor.

After that, Levi handed over the entrance to the Ancient Saint plane and the way to enter the array to the official members of the Knights.

Next, these official members would bring the trainee members into the Ancient Saint plane in batches to train and search for resources.

Of course, Levi had also informed the Senior State Assembly of the Ancient Dragon Empire in advance.

It was said that in the future, a group of believers of the Initial Ancient Saint would come to the Ancient Dragon Empire to train. The two sides were brothers. If they met, there must be no friction.

As for the ferocious beasts, Levi was helpless.

This was also the reason why he did not dare to throw all his team members into the Ancient Saint plane.

Other than the official members, most of the ordinary members were only ordinary knights. With the cultivation of a grand knight, they could not fight back against the powerful ferocious beasts on the Ancient Saint plane. If they did not adapt to it, they would be thrown into it directly. It would be good if one-tenth of them survived...

He was a member of a training organization, not a PUBG player.

Holy Brilliance Calendar Year 1106, Month of Beginning.

Storm City.

Shining Tavern.

Levi was alone, savoring the Snow Beer.

He listened to the bard on the stage recount the legendary story of the Snowflake Knight.

At the end of the story, Levi the drummer applauded.

"May everyone have the same courage as the Snowflake Knights!" The bard said happily.

After being nostalgic at the Shining Tavern, he asked around for more information. Just as Levi was about to leave, a fat noble in luxurious clothes suddenly came to Levi's side.

"What can I do for you?"

Levi didn't know this fatty. He must be the owner of Shining Tavern.

"Sir, our boss wants to see you... It's not me. I'm referring to the big bosses of all the Shining Taverns..." the fatty said softly.

Initially, he thought that Levi was just an ordinary person. Unexpectedly, the big boss who happened to be working here could tell at a glance that Levi was not an ordinary person.

The big boss wanted to see it for himself, so he asked the fat noble to invite Levi.

Levi smiled and said, "Sure, lead the way."

He also wanted to know who was the mastermind behind Shining Tavern, which had such deep roots in the mortal world and was comparable to the church.
