

Wizard 853

Chapter 853: How to Transcend the Bloodline Path? (2)

This made Levi realize that the method of knights might need to be changed and perfected.

Success was due to the bloodline, but failure was due to the bloodline.

In his opinion, if he could turn Bloodline into something that was the icing on the cake and not necessary on the path of knights, that would be a better method.

At that time, it might not be a knight technique anymore, but a brand-new transcendent system.

Unfortunately, with Levi's current realm and vision, it was obviously impossible for him to jump out of the framework of a knight to create a new transcendent path.

The reason why Levi created the Ancient Saint Dharmic Formulation was also because he referenced the knight technique. In the end, he still could not walk out of the framework of his bloodline. It was naturally very difficult for Levi to jump out.

Of course, to Sauron, perhaps he had only created the Ancient Saint Dharmic Formulation out of convenience and did not put much effort into it. His focus was still on wizards. Leaving behind the Ancient Saint Dharmic Formulation did not mean that he could only create the Ancient Saint Dharmic Formulation.

If he advanced to a high-level primordial soul wizard in the future and could travel on planes and see more scenery and transcendent systems, he might be able to achieve his goal.

After the Dusk Holy Temple was created, it had its own trajectory. Levi didn't have much to worry about.

With the Blood Knights taking charge of the situation, he was quite assured.

Therefore, most of the time, other than going to the Endless Sea to complete some missions from the Witch's Family and exchange for some resources, Levi stayed in the Ancient Saint plane to cultivate quietly.

Without that damned Fire Elemental Spirit, he did not have to worry too much about entering and leaving the Wizard World.

On the other hand, Barzan had been dead for more than three years, and no one had come knocking on his door yet. There was no such thing as the Calabash Brothers saving his grandfather.

Levi heaved a sigh of relief.

Over the years, with the combined efforts of the Lizardman and Levi of the Ancient Dragon Empire, Levi had finally gathered all the materials for the Glory of the Four Kings array.

Levi had saved a lot of resources by monopolizing a small plane.

Therefore, he prepared the materials for two sets of arrays, each costing about 100,000 Aether Stones.

After obtaining the materials, Levi began to refine non-stop.

Levi's array had been stuck as a second-circle peak-level array wizard for a long time. His theoretical knowledge was very solid.

The glory of the four kings was not very difficult. It was not as complicated as modern arrays, but it was extremely time-consuming and resource-intensive.

Just like that, another year passed.

Levi spent most of the year refining arrays.

In the end, both sets of arrays were refined.

Levi's array skill also naturally broke through to level 6, which was the level of a third-circle array wizard.

Just like wizards, the third-circle was also an important threshold for array wizards.

After the third-circle, the types and power of arrays that wizards could refine became stronger. In the Truth Magic Mirror, there were also a few ancient combat arrays.

Compared to the potion formula, the materials involved in the array blueprint did not change much. This was because most of the arrays were durable items and not consumables like potions. Therefore, the difference between the materials used to create arrays in modern times and ancient times was not obvious.

Levi used his alchemy knowledge to exchange for a third-circle array called the Purgatory Ghost Killing Array.

This array could allow 24 or more wizards to form a battle formation. Only four wizards needed to carry array items and preside over the array in the four directions of Earth, Fire, Wind, and Water. The others could be enhanced by the array. Not only spell wizards, but also body-refining wizards and some warriors of foreign races.

Therefore, Levi felt that it was not a problem to use it on an Ancient Saint.

He planned to find some psionic Lizardman wizards in the Psionic Academy and form an array with the Senior State Assembly.

The Purgatory Ghost Killing Formation could greatly increase the mental strength of the people in the battle formation. Their physical potential and explosive power could cause them to be in an excited state, like hungry ghosts in purgatory. That was why it was called the Purgatory Ghost Killing Array.

Levi estimated that if the combat array was successfully refined, the Purgatory Ghost Killing Battle Formation formed by 20 Ancient Saints would be enough to instantly kill a Fourth-Circle Wizard. Even a Fifth-Circle Wizard might not be able to withstand it.

There was the [Glory of the Four Kings] and the [Purgatory Ghost Killing Array]. The Ancient Dragon Empire had two great arrays, one for offense and one for defense. It could be said to be perfect.

After that, Levi set up two sets of the Glory of the Four Kings array and one set at the Dusk Holy Temple on Twilight Island.

The other set was set up at the spatial entrance between the Ancient Saint plane and the human world, which was the island. When the time came, Bo Gang, the Mountain Giant, would be in charge of the [King of Earth] array, which could also increase the power of the array.

This way, even if someone accidentally found this island and discovered the spatial entrance, they would have to go through the array to enter.

Unless it was a Fifth-Circle Wizard or a Fourth-Circle Wizard, it should be very difficult to pass through this array.

On the other side of the entrance of the sub-dimensional portal, there were four Senior State Assembly Ancient Saints guarding it all year round.

This way, the only entrance to the entire Ancient Saint plane was firmly guarded by Levi. It should be considered impregnable.

Levi felt more secure as he cultivated in this place.

Holy Brilliance Calendar Year 1110, Month of Wheatfield.

Year 79 of the Great Expedition.

In the Wizard World, there was news that Deep Blue Sage Luther had betrayed the wizard camp and brought Sky City and the wizard battle group that had returned to the Abyss.

It was said that this news came from a certain big shot, and it was basically true.
