

Wizard 869

Chapter 869: Primordial Soul Ceremony (1)

Metal Poison Body Tempering Technique.

It combined with the indestructible and extremely poisonous characteristics of the Mixed Venom True Form.

At the same time, because the Toxic Swarm had devoured all the luminant gold elemental power that Levi had absorbed during the fusion process, the defense strength of the Toxic Swarm had increased several times.

This caused the Toxic Swarm to change in essence.

Levi sat in front of the mirror in the wizard tower.

The surface of his skin emitted a golden luster. The flickering luminant gold runes covered all the golden scales on Levi's body.

Every inch of his flesh and bones emitted a faint golden light.

"It's a little like the Indestructible Diamond Divine Skill from my previous life," Levi said with a smile.

With a thought, countless luminant gold runes swam around his body, and golden liquid surged in his limbs and bones.

Then the golden liquid magically left Levi's body and swirled around him, circling and tumbling.

The golden liquid gathered in front of Levi and condensed into a golden faceless man made of liquid.

If Barzan saw this scene, he would be extremely surprised.

This Luminant Gold Wizard Body was completely fused with his physical body and bones. How could it be extracted?

"I have to say, the Toxic Swarm is really magical."

Levi sighed.

The reason why he could do this was because of the Toxic Swarm.

Although the Mixed Venom True Form created by the Black Water Wizard was not of a high level, its intention was far superior to other body-refining wizards.

This was because he had combined the knowledge of the Bug Luminist civilization and created a special Rule Bug—Toxic Swarm with very strong growth potential.

The foundation of his Mixed Venom True Form was also on this Toxic Swarm.

It could be said that the Toxic Swarm itself was the Mixed Venom True Form.

The Toxic Swarm was essentially a group of parasitic creatures that was constantly splitting and dying. It could not only merge into Levi's body to strengthen his physical fitness, but it could also come out of his body and form a group of lifeforms similar to clones.

After fusing with the Luminant Gold Wizard Body, the once-black Toxic Swarm evolved into the Luminant Gold Toxic Swarm.

While retaining its original characteristics, its defense was greatly enhanced.

The final result was the golden faceless man in front of Levi.

The faceless man was like a fluid that could transform at will. With a thought, it turned into a golden river that flowed around the wizard tower. Then, with a thought, it turned into a golden shield, a greatsword, and armor...

"Isn't this better than a Wizard Tool?"

This reminds Levi of the liquid robot T-1000 in the Terminator movie in his previous life.

Bang!

The golden faceless man exploded into a cloud of golden mist that covered the walls of the wizard tower.

"Come back."

After having enough fun, he put the golden faceless man back into his body.

His body shone with golden light again.

"If this body-refining technique can continuously evolve and fuse, it can create a body-refining wizard clone of the same level as me. At the same time, it can also be an offensive and defensive Wizard Tool. It's killing two birds with one stone.

"Moreover, it can also be used to disguise my knight techniques and completely disguise me as a body-refining wizard... At most, I can add the identity of a dragon-descendant wizard.

"The Metal Voodoo clone is completely controlled by my consciousness. It only had a low-level collective consciousness and did not have any self-awareness, so there is no possibility of it backfiring on its master.

"Just this Metal Voodoo clone alone is enough for me to look down on Third-Circle Wizards. I should even be able to resist ordinary Fourth-Circle Wizards."

"When I break through to the fourth circle and my spiritual force becomes stronger, I can break through to level 8 of the Metal Poison Body Tempering Technique. This way, I will have a body-tempering clone with the strength of the fourth-circle."

However, although the wizard body-tempering technique seemed to be cultivated quickly, it was actually because Levi had a powerful knight foundation and the wizard realm, as well as bugs like the proficiency panel.

What really limited the cultivation speed of body tempering techniques was ultimately the cultivation of spiritual force.

Therefore, this path did not have the framework of a wizard. It was completely different from the path of a knight.

With Levi's current realm, it was impossible to fuse the wizard body tempering technique and the Knight Breathing Technique.

After experiencing the Metal Voodoo, Levi felt a faint hostility.

"It's been three years... It's been three f*cking years. I've just attended an auction. Why is someone still thinking about me? Could it be that damned Fire Elemental Spirit?"

Levi suddenly remembered that if the Fire Elemental Spirit was alive, he might be the person it hated the most...

Therefore, it was so resentful that Levi could feel it even through the sub-dimensional portal.

"I don't think so. I didn't feel this kind of hostility before I participated in the auction. This was after I participated in the auction... Forget it, I'm going out of the city to attend the primordial soul ceremony at the Starfire Wizard Academy. I want to see who wants to harm me all day long..."

Levi cultivated in the wizard tower for a few more days to consolidate his Metal Voodoo.

The so-called primordial soul ceremony.

It should be the grandest ceremony for every high-level wizard organization in the Wizard World.

Only Grand Wizard or Legendary Wizard ceremonies could be more grand than primordial soul wizard ceremonies... Grand Wizards and Legendary Wizards were so rare that they might not even be held once in a hundred years in the entire Wizard World.

Comparatively speaking, the easiest ones to hold were primordial soul wizards.

This ceremony should be an established rule of the Wizard World.

Every wizard would hold such a ceremony when they broke through to the primordial soul, be it for their own cultivation or organization.
