

Wizard 882

Chapter 882: Dual Cultivation of Body and Magic! (3)

"This is the benefit of having a large organization. This level of knowledge is simply unknown to many wizards. At least, I have always naively thought that the upper limit of a wizard's spiritual force is fixed, and everyone is the same... However, what the Frost Witch said was very reasonable. It is not advisable to waste a good opportunity for that fleeting opportunity!"

"I'll let nature take its course before I reach the Crystal Phase in the future. If there's something like a Truth Oddity, I'll fight for it. If there isn't, I'll advance when I have 500 drops. Deep Blue Sage is only an exception. Those who can advance to the legendary stage are 100% hot shots."

"Just relying on the talent of the Children of the Elements to advance to the primordial soul realm is already a blessing in disguise."

"Under the premise that the Endless Sea has a huge population, there are actually not many Children of the Elements born in each period. However, with so many Children of the Elements, how many of them could attain primordial soul realm?"

"As for the [transition period], it doesn't affect me much because other than my wizard cultivation, I also could be a knight. That doesn't require me to cast spells."

"Moreover, with my current elemental talent and this first-class liquefaction method, the transition period should not exceed ten years."

"As such, after completing the Witch's Family quest, I would have to search for an extremely cold place."

"It might not be easy to find that place in the Endless Sea, but there is a place, a suitable place, that can help me pass the transition period faster."

"Realm of Ice!"

"I need to find an opportunity to advance to the fourth-circle in the Realm of Ice and bring Emperor Mu back. At the same time, interview the Goddess Knight. It's killing two birds with one stone."

After making his plans for the next 30 years, Levi returned to the wizard tower and began to prepare to head to the outer sea region.

The next day.

The team that the Witch's Family was going to send to Area 7 in the outer sea region, the Pharmacists Association's branch, was ready.

Levi arrived at the port with the Rose Witch's team.

He crossed his arms and stood on a pink wizard airship.

This airship was a level 3 airship [Pink Light] that Madam Triss had eliminated.

Whether it was speed or functions, it was far superior to the slum version of Flying Shark that Levi had used before. The new version was also worth more than 100,000 Aether Stones.

This was also one of the rewards that Triss had given Levi. Regardless of whether the mission was successful or not, it was given to him.

Although it was a little weird for Levi to use a pink airship, it was free.

"The Witch Party is all here. Team Leader Levi, prepare to set off," said the Rose Witch.

"Alright, let's talk about the details on the boat." Levi nodded.

Everyone boarded the wizard airship. The pink light activated the invisibility array and quickly flew towards Area 7 of the outer sea region.

On the airship.

Levi sized up his team members.

Rose was a veteran third-circle wizard who had mastered two innate spells. She was pretty strong and was also a 24 Flowers wizard with rich combat experience.

Other than that, there were three third-circle wizards.

"Team Leader, let me introduce you to our team members. This is Violet Witch, you've seen her before." Rose pointed at a witch wearing a purple robe beside her.

"Sir Levi, long time no see. Do you still remember me?" Violet Witch smiled.

She still remembered that when she was a senior second-circle wizard, Levi seemed to be a senior first-circle wizard. Now, although she was a third-circle wizard, Levi seemed to have advanced earlier than her. His spiritual force fluctuations were far above hers.

It seemed like what Rose had said was true. Sir Levi was not an ordinary person.

Levi smiled and replied, "Beautiful Violet. Of course, I remember. We had a great time working together."

Violet smiled and nodded.

"Team Leader, this is Celestia. Like me, she's also a third-circle senior wizard. You can call her Lily Witch..."

"Lily... Are you also one of the 24 Flowers?" Levi asked.

"Yes, I often hear Rose mention you. Now that I've seen you, you're really... It's rare to see a wizard as strong and sturdy as you." The Lily Witch wore a flawless white robe with a lily pattern on it.

"Lastly, this is Wizard Anya. Like you, he's also an external aid pharmacist. He also lives in the Nether Capital. Although he's a third-circle wizard like us, he has mastered three innate spells. He once severely injured a fourth-circle dark wizard with spells..."

The last person introduced was obviously a heavyweight.

Upon hearing this, Levi could not help but look at the male wizard who was sitting in a corner, looking rather gloomy.

This was the first time he had met a Three Talent Wizard.

"Hello."

Wizard Anya did not seem to like to talk much and was a little aloof.

Levi did not say anything else. After this mission was completed, they would not have much interaction.

"Let me introduce myself. I'm Levi, a third-circle wizard. I've dabbled in body refinement and spells, and I'm not bad at all. At least I should be capable enough to be everyone's team leader."

"We are all elites of the Witch's Tower. I personally believe that as long as we work together, it won't be difficult to complete this quest."

"Since Madam Triss has chosen me to be the team leader, I naturally have to shoulder the responsibility of a team leader. When we arrive at the battlefield, I will assign responsibilities according to your factions and abilities. I hope that everyone will listen to my commands."

"No problem," said Rose Witch. She had explored the secret realm with Levi before and knew that Levi's strength was far beyond the third-circle. She reckoned that with all his trump cards added together, he would not be inferior to Anya, who was a rare Three Talent Wizard.
