

Wizard 885

Chapter 885: Dual Cultivation of Body and Magic! (6)

Then, the blue frost monsters that looked like walking corpses stood up.

Those first-circle wizards were using protective spells to hold on, and those who couldn't hold on would end up like those apprentices who were walking corpses.

"You... You don't have the Frost Elf bloodline...You are the owner of the blue frost blood!" The one-eyed wizard seemed to have recalled something terrifying.

A frost greatsword had appeared in the silver-haired witch's hand.

She raised her greatsword and swung it at the one-eyed wizard.

Protection of the Black Sun!

The one-eyed wizard's third-circle force field was activated.

He blocked this terrifying sword slash.

"So what if you're the owner of the blue frost blood? It's only the initial awakening. Killing you is as easy as flipping my hand." He snorted coldly and cast his innate spell. The black sun flew toward the silver-haired witch.

Boom!

The shockwave tore the wizard airship in half.

The sudden change of events caused the wizards' expressions to change drastically.

"One-eye, what's wrong?"

"Quick, come to me. There's a blue frost blood possessor here!"

The one-eyed wizard had just finished speaking when from the horizon ahead, hundreds and thousands of swords whistled through the clouds.

Pu pu!

The sudden attack caught these dark wizards off guard and caused heavy casualties.

"Enemy attack!"

As the protective shield of the wizard airship lit up, the sound of metal clashing could be heard.

The other five third-circle wizards of the Black Sun Steeple flew up one after another, looking into the distance with solemn expressions.

On the sea twenty miles away from here, a pink wizard airship removed the concealment array and broke through the clouds.

At the bow of the airship, Anya sat cross-legged, floating in the air. He closed his eyes to meditate and chanted.

Above his head, the power of the metal elements began to gather again, condensing into a huge greatsword that was about 100 feet long.

Second innate spell, Brass King's Sword!

"You're so cool, Sir Anya. You're actually from the rare metal faction." Lily looked at Anya, her eyes full of admiration.

Rose and Violet were also shocked by Anya's attack.

Anya was silent. He gently flicked the bronze greatsword in front of him.

Boom!

The giant sword swept away the clouds and quickly crossed a distance of twenty miles.

A third-circle wizard's expression changed. That huge sword smashed toward another wizard airship.

The Wizard's Hand formed by pitch-black demonic flames grabbed at the greatsword.

Boom!

The Wizard's Hand shattered.

The greatsword also deviated from its direction and fell into the sea, causing huge waves to rise.

"Looks like the experts from the Star Sea have arrived. Tsk, tsk, tsk." The third-circle wizard did not panic but instead sneered.

These dark wizards were well-trained. After being ambushed, they quickly reacted and formed a battle formation with the third-circle wizards as the center.

Only the one-eyed wizard was still fighting the mutated silver-haired witch.

Levi put away the airship. Even he was slightly impressed by the skills that Anya had just displayed.

Putting aside his strength, he was handsome.

Paired with Anya's pretty good looks and his cold personality, he had charmed Lily Witch.

"Cough cough... Next, we'll act according to the plan. The three of you ladies will advance and retreat together and cast spells at the right position. I'll tear apart the other party's defense line... Sir Anya will provide us with a long-range Bronze School spell to support us," said Levi.

"Okay," Anya said calmly.

"Sir Anya, please be careful. Don't let the enemy ambush you from behind." Lily Witch looked away. Levi had already lit up with a golden light and shot into the enemy's formation like a cannonball.

"Sigh, this is what a body-refining wizard is like..." Lily Witch shook her head.

The Metal Voodoo made Levi look like he was wearing golden armor.

He fell into the enemy camp, smashed through the barrier of the wizard airship, and stepped on the deck.

With a boom, the deck cracked open.

"A body-refining wizard?"

The dark wizards were shocked by Levi's arrogant display of strength.

Wasn't this wizard overly confident?

Even if he was a body-refining wizard, he would still be courting death if he charged into the enemy camp alone.

Spells bombarded him one after another.

"Earth Dragon Barrier!"

The Second Talent that Levi prepared had already been unleashed.

He needed a battle to test the power of his spells.

These first-circle second-ring spells relied on their numbers to make the Earth Dragon Barrier tremble continuously, but it did not shatter, firmly protecting Levi.

Levi transformed into a golden flash and entered the Uninhabited Realm. Every time he attacked, an ordinary wizard would die.

On the other side, the three women and Anya worked together to fight against those third-circle wizards.

These were disciples of large organizations. Their strength was extraordinary, and their teamwork was very good.

Soon, a third-circle wizard broke free from the battle and charged towards Levi.

"Die!"

The black demonic flames formed a long spear that tore through the void. With a loud boom, it tore through Levi's Earth Dragon Barrier, but it was powerless against the golden armor formed by the Metal Voodoo. The attack was unable to advance an inch.

Levi turned around and attacked the third-circle wizard.

Seeing this, the other party immediately fled.

Even his strongest attack could not break through his opponent's defense.

How was he supposed to fight?

In the next moment, the chain sword in the wizard airship ahead hummed and tore the deck apart. A metal monster jumped out and attacked the third-circle wizard.

He was horrified. The chain sword had torn his force field apart and he had almost lost his life.

Tyrant III did not chase after him. Instead, he killed these low-level wizards.

At the same time, bronze swords kept falling from the sky. Every once in a while, the lives of wizards were taken away.

The third-circle wizard was no match for Levi. Not long after, he was killed by Levi with a single punch. Levi skillfully put away the items inside.

In this battle, they had all agreed beforehand that if they killed an enemy alone, the spoils of war would belong to each of them. If they killed it together, everyone would split it equally.

That was why Levi chose to bully the noobs from the start. This way, he could first put away the storage bags of the low-level wizards.

Then, he knew that with Rose and the other's strength, they would definitely not be able to deal with the enemy in a short period of time. They still needed his help to deal with the enemy.

This way, he could split the spoils of war both from killing the enemy himself and helping the other four to kill the enemy, gaining benefits from both sides.

After this wave, his Aether Stone reserves would definitely break through the million mark. For a long time to come, he could cultivate without distractions.

Skills and working to earn money were just for fun. If they really wanted to earn money, they would still have to rob. However, some people robbed illegally, while others robbed legally. Whether it was in his previous life or this life, this was an eternal truth.

Not long after, these rookies were annihilated by the combined forces of Levi, Tyrant, and his other transcendent creatures.

As for Levi, he did not even use any knight techniques.

If it wasn't for the fact that he was worried about exposing too many trump cards, his killing speed would have been even faster.

Especially if he released the Mind Flayers, it would be easy for the Level 4 demons to kill these low-level wizards.

After dealing with the enemies, Levi saw the one-eyed wizard and the silver-haired witch in frost armor.

"Sheely? Why did she feel a little different? This aura... It's blue frost." Levi pondered.

He did not care about anything else. He directly appeared in front of the one-eyed wizard and ambushed him while he was fighting with Sheely. Levi's golden palm pierced into the one-eyed wizard's chest and crushed his heart.

The one-eyed wizard died with his eyes wide open. His protective force field was washi paper...

"Sheely, what's wrong?" Levi asked.

Sheely looked at Levi and said nothing. She turned around and stepped into the blue door of light behind her, disappearing from the vast world of blue frost.

Levi did not care about her anymore. This was the Wizard World anyway. No matter how capable Blue Frost was, he could not cause any big waves here.

Not long after the battle began, two third-circle wizards had already fallen.

Anya opened his eyes in the distant sky, his mind shaken.

"Dual cultivation of body and technique? How is this just 'passable'? This is clearly at the peak of perfection. No wonder Mother likes and admires him so much..."

Anya was actually Triss's child.
