

Wizard 890

Chapter 890: Sudden Wealth, Undying Bird Fruit! (5)

This woman was too rich.

In the Star Sea, every island was many times more valuable than the outer sea region.

Levi could afford it, but he felt that there was no need. He could return to the Witch's Family at any time in Nether Capital. This way, it would be more convenient for him to take refuge.

"You guys can cultivate here. I still have something to do here."

Levi said as they parted.

"Sorry to trouble you." Marlene smiled bitterly.

"Thank you for treating me," Winnie whispered with a red face. When she was unconscious, she only felt something warm enter her body and look at her inside and out. Later, she found out that Levi cured her of her coma.

"You're welcome. I still remember your kindness in leading the way back then," Levi sighed.

When one was old, one would always start to remember.

A hundred years ago, the young knight who entered the Wizard World had finally made a name for himself.

All of this was due to Levi's hard work and caution, but most of it was because of the panel.

After all, in the Wizard World, many people were more hardworking and cautious than him and were more talented than him.

It was important for people to know their limits so that they could go further and further.

After returning to Nether Capital, Anya visited Levi, thanked him again, and went into seclusion.

His spiritual force was already at 200 points of Perfection.

This mission made Anya, who had always been a little conceited, realize that there was always someone better.

He began to see Levi as his target. He wanted his mother to admire him the way she admired Levi...

Levi finished counting the spoils of war of the dark wizards.

Just the Aether Stones alone were more than 1.2 million.

In the Wizard World, because of the storage space, most wizards liked to carry valuable items with them.

Levi estimated that this was the total net worth of those wizards.

Of course, most of this money came from those third-circle dark wizards. All of them were quite rich.

Although Rose and the rest were too embarrassed to split the spoils of war, Levi still gave these team members 100,000 Aether Stones each. Anya's contribution was only second to Levi's. He received 200,000 Aether Stones. The remaining 700,000 Aether Stones and other miscellaneous items belonged to Levi.

100,000 Aether Stones was a huge sum of money for Rose and the rest.

As a result, Levi's cash reserves had reached 1.5 million Aether Stones!

Then, he would find a black market to secretly sell the Wizard Tools that were not damaged by the battle. He estimated that 2 million Aether Stones would not be a problem.

"I've never been so rich before... Even breathing feels extremely carefree. This is the taste of money."

Levi looked at the mountain of Aether Stones in his storage space.

In addition, there were also some spell books, but they required the Black Sun Steeple's Black Sun Meditation Art. To Levi, they were useless.

Over the past few days, he had sorted out his gains.

After disguising himself, he ran to many underground black markets in the Star Sea.

He didn't get rid of them all at once. Instead, he randomly found a place to deal with them every once in a while.

Just like that, a year later.

It was not until 1119 of the Holy Brilliance Calendar, the 88th year of the Great Expedition, that these stolen goods were dealt with.

In the end, after Levi finished counting, he could not help but take a deep breath.

“2.2 million Aether Stones... Other than Fifth-Circle Wizards, there shouldn't be more than ten people in Nether Capital who are richer than me.”

A year had passed in the Nether Capital.

Levi's path as a wizard became more and more profound.

The second innate spell, the Earth Dragon Barrier, had reached level 8. Its defense was already similar to the level 9 Heavy Water Barrier.

Levi also began to plan for the third innate spell.

"I have the Fire Dragon Tribulation and the Earth Dragon Barrier now. These two aren't the Endless Sea's home-ground spells. This third spell has to be from the Ocean Faction, and it has to be a control spell.”

In most places in the Endless Sea, spells that could unleash their full power undoubtedly required the power of water elements.

"Speaking of which, the Golden Snake Breathing Technique is about to reach level 14 Perfection. I wonder if I can continue to level up or if I need to break through the limit?" Levi looked at the proficiency panel.

The progress of the Golden Snake breathing technique, which had both water and earth elements, was mainly delayed by the mixed-blood Dragon Clan with water elements. After all, Gustav was only at the peak of level 2.

Moreover, a year ago, Gustav seemed to be about to break through. He found a cave at the bottom of the lake in Alice's ring and began to sleep.

Fortunately, the level four [Ground-Drilling Earthworm] that Levi had captured in the Ancient Saint plane was powerful and allowed the Golden Snake to continue advancing.

In addition, the Proficiency of the Death Ember Breathing Technique had also increased significantly. It should be able to enter level 14 before Levi advanced to the fourth-circle.

The Nightmare Dragon's breathing law had already reached level 13.

Levi's Perception range reached a hundred miles. However, the further away he was, the lower the accuracy of his Perception.

However, it was still much better than the mental power Perception of most Third-Circle Wizards.

After level 13, the Nightmare Dragon's cultivation became slower and slower. The level 2 Nightmare Crown Lizard could no longer keep up with Levi's progress.

"Looks like I have to enter the Nightmare World to hunt stronger Nightmare Creatures?"

Levi hesitated.

The Nightmare Dragon could still cultivate now, but after level 14, Levi would probably have a hard time without the secret medicine.

"After I break through to the fourth-circle, I'll start exploring the Nightmare World. I'm still different from those wizards who rely on hallucinatory potions to enter."
