

Wizard 894

Chapter 894: Perfection! (3)

Everyone called them the “Steel Dragon Couple”.

Herman’s appearance was not made up by him, but a design blueprint from the Machine Sage.

This mechanical creator had designed a series of flashy and powerful mechanical beast blueprints.

Herman’s model was called the Iron-Winged Tyrannosaurus.

Stella’s model was a Steel Sea Dragon.

Its original form was from the mixed-blood Dragon Clan.

However, these mechanical creations were much stronger than ordinary mixed-blood Dragon Clan members.

It was also because of this that the Steel Dragon Couple followed Legendary Wizard Luther all the way. Under the lead of this Legendary Wizard, they lured the terrifying Dark Insects to the 600th floor.

"To be honest, it's worth it to die here. I, Cas Carter, can be considered someone who has been to the Abyss, and it's the f*cking 600th level. Even a Grand Wizard can't come here, right?" A Fifth-Circle Wizard laughed.

"It's not easy. After 30 years of effort and 600 levels of the Abyss, we've finally gotten rid of the pursuit of those Dark Insects. Those guys should still be fighting with the Abyss Lord above. The strength of the Dark Insects is still inferior to the Deep Blue Sage," Herman lamented.

The Dark Insects was the name Luther had given them.

This was because these insects seemed to be born in the Land of Darkness.

Luther looked at the wizards who had survived the calamity chatting, but his expression was still solemn.

"Just an Insect Army is already so difficult to deal with, and there's even a level 10 existence among them. I can't imagine how powerful this terrifying civilization is... Perhaps it's not inferior to the Abyss.

"The wizard civilization has started too late. Although it developed rapidly, it is still too inexperienced compared to those naturally powerful ancient races and civilizations.

"Back then, when Lord Sauron reached the 666th level, it was unimaginable. I spent a lot of time to kill the lord on the 600th floor.

"However, the Abyss regenerates too quickly. It might not be long before powerful demon lords would be born in the bloody battle to fill the vacancy of the 600th level.

"To a certain extent, the will of the abyss might be the same as the mother nest's will of the Dark Insects. It is "Him" who spurred and facilitated all of this.

"Therefore, I suspect that Lord Sauron stopped after reaching the 666th floor because he discovered this pattern.

"No matter how many demons or Abyss Lords he killed, he could not eliminate them from the root.

"This is because, above all demons and demon lords, there's a supreme will. That is the true... Abyss.

"That is a level that could no longer be measured by the common knowledge of wizards. In short, it is an existence that far exceeds level 10.

"After all, from the current historical research, Lord Sauron had already surpassed level 10 before he disappeared. If even he felt powerless, how powerful must the enemy be?

"Perhaps one day, someone will be able to truly pierce through the entire Abyss and arrive at the deepest part of the Abyss. Only then will they be qualified to understand the true secrets of the Abyss."

Suddenly, a powerful and familiar will descended on the 600th floor unknowingly.

Luther's expression changed.

"That mother nest's will is here again..."

In the next moment, another chaotic and violent will descended.

This was a battle that even Legendary Wizards could not understand. It was a battle of another dimension.

"Everyone, enter Sky City. I want to drag you into my Demiplane," Luther said.

The wizards ran into the city.

He waved his hand, and a dark blue light appeared, pulling Sky City into it.

In the Deep Blue Sage's Demiplane.

This was Luther's Demiplane. Similar to the Endless Sea, this place was blue, and so was the sky.

It was as if they had returned to the Wizard World.

"Is this the legendary Demiplane? I can't feel the edge at all. I don't know how big it is. It feels like it's comparable to a small secret realm." Herman exclaimed.

This wasn't a secret realm that relied on the main material plane or a spatial ring, but a true embryonic form of a plane.

Legend had it that a legendary Demiplane could grow continuously. In theory, a Demiplane had the chance to develop into a real plane.

Even if it was just a small plane, it was still a miracle like the creation of the gods.

Stella, the Steel Sea Dragon, was swimming in the sea. She looked at the center of the sea, where there was a wizard tower.

A dark blue wizard tower that was truly indomitable.

It was as if this wizard tower, like a pillar, supported this world.

A benevolent face that looked like a god appeared on the wizard tower.

"This is my Demiplane. You can cultivate here normally. Next, someone will introduce to you the Demiplane Rules of my Demiplane. You must remember to abide by them. Otherwise, you will be treated as invaders by the Demiplane Rules and killed," Luther reminded.

After saying this, everyone fell silent and obediently found a place to start cultivating.

Outside, while the two supreme wills were fighting,

The Deep Blue Sage immediately tore apart the barriers between each floor of the abyss with a legendary spell and headed for the 599th floor.

The two supreme wills clashed and had no time to care about him.

Now, it was time to return!

Nether Capital.

In the past year, Levi's meditation supplementary potion supply had never stopped with enough money.

His spiritual force was steadily increasing every year.

At the same time, the materials for the Purgatory Ghost Killing Array were ready.
