

Wizard 895

Chapter 895: Perfection! (4)

Levi immediately began to refine the array.

Levi had high hopes for this expensive combat array.

The refinement difficulty was much higher than 40,000 Glory.

However, in the end, Levi managed to successfully refine it without any mishaps.

In the wizard tower, a total of 24 array items floated like war drums in front of Levi.

On the surface of the war drum, there were 24 different patterns of evil ghosts from hell.

Among the 24 war drums, four were array cores that needed to be controlled by wizards. There were no other requirements. They only needed to be carried with them.

"Each wizard needs a total of four wizards to preside over an array core. Their cultivation level has to be above the second-circle level. If it's too low, they can't preside over the third-circle array.

"After so many years of development, the Psionic Academy should be able to recruit corresponding wizards.

"If it doesn't work, I'll capture a few people from the Wizard World."

Levi could not wait to return to the Ancient Saint plane to test the power of this array.

The attacks of the 20 Senior State Assembly Ancient Saints were enhanced and transformed by this array. Even ordinary Fifth-Circle Wizards would not dare to take them head-on.

This way, the Ancient Saint plane would be safe for a long time.

"However, the elemental power in the Ancient Saint Plane is not as rich as in the Star Sea. I'll go home to take a look after I perfect my spiritual force here."

After taking pills, arrays, and covering his daily expenses for two years, Levi still had more than two million Aether Stones in his reserves.

It felt good to be rich.

Suddenly, Levi's wizard tower trembled.

He hurriedly ran out of the wizard tower and realized that two figures were fighting and chasing in the air under the pressure of the Nether Capital's no-flight array.

"Fifth-Circle Wizard... Looks like he's snatching the key to the Dark Ancient Tower again."

Levi saw that one of the wizards was glowing.

He shook his head.

Now, news about the Dark Ancient Tower had already begun to spread among the Intermediate Wizards outside some large organizations.

This made the disputes between wizards more frequent.

"Looks like the rumors are true. There are no primordial soul wizards in Nether Capital anymore. The city lord is most likely in seclusion... Otherwise, a fight in the city would not have happened."

The two Fifth-Circle Wizards gradually left.

Algerta watched all of this with lingering fear. She said with envy, "They can fly in the sky and burrow into the ground. They are omnipotent... When will I be able to have a tenth of their strength?"

"You're already at the peak of legendary. When you reach the second step of knighthood, you can learn my Blood Qi Wings. From now on, you can soar in the sky too." Levi touched the white wolf's head and enjoyed the comfortable feeling.

The white wolf rubbed against him affectionately, letting out low grunts from time to time.

"I heard that a fourth-circle potion is on the shelves. I have to hurry up and take a look."

Levi chanted an incantation and entered the Witch's Family.

He immediately went to the witch shop to see if any potions could help him break through to the fourth-circle. Previously, he could not make it in time as every time he came, and they were all snatched up.

He had no choice but to spend a lot of money to bribe a witch in the witch shop to open a... back door for him.

Today, he finally got the chance.

It wasn't easy to break through to the fourth-circle.

Therefore, even for a giant organization like the Witch's Family, Fourth-Circle Wizards were at the upper middle level. Fifth-Circle Wizards were at the upper level. As for primordial soul wizards, they were all at the upper level.

"Beautiful Miss Linda, I heard that a breakthrough potion is on sale..." Levi rushed over and said with a smile.

"Yes, Sir Levi. I informed you as soon as it was put up for sale." The witch Linda was the salesperson of the witch shop.

It was said that her mother was a Fifth-Circle Wizard of the Witch's Family. That was why she could get such a good idle position with a mere third-circle cultivation.

Levi immediately pulled out the information about the potion.

Deepwater Potion, a third-circle superior potion. Consumed before spiritual force liquefaction can increase the success rate by 8%. Price: 200,000 Aether Stones.

"Only 8%?" Levi frowned.

"That's right... so the price is also very cheap. It only cost 200,000 Aether Stones. After all, this is only a third-circle potion.

"The potions that can increase the success rate by 20% are all fourth-circle potions. There are not many fourth-circle pharmacists in the Witch's Family. Moreover, the raw materials for such a potion are extremely scarce.

"With Sir Levi's talent of reaching the peak of the third-circle before the age of 200, the success rate of taking this potion is definitely more than 50%. I think you can give it a try.

"Sigh, if I had a one-third success rate, I would have broken through without hesitation."

The witch Linda said enviously. Although she was the descendant of a Fifth-Circle Wizard, she was not very talented. Her achievements today were all because of the resources in her family.

"Forget it, I'll take it."

Levi was worried that if he missed this round, he would not have another chance.

In any case, 200,000 Aether Stones was not expensive. He would buy it first. If there were better substitutes in the future, he could sell this Deepwater Potion again.

Levi would not have to worry about finding someone else for the breakthrough potion. There would be a market at any time, and Levi would not lose money.

Levi wanted to pursue a more stable breakthrough, but many ordinary Third-Circle Wizards would be lucky to have potions. They did not care if it was a 10% success rate or a 20% success rate.

"Whether it's this Deepwater Potion or Madam Ye's Heart Potion that could increase the success rate by 20% at the Nether Capital auction some time ago, they can't compare to the Succubus Potion. That's a 30% success rate. With my talent, taking the Succubus Potion has a success rate of more than 90%. Unless it's especially unlucky, it's very difficult to fail."
