

Wizard 905

Chapter 905: Water Dragon's Song! Spiritual Limit Break! (1)

In the Endless Sea.

Outer sea region, Area 9.

Black Fire Island.

Levi chanted an incantation and released Leon.

"I'm tired. You can clean up the mess."

"Yes, Master." Leon, who was now a fourth-circle, rushed to the battlefield to help the other transcendent creatures.

Levi landed on the Black Fire Island and leaned against a huge rock. After setting up the array, he looked like he was paralyzed.

"The intelligence caused me harm. If I had known that this Black-Eyed Crow had a fifth-circle Wizard Tool... I definitely would not have come."

"Levi, oh Levi, you're still too arrogant. You've just killed a few fourth-circle wizards and you're already getting carried away."

"To be able to make it to the top ten of the Dark List in the outer sea region and become famous, he must have some trump cards."

"However, this trump card is actually a fifth-circle Wizard Tool. It's really unexpected..."

Most fifth-circle wizards might not even have fifth-circle Wizard Tools.

Especially since the Antiquity Age, with the depletion of mineral resources, precious materials for refining fifth-circle Wizard Tools had become increasingly rare.

As a result, many fifth-circle wizards in the current era used fourth-circle Wizard Tools. Those who could have fifth-circle Wizard Tools were either lucky or had strong family backgrounds.

In the mouth of some wizard civilization researchers, this phenomenon was known as the "Wizard Tool Degrades Phenomenon".

Due to the increase in the number of wizards and the decrease in resources, in the absence of new resource planes being discovered, wizards could only use backward compatibility when using Wizard Tools.

After becoming an intermediate wizard, it was common for a third-circle wizard to use a second-circle Wizard Tool, and a fourth-circle wizard to use a third-circle Wizard Tool.

Therefore, after Levi obtained the Great Black Sky Curtain, he did not deliberately pursue a higher-level Wizard Tool.

It was too expensive.

Moreover, he had the path of knights to make up for it, so he did not need to rely so much on a Wizard Tool.

However, he did not expect that the Black-Eyed Crow, the wizard who was vicious in the outer sea region, would have such a high-level Wizard Tool.

If he had the strength, he wouldn't go to the inner sea region but instead decided to use this in the outer sea region. Levi was very disdainful of such evil practices!

"Fortunately, we managed to survive."

After witnessing the 1,000-foot-long Fire Snake instantly kill Owens, a grade 4 Gray Swordsman...

Levi knew that he would not be able to take this attack head-on.

He wanted to enter the Ashen World, but it would take some time. By then, he would have been destroyed.

Helpless, he dived into the sea.

He hoped to use the seawater, which was a natural environmental factor to restrain the fire snake and to reduce its power.

The power was reduced.

However, Levi estimated that it was still 300 Cas of energy that could instantly kill most fourth-circle wizards.

After tearing apart his level 8 Earth Dragon Barrier, the maximum of level 9 Heavy Water Barrier, and blowing up his invincible Great Black Sky Curtain into pieces of tattered cloth, the remaining energy was at least above 200cal.

After all, even if Levi stacked all of his stats together, he would only be able to unleash the maximum impact of Destruction Sword Qi, which was over a hundred Cas.

The max level innate spell Fire Dragon Tribulation that he was so proud of only had more than 40 Cas.

That was why he was so sure that the Wizard Tool was a fifth-circle Wizard Tool. After the power of this spell was reduced layer by layer, it still greatly exceeded the scope of a fourth-circle Wizard Tool.

Fortunately, Levi's level 2 Fire Dragon True Body had strong fire elemental resistance and the protection of the Golden Snake Scales.

A layer of his flesh and blood was blown away, revealing his bones... A fatal injury could still be healed by him with the power of the Dead Ember Power.

But he didn't want to go through such a painful process a second time.

As for escaping in the form of a blood fog, it was even more impossible. With the power of the thousand-foot-long fire snake, if Levi turned into a blood fog, he would be burned to death on the spot.

Currently, his various Bloodline Seeds are somewhat depleted. In order to condense the Bloodline Dharma Body and kill the Black-Eyed Crow, he had almost exhausted half of his strength.

"The Great Black Sky Curtain is gone. Fortunately, the Black-Eyed Crow left me a fifth-ring Wizard Tool. This is still a bloody profit..."

Lying on the island, Levi saw that Leon and the others had yet to finish their battle.

He took out a gold coin and summoned Owens.

"What's going on? Why did I suddenly disappear just now..." Owens, who was only cool for three seconds, was dumbfounded.

"You're too weak. In the future, you can just fight some small fries. Go quickly." Levi pointed at the battlefield.

Owens immediately chanted the name of his ultimate skill and charged forward.

With Owens joining in, the remaining Black-Eyed Crow's subordinates were quickly slaughtered.

Half a day later, the battlefield finally calmed down.

The Black Fire Island had been razed to the ground in the war.

Fire Dragon Peak was almost destroyed.

Levi had finally rested enough.

He put away the transcendent creatures. These guys had suffered some injuries, but it was not a big problem.

Later on, Levi would refine healing potions for the transcendent creatures for them. At the same time, he would arrange various supplements for them. With their naturally powerful physiques, it was only a matter of time before they recovered.

Against powerful enemies, Levi would not allow these transcendent creatures to fight. After all, their main purpose was to refine secret medicine, participating in battles was secondary.

If they died, he would suffer a huge loss.

Levi used his blood fog form to inspect the transcendent creatures and his own body. After making sure that no tracking marks were left behind, he was relieved to clean up the battlefield and collect all the spoils of war.

Black-Eyed Crow was a member of the Black Sun Steeple. He had already cultivated the fourth-circle realm and should already be a middle-level backbone.

Levi guessed that if he had left a soul token at the Black Sun Steeple, the wizards of the Black Sun Steeple would have known.
