

## Wizard 906

Chapter 906: Water Dragon's Song! Spiritual Limit Break! (2)

Therefore, he thought about it and decided to leave the Black Fire Island in case the people of the Black Sun Steeple came looking for him.

"The current situation is chaotic. There are still three years before the final battle between Sorrett and the Blue Dragon Lady. During this time, I can still become stronger so that I can be absolutely safe."

Levi pondered.

Then, he left Area 9.

He had returned to the Hundred-Eyed Demon Territory, and he still had an unknown paradise.

That was the sea of lava.

The Fire Elemental Spirit had headed to the Forsaken Land of the God and it might have already died there.

There were no other dangers in this sea of lava.

Moreover, Ace's fire elemental spirit was already at the peak of level 1. He needed a place with dense land of underground fire to break through to level 2.

Levi felt that this was the perfect place.

Of course, there was another important reason.

In the Black-Eyed Crow's storage items, Levi found an unfinished [Poison Fire Corpse Demon] and a book titled "The Franken Wizard's Corpse Demon Book".

It was mentioned that one of the steps in the refinement of demonic corpses was to temper them in the land of Earth fire.

That place was perfect.

Half a month later, Levi arrived at the magma ocean.

He opened up a shelter on the shore.

After that, he set up all the arrays and did a good job of concealment and protection.

He placed all the spoils of war on the ground.

After taking stock, he had about a million Aether Stones.

"Why are there so few? This Black-Eyed Crow is much stronger than the Master of Flames. But he only has one million Aether Stones..."

In fact, one million Aether Stones was not a small amount. However, Levi was worth two million now, and he had just killed the Black-Eyed Crow with great difficulty, so he felt that one million was a little too little.

Levi checked all the loot storage bags to make sure that he did not miss anything.

"Could it be that he used all of it on the [Poisonous Flame Corpse Demon]?"

In the corner of the shelter, there was a huge crucible filled with green poisonous water and some materials that Levi could not name.

There were medicinal herbs, ores...

Judging from the luster emitted by these materials, they were not ordinary items.

Levi even saw a small piece of elemental metal that he had once used to refine the Crimson Dragon Slaying.

"Heavenly Fire Meteoric Metal... This prodigal thing used such precious minerals to refine a corpse demon."

Levi could not help but curse.

However, scolding was scolding. This demonic corpse was already at the final stage of refinement, so he couldn't break it off just like that.

In the next three years, he planned to study the Book of Corpse Demons. Otherwise, the Black-Eyed Crow's hard work would be wasted.

Other than the Aether Stones, there were also some Wizard Tools that Levi did not care about. He planned to get rid of them when he returned to the Star Sea after he attained the fourth-circle realm.

"Three million Aether Stones... With a fourth-circle status, I'll be able to roam freely for a very long time. This is awesome."

Levi happily weighed the storage bag.

After tidying up his lackeys' bags, Levi rummaged through the Black-Eyed Crow's bag.

He found the fifth-circle Wizard Tool that had caused him so much trouble.

It was a snake-shaped ring with its head and tail connected.

The surface of the ring emitted an ancient luster. It was obvious that many people had used it before, and it felt like they had been blessed.

"A fifth-circle Wizard Tool, but it needs to be appraised. There aren't many appraisers who can appraise Wizard Tools of this level. I wonder if Newt can do it..."

This Wizard Tool shouldn't belong to the Black-Eyed Crow.

On the inner side of the ring was a snake-shaped pattern that was obviously the clan emblem.

It looked like an inherited Wizard Tool from a wizard family. The Black-Eyed Crow must have had someone appraise it, so he knew how to use it.

"Devo clan... The Endless Sea is too big. Since the Black-Eyed Crow could use this, I think the inheritance force behind this Wizard Weapon should have been destroyed. If I take it, there won't be any danger."

Levi could not use this Wizard Tool now. Even if he had the incantation and the method to use it, with his strength as a third-circle wizard, he would definitely not be able to use a fifth-circle Wizard Tool.

"This way, the problem of the Wizard Tool after advancing to the fourth-circle will be solved. The Black-Eyed Crow is a good person, giving money and equipment."

He carefully put away the Wizard Tool.

Levi continued to search for treasures in the Black-Eyed Crow's bag.

The rest were some casting materials and some cultivation potions.

Suddenly, Levi found a beautiful crystal box in a corner.

In the translucent box, there was a mini blue dragon that seemed to be formed by water. It was spinning inside, and there was a faint sound of water splashing.

It was as if there was an ocean in this small crystal box.

Levi's breathing became a little hurried.

"This thing... Could it be a Truth Oddity?"

He carefully took out the crystal box. The blue water dragon moved around inside.

Countless blue runes were born and destroyed in it, giving off the feeling of a world in water.

"It probably is."

Levi remembered fifteen years ago when he had settled down in the Nether Capital, it was said that a disciple of a primordial soul wizard family was killed and robbed for possessing a Truth Oddity.

Later on, because of the Truth Oddity, a small-scale bloodbath was stirred up in the Star Sea.

Countless intermediate wizards had joined the fight.

After all, even the lowest-level Truth Oddities were extremely useful to intermediate wizards.

Later on, Levi only heard that the Truth Oddity had been snatched away by a passing dark wizard.

Who would have thought that this dark wizard was actually f\*cking Black-Eyed Crow?
