

Wizard 907

Chapter 907: Water Dragon's Song! Spiritual Limit Break! (3)

"I didn't fight for it. After going around in circles, the strange item still ended up in my hands. This is life... What does this mean? This means that this item is fated with me and should belong to me!"

Levi was secretly delighted.

"But I can't be sure. I should go and find some information about the wondrous object first. If it isn't a Truth Oddity, I'll be happy for nothing, or if I refine it randomly, I'll go berserk or something."

When it came to Truth Oddity, Levi had to be careful.

"Fifth-circle Wizard Tool, a Truth Oddity, and the three treasures that Sauron created... I, Levi, am also full of treasures. In the future, I must not be rash. Otherwise, if my treasures are destroyed by others, the gains will not make up for the losses."

"If this is a Truth Oddity, even if it's of the lowest quality, I should be able to achieve a 100% success rate with the Succubus Potion. There's no chance of failure!"

"Even if I don't use the Succubus Potion, I should have an 80% success rate with the Deepwater Potion."

"However, since I already have the chance to obtain a succubus and advance to the fourth-circle without a hitch, I'll wait a little longer."

The next day.

Levi sat in the shelter, reading the “Book of Corpse Demons” with great interest.

Interestingly, the author of this book was the same person as Levi’s “Franken Wizard’s Monster Manual”.

They were all Franken wizards.

This author was proficient in the two major factions of life and death, so he should not be an ordinary person.

In the “Book of Corpse Demons”, there was a detailed introduction to the refinement of man-made undead monsters like Corpse Demons.

In short, the corpse demons were similar to the zombies in Levi’s previous life.

In essence, it was similar to the Seal of Hell that Levi had learned when he was an apprentice.

However, the level of a corpse demon was much higher than that of the living dead.

The strongest living dead of the Seal of Hell were only at the level of the first-circle.

As for demonic corpses, the weakest one was at the level of the first circle.

This Book of Corpse Demons divided corpse demons into five levels.

For example, the Poison Fire Corpse Demon that the Black-Eyed Crow had refined could be considered a level-four corpse demon. Its strength was not inferior to that of a fourth-circle wizard.

A level-five corpse demon was also known as a Corpse Demon King. It was a terrifying monster that could go head-to-head with a fifth-circle wizard.

However, the conditions for crafting it were also extremely harsh, and the cost was high. It was even more difficult than crafting a fifth-circle Wizard Tool.

In the current Wizard World, even the wizards of the Death Sect rarely refined these corpse demons.

"It just so happens that my Meditation Art has reached the Maximum. In the next three years, besides cultivating the breathing technique, I'll refine this corpse demon as well. That way, I'll have another trump card."

Levi calmed down and began to study the "Book of Corpse Demons".

After studying it, he discovered that the refinement of this corpse demon was actually similar to the refinement of alchemical creatures.

For Levi, who had attained third-circle Weapon Refinement skills, it was quite easy for him to learn.

Time passed quickly.

Cultivation always made Levi forget the passage of time.

In the blink of an eye, a year had passed.

On this day, in the shelter.

Levi sat cross-legged in front of the crucible used to refine the corpse demon.

"Sir Riemann, you died a horrible death... However, you can go without worry. I've already taken care of your lover, the Lush Forest Witch. I'll visit her from time to time... It was the Black-Eyed Crow who refined you into a corpse demon. I was just pushing the boat along the current."

After saying that, Levi began to chant a complicated incantation and threw the materials into the crucible.

The poisonous water rolled, bubbled, and spun, transforming into all kinds of terrifying scenes.

In the end, all the poisonous water seeped into the corpse demon's body.

A dark green corpse appeared at the bottom of the crucible.

Coin-like runes were stacked on top of each other on the corpse's body, flickering non-stop.

"Although it was not refined from the corpse of a body-refining wizard, after the penetration of the poisonous water and the metal power, the strength of this corpse demon's body is not inferior to my third-circle Metal Voodoo. Moreover, it also contains a lethal poison..."

After a year of refining, the third last step of the Poison Fire Corpse Demon was completed.

"Next, I'll put it into the underground fire to temper it at all times. I'll strengthen my body further and give it the ability of fire."

Levi walked out of the shelter and went to the sea of lava. He found a place with a lower temperature and began to refine.

When the corpse demon could gradually adapt to the higher temperature, he began to move deeper into the sea of fire.

Time flew by.

Not long after.

Ace, the Fire Elemental Spirit, had also successfully advanced to level 2, although it was useless to Levi... However, with the help of the Aether Stones, he could at least barely activate Tyrant III, reducing the consumption of the Aether Stones.

As for Levi, he finally found an ancient book that introduced Truth Oddity in a nearby market.

Truth Oddities were rarely repeated. They were all unique.

However, some low-level Truth Oddities could be born repeatedly in some areas, even though the cycle of their reappearance might be thousands or even tens of thousands of years.

Just as he had guessed, Levi had obtained the [Water Dragon's Song], which was the lowest earth-level Truth Oddity.

Even so, this was still a priceless treasure.

After confirming that it was a Truth Oddity, Levi started to learn the general method from the ancient book and tried to refine it.

It was because the Black-Eyed Crow was not from the Ocean Faction. Otherwise, this thing would have been refined by him long ago.

On this day, in the shelter.

After he was ready, Levi took out the blue water dragon from the crystal box.

As soon as the water dragon appeared, it tried to escape but was stopped by the array Levi had set up.
