

Wizard 909

Chapter 909: Water Dragon's Song! Spiritual Limit Break! (5)

No wonder the Black-Eyed Crow spent so much effort and money to refine this thing.

This power was indeed enviable.

Just the strength of the Poison Fire Corpse Demon alone was enough to rank in the top ten of the Dark List. Coupled with the strength of the Black-Eyed Crow himself, if he really refined it, not many people in the outer sea region would be his match.

Immediately after, Levi had the Poison Fire Corpse Demon not move and use its Poison Fire ability and attack him with its physical body.

Boom! Boom! Boom!

The two monsters that looked like ferocious beasts were rampaging at the bottom of the sea. Pieces of underwater reefs were shattered under the impact of their fists.

Fifteen minutes later.

Levi stopped in his tracks, his face filled with excitement.

"There aren't many body-refining wizards who can fight head-on with me. This Poison Fire Corpse Demon, coupled with the perfect fusion of the Metal Voodoo, is comparable to a body-refining wizard like Barzan."

After the test, Levi placed the Poison Fire Corpse Demon in the sea of lava with satisfaction.

This allowed it to absorb the power of the underground fire on its own in case of emergency.

This Poison Fire Corpse Demon was equivalent to a low-level version of Levi. It also had both body tempering and spells.

"The foundation of the body of this Poison Fire Corpse Demon is still not enough. If I use the body of a body-refining wizard or an Ancient Saint... It would probably be better when the old lizards of the Senior State Assembly die of old age. I will use them to refine corpse demons. This way, their corpses won't be wasted. Wouldn't it be beautiful to refine dozens of Poison Fire Corpse Demons?"

Of course, Levi could only fantasize about it. Refining corpse demons consumed a lot of resources and time, and he could not mass-produce them.

"With this corpse demon as a trump card, the trip to Riptide City will be much safer."

Levi returned to his cave abode. There was one more thing he needed to do before he could leave for Riptide City.

That was to completely refine the Truth Oddity, Water Dragon's Song!

In the shelter, Levi entered a meditative state.

In his mind, on the wall of the Divine Ring Tower, a blue water dragon was imprinted on it, burning fiercely.

This was the Truth Oddity that Levi had already refined into his mind.

In Levi's eyes, the Truth Oddity was not some kind of substance. They were more like a law, a magical object that contained natural knowledge and truth, a pure natural spell model.

After two years of refinement.

Levi already knew most of the uses of the [Water Dragon's Song].

Firstly, this Truth Oddity could increase the success rate of a third-circle wizard's breakthrough by less than 10%. Its effect was similar to the [Deepwater Potion], but it could be stacked.

If Levi had taken it when he was breaking through from his second-circle realm to the third-circle realm, he should have been able to increase his success rate by 30%.

In short, this kind of low-level Truth Oddity did not increase the success rate of an intermediate wizard very much.

The most important function of [Water Dragon's Song] was not to increase the rate of breakthrough.

Instead, after refining it, Levi could increase the power of all water element spells by another 10%.

Apart from that, while Levi was studying the third Ocean Faction's innate spell.

This Truth Oddity had magically fused with the spell model he had researched, automatically perfecting and complementing his spell model.

Levi even suspected that even if he did not study the spell model, he would still be able to directly comprehend an innate ability after refining the Water Dragon's Song.

This was the heaven-defying power of the Truth Oddity!

However, Levi considered that this was only the lowest-level Truth Oddity, and it might not be able to achieve the effect of the top-grade innate spell he wanted. Therefore, he ultimately decided to rely on the spell model he created himself as the main and use the Truth Oddity as a supplement.

Just like that, Levi created his third Ocean Faction innate spell.

This was because this Truth Oddity was called [Water Dragon's Song]. At the same time, it was to complement the Earth Dragon Barrier and Fire Dragon Tribulation, making it sound better.

Thus, he named it "Water Dragon's Song"!

Levi-

[Water Dragon's Song (Third Talent): Level 9 (Maximum)]

Water Dragon's Song, innate control spell.

After casting the spell, a blue Divine Dragon formed by water flow could be formed around the enemy, binding the enemy. The control of time was related to the difference in cultivation between the two parties.

Perhaps it was because he had refined [Water Dragon's Song], but Levi had long since mastered this newly born innate spell. It was maxed out the moment it was born, saving him a dozen or even decades of practice.

He finally understood why everyone was so eager to obtain the Truth Oddity.

Just a low-level Truth Oddity could allow a third-circle wizard to create an innate spell out of thin air, saving so much time for spell research and a tough cultivation period.

It was hard to imagine how powerful a radiant sun-level Truth Oddity like Deep Blue Sage's would be.

For the next few days, Levi digested his gains while making preparations for his next trip to Riptide City.

Gradually, Levi realized.

The Aether Meditation Art was already at its Maximum.

However, while he was meditating, his Gas spiritual force magic ring was still slowly increasing.

His mood changed from doubt to ecstasy.

He discovered that the Water Dragon's Song had an unexpected function.

"Increase the upper limit of spiritual power."

In the end, this growth lasted for three months before it was completed.

When the Gas magic ring was completed once again and no longer changed.

Levi placed his hand on Klein Crystal.

[Spiritual Force: 210]

[Spell Power: 8400]

"As expected, I clearly haven't reached the fourth-circle state yet, but my spiritual power is still Gas... However, my spiritual force limit has increased by 10 points! My spell power also increased!"

"This means that when I break through to the primordial soul realm in the future, my success rate will be higher than others... by one percent!"

Levi calmed himself down and thanked the Black-Eyed Crow.

After destroying the shelter, he took the Poison Fire Corpse Monster and headed for Riptide City.

"Riptide City... This time, we have to give Sorrett a big surprise.
