

Wizard 915

Chapter 915: Help Me Cultivate! (1)

On the deserted island.

The Thunder Dragon auction venue was in chaos.

The members of the Thunder Dragon family and the demons were killing in all directions. Countless innocent wizards had died on the spot.

Naturally, these wizards would not sit still and wait for death. They used their own methods to defend themselves.

Blue Dragon Lady and Sorrett were furious. The terrifying fifth-circle innate spells collided in midair, turning the venue into a world of lightning and frost.

Some unlucky people were accidentally sucked into it and turned into ashes.

Just as everyone was fighting to the death...

Levi, who had waited three years for this, had done the bravest thing he had ever done.

He snatched a Fifth-Circle Wizard's woman away in front of him.

The fifth-circle Thunder God's net array was shrinking. Levi had already found a relatively weak point in the array during the chaotic battle.

"Guards, stop him! Don't let anyone go!"

Sorrett commanded as he dealt with Blue Dragon Lady.

As long as one person escaped, his collusion with the demons might be exposed.

If news were to spread to some big shots, even if big shots were protecting his Thunder Dragon Family, it was inevitable that he would be imprisoned.

After all, different giants had different standpoints. They were all waiting to grab hold of the other party's weakness and embarrass him.

The Thunder Dragon Family sent out some men to attack Levi.

A Third-Circle Wizard led a team over aggressively.

Levi prepared to break the array while letting the Four King Kongs protect him.

The Poison Fire Corpse Demon suddenly charged into the enemy formation. It opened its mouth and spat out endless flames.

Those low-level wizards all used their own force fields to resist or dodge.

However, the power of the poison fire was comparable to a fourth-circle spell. In the end, more than half of the wizards who rushed over died.

Immediately after, the Mind Flayer, who had lost his body, found an opportunity to enter the Poison Fire Corpse Demon's body as a temporary shelter.

With the protection of the Poison Fire Corpse Demon's powerful physical body, he was able to use his mind spells fearlessly.

Under the Mind Flayer's mind control, some low-level wizards switched sides and attacked their teammates.

Leon, on the other hand, was like a face-hugging bug. He pounced on the wizard's protective force field and began to gnaw on it. It was very terrifying.

"Meteor Sword Fall... Supernova Slash... Flying Sky Stab!"

As Owens raised his hand and slashed down, he also took the lives of the wizards.

"Tyrant, quickly pick up the storage items."

Levi's heart ached.

These guys didn't know that if they didn't loot the corpse, there was no point in killing!

With the Four King Kongs guarding the array, Levi revealed the true form of the Giant Dragon Warrior. His body kept expanding. He needed the greatest strength to break this array!

On the Crimson Dragon Slash, pitch-black sword qi mixed with flames.

Break!

Wherever the sword qi passed, a deep ravine was plowed out on the island!

Crack! Crack!

The sword qi and lightning net expanded.

The sword qi was annihilating, and the terrifying lightning was dissipating.

Levi slashed three more times in a row!

Nightmare Form and Nine Swords Form appeared one after another!

Each strike was fiercer than the last.

A small gap finally appeared in the grand array, and it was still healing rapidly.

Levi put away the Poison Fire Corpse Demon and the others.

The Earth Dragon Barrier, Heavy Water Barrier, and the protection of the Golden Snake Scales all appeared!

The moment he entered the gap in the lightning net.

Under the terrifying aftershock of the lightning, the Earth Dragon Barrier quickly shattered, and the Heavy Water Barrier trembled and cracked.

At the same time, a sense of danger came from behind.

A giant purple Thunder Tiger pounced at Levi with bared fangs and brandished claws, emitting terrifying fluctuations of fifth-circle spells.

Fifth-circle spell, Thunder Tiger!

It was Levi's advanced spell of the Thunder Snake Technique in the future.

At the scene, the one who could use this attack was naturally Sorrett, who was fighting Blue Dragon Lady.

He used his protective force field to withstand the Blue Dragon Lady's attack. He also wanted to cast a spell to kill Levi here.

"Silver Storm!"

Owens' expression was flamboyant as he descended from the sky. With the strength of a Gray Swordsman in the fourth stage, his sword slashed at Thunder Tiger without hesitation!

Boom!

The silver sword light collided with the Thunder Tiger like a hurricane.

A portion of the Thunder Tiger's strength had been obliterated. Owens had also sacrificed himself again under the power of the lightning and vanished into thin air!

This was his last big move for Levi!

The remaining Thunder Tigers passed through the lightning net and pounced at Levi.

The Bloodline Seed in Levi's body was circulating at high speed.

The Divine Ring Tower in his mind was also spinning crazily.

With the consumption of spell power, innate spells were cast one after another.

Earth Dragon Barrier!

Fire Dragon Tribulation!

Water Dragon's Song!

There was a khaki Divine Dragon, a scarlet Divine Dragon, and a sea-blue Divine Dragon.

The three completely different Divine Dragons used different methods. Some collided with the Thunder Tiger, some protected Levi, and some wrapped around the Thunder Tiger.

Levi's bloodline avatar slashed out again!

Sword qi swept out!

It collided with the remaining Thunder Tigers.

As the Thunder Tiger devoured the sword Qi, its body was also destroyed and became even weaker, but the remaining might was still there.

Boom!

Thunder Tiger crashed into Levi.

In just a moment, Levi's body was charred black and turned into charcoal.

The golden scales that he was so proud of were also unable to defend against this lightning spell and were directly shattered.

His flesh and blood were carbonized under the high temperature and turned into ashes. The lightning continued to spread and burn.

Bang!

At the critical moment.

Levi's entire body exploded.

It did not turn into blood fog, but blood-colored flying dragons that filled the sky.

This was a life-saving skill of his Scarlet Poison Body. Levi had never used it before.
