

Wizard 925

Chapter 925: Successful Potion Concoction! (5)

"He has left. If there's a chance in the future, I can bring him to meet you," said Triss.

"Thanks a lot."

Passing through the Immortal Banyan Dragon's mouth which shone brightly, Triss was already in a strange space.

This was the small world inside the Magic Tree.

It was also the true core of the Witch's Family.

Only primordial soul wizards were qualified to step into this place, but only during meetings.

Only one person was cultivating here.

That was the Witch of every generation.

The witch of this generation was Lady Vielana, a kind-looking witch granny.

There were already 10 primordial soul witches sitting around the Lord Witch, eating fruits and chatting like a group of witches having a picnic.

"Triss, you're almost here. You're the only one left," a primordial soul witch said with a smile.

Triss nodded and found a spot. Her slender white legs stretched out from the pharmacist's robe as she sat on her side, looking elegant and beautiful.

"Except for the Flower Witch Elena and the Cat Witch Caitlin who are traveling outside, everyone is here."

Aside from witches, there were a total of 13 primordial soul witches in the Witch's Family. Each witch had a unique name, and Triss was the Medicine Witch.

These 13 primordial soul wizards were the strongest strength of the Witch's Family. They were the foundation of the six towers.

The eighth-circle witch was the leader of the 13 witches.

"The content of this meeting is related to the Dark Ancient Tower. According to the information I received from a senior from the Ocean School of Thought in the Central Realm, the Dark Ancient Tower should be open thirty years later.

"Thirty years passed in the blink of an eye. So far, after all these years of searching, we have found a total of twenty-three keys. There might be new keys discovered in the future, but there won't be many

more. According to past experience, the concentrated eruption period of the ancient tower keys has passed.

"Therefore, regarding the allocation of entry slots, other than the three primordial soul wizards, there are still 20 slots. What do you think?" the witch asked.

"We have to send some Fifth-Circle Wizards, but we can't send too many. Every Fifth-Circle Wizard is a potential primordial soul seedling, so I suggest leaving some space for those Fourth-Circle Wizards... As for Third-Circle Wizards, their cultivation levels are too low. It would be a waste of spots to go," Triss said.

"I agree with that. You can suggest the list that you think is feasible. We'll discuss according to the situation of these people and finally choose 20 witches to enter," said the witch.

"External wizards can go too, right?" Triss asked.

"Triss, you want to fight for a spot for your son, don't you?" said a tall and gorgeous witch with narrow eyes.

She was the Snake Witch, Selene.

"That's right." Triss looked at Selene.

The smell of gunpowder between women began to fill the air.

"Alright, the two of you are starting again... If Anya can enter the fourth-circle before the Dark Ancient Tower opens, I agree. However, Triss, you have to think carefully. The Dark Ancient Tower has certain risks," reminded the witch.

"I understand, Lord Witch." Triss nodded and said, "Lord Witch, I have another suitable candidate. He's also an external wizard. The Levi I mentioned to you before... He's a dragon descendant. He's proficient in body tempering and spells. He'll be able to enter the Fourth-Circle Wizard realm before the dark ancient tower. Be it strength or intelligence, he's extremely suitable to enter."

"Triss, why don't you just let a group of male wizards go in!" The Snake Witch said unhappily. "We are the Witch's Family, not the family of wizards. Don't forget this!"

Triss looked at the Snake Witch and said calmly, "When Levi was carrying out a mission as a Third-Circle Wizard, he stopped a fourth-circle dark wizard by himself and successfully escaped from him to save his teammates.

"I'm sure all of you know how big the gap between the third-circle and the fourth-circle is. If he advances to the fourth-circle and relies on the advantage of body tempering and spell dual cultivation, who do you think is more suitable to go to the Dark Ancient Tower than him among the Fourth-Circle Wizards?"

"Don't forget, the environment of the Dark Ancient Tower is complicated and ever-changing, and there is a huge gap between each level. Some places are extremely disadvantageous to ordinary spell wizards.

"During the last trip to the Dark Ancient Tower, we lost a Truth Oddity because we lost to the mixed-blood body-refining wizards of the Sea Clan from the Ocean Abyss Alliance, who are also the 'male barbarians' you mentioned.

"For so many years in the Witch's Family, other than Elena, which witch would learn the so-called 'body tempering techniques' that only wizards practice?"

"Moreover, Levi had relied on himself to get from the lowest level of the wizard organization to where he was today.

"Whether it is his combat ability or his ability to compete with those high realm wizards, many witches in the tower cannot compare to him.

"I think that we should give the male wizard a chance as long as it can bring us more benefits.

"Why did our Witch's Family gradually fall behind among the six towers? Because when we were recruiting, we naturally eliminated half of the wizards, even though there might be true geniuses among them.

"If you still insist on abiding by these meaningless rules at this point, I have nothing to say!"
