

Wizard 927

Chapter 927: Advancing to the Fourth-Circle! (1)

The purple pill emitted an alluring fragrance.

Levi swallowed his saliva and had the urge to take it immediately.

"Just by smelling it, my spiritual power is rising as if it has instantly reached its peak... As expected of the best breakthrough potion!" Levi sighed in his heart.

As long as it was refined into a potion, there would be no time limit of 24 hours.

"It's a pity that these materials have only been used once, but it's already extremely heaven-defying... Could this be luck?"

Looks like I have to learn the Lovers Rune after I advance to the fourth-circle. If this metaphysics is useful, it will be quite beneficial to my trip to the Dark Ancient Tower!"

Levi put away the potion and opened the proficiency panel.

Just as he had imagined, his pharmaceutical skills had already broken through the limit and advanced in advance.

Levi—

Pharmacy: Level 13 (1/500,000)

"According to my previous pattern, pharmaceutical skills, level 1 to level 6 correspond to pharmacist apprentices, levels 7 and 8 correspond to senior first-circle pharmacists, and so on. Level 13 corresponds to ordinary fourth-circle pharmacists... So, I advanced in advance."

Levi still remembered Ms. Marlene's teachings.

A First-Circle Wizard could be a Second-Circle Pharmacist at most.

However, starting from the Third-Circle Pharmacist realm, one needed to have the cultivation of a wizard of the same realm. This was because, for Third-Circle Pharmacists, it was very difficult to refine and control the refinement process of potions without the same realm of spiritual power.

Levi was now at the third-circle Perfection realm and had become a fourth-circle pharmacist in advance.

There was only one explanation for this.

"The Truth Oddity allowed my spiritual power to reach the level of a Fourth-Circle Wizard at 210 points in advance. Although I didn't liquefaction, with the help of the Epiphyllum Potion, I successfully refined a fourth-circle potion and advanced to the fourth-circle level."

This was a pleasant surprise for Levi.

He was in a good mood as he walked out of his seclusion.

While he was in seclusion on the Ancient Saint plane, Levi's fourth-circle spell model, Thunder Afterimage, had already been constructed.

In his mind, around the Gas magic ring, a lightning-shaped spell model that was obviously larger than the other models was slowly rotating.

This was the first fourth-circle spell that Levi had mastered. In the future, he would use this spell as the foundation to create his fourth innate spell.

Miraya appeared beside Levi and asked with a smile, "Master, how is it? How does my Crimson Water... taste?"

"It tastes good."

"Understood." Miraya pouted and followed behind Levi.

"Follow me from now on. It's best if you transform into a human so that you won't cause me any trouble," Levi said.

Miraya nodded and transformed into a woman with bronze skin. She wore refreshing purple clothes and exuded a wild beauty.

"Yes, yes. This is not bad. You just have to look like this in the future."

"I'll listen to Master's instructions."

Most of the time, the succubus had to be in Alice's ring. She did not have the powerful disguise ability like Mind Flayer. It would be a huge crime for other wizards to discover Levi raising demons!

On the other side.

The Poison Fire Corpse Demon was still conscientiously smelting the Blood Demon Meteorite Iron.

"When the divine weapon is completed, I can leave this place. Before that, I'll solve some problems in the human world."

Levi took out the storage bags he had obtained from Bo Gang and searched inside.

He discovered some ancient Meditation Arts and spells. The style was different from modern wizards.

"The combat power of the Cave Wizards should be a little inferior to modern wizards. The ancient wizard civilization can't be compared to the current one." Levi heaved a sigh of relief.

"The most important thing now is to gather the Senior State Assembly and train the Purgatory Ghost Killing Array to prevent the experts of the Forsaken Land of the God from finding us!"

Levi relayed the order to Messenger, and the Feathered People flew in all directions.

Not long after, the Wing King and Feather King arrived at Emperor Palace first.

"Greetings, Emperor!"

The Wing King felt the vast power of the Emperor on the Inferno Throne and was incomparably shocked.

"My strength has improved a lot compared to more than ten years ago. I thought I could get closer to Lord Emperor, but now it seems like I'm getting further and further away..."

The Feather King's heart was the same.

This was an emperor!

He would always become stronger. He was not a god, but he was better than a god!

"Report to me everything about the Psionic Academy, the Senior State Assembly, and the materials I asked you to collect," Levi said in a dignified voice.

"Let me explain," The Feather King said.

Then, while waiting for the other Ancient Saints, Levi listened to their reports.

Finally, a satisfied smile appeared on his face.

This group of Lizardmen was quite good. They had already found 24 types of materials to refine the fourth-circle meditation potion on the Ancient Saint plane.

Moreover, they took the initiative to send people to protect all the places where these potions were born. They established Emperor Resource Points in the Ancient Dragon Empire and regularly sent people to the resource points to collect resources to prevent them from being destroyed by natural and man-made disasters and ferocious beasts.

So far, there were a total of 24 resource points established in the entire Ancient Saint plane. Among them, first-circle to fifth-circle herbs were distributed. There were also some resource points with extremely small amounts of high-level herbs.

The Ancient Saint plane was a small plane, and the elemental power was not very rich.

Therefore, the quality and upper limit of various precious resources were not very high.

However, because it had not been developed yet, there were many low-level and intermediate-level resources.
