

Wizard 929

Chapter 929: Advancing to the Fourth-Circle! (3)

After all, be it in the human world or the Wizard World, fifth-circle existences were not cabbages.

"In that case, if an unknown existence from the Forsaken Land of God comes, with the help of the Glory of the Four Kings and the Purgatory Ghost Killing Array, as long as it's not a Fifth-Circle Wizard, they won't be able to return. Even if a fifth-circle comes, if they can prepare in advance, they will have the strength to fight!"

After Levi finished this long-awaited task, the smelting of the Blood Demon Meteorite Iron was also completed.

Levi took over the work and began to forge a new divine weapon suitable for the Scarlet Dragon Breathing Technique.

As such, time flew by.

The 99th year of the Great Expedition.

In the year 1130 of the Holy Brilliance Calendar, the Month of Beginning quietly arrived.

Today was the first day of the Month of Beginning.

It was Levi's 140th birthday.

As he grew older, Levi began to learn to enjoy life.

For example, on this birthday, he was no longer alone.

The succubus was wearing the clothes of a stripper and dancing energetically.

Occasionally, she would lie on Levi's back with her chest pressed against his back. Her cherry lips would exhale a fragrance beside Levi's ear as she sang softly, making one blush.

Occasionally, she would sway in front of Levi, exuding an exotic charm.

Algerta cheered by the side, while Tiga turned his head, not daring to look straight at him. To someone as old-fashioned as him, this was indecent.

In addition, the transcendent creatures in Levi's Alice's ring, be they active or retired, had accompanied Levi all the way here. They surrounded him and watched the show, which made the succubus twist even harder.

"Master, how's my dance?" the succubus asked teasingly.

"It's pretty good... There's no technique. It's all flirtatious," Levi commented objectively.

"Wow, thank you for your praise, Master. I'll work harder." Succubus' values were different from humans. The more Levi said that she was flirtatious, the more excited she became.

After his birthday, Levi held the 28th round table meeting of the Twilight Knights.

There were a total of eight members participating in this meeting.

When he was in the human world, Levi had already taken the time to interview Dark Moon Knight Radel, who had just broken into legendary and got his mark.

Therefore, the Dark Moon Knight was also qualified to participate in the round table meeting.

Not long after, all eight members arrived. Everyone had different expressions but they were filled with confidence and hope.

"Since a new member is joining us this time, Dark Moon Knight should introduce himself before the meeting begins." Levi looked at the middle-aged knight who was a little uneasy.

Every legendary knight who had just participated in the round table meeting would be more or less nervous.

This was especially so for the younger generation like the Dark Moon Knight. They were able to sit at the same table as the Blood Knight and the Black Knight and discuss the important matters of the Dusk Holy Temple. They could even see the commander who had stepped into the supreme realm of knights and see the glory of a supreme knight.

Now that he saw him, he was indeed extraordinary. He was tall and mighty, and there was a heroic spirit between his brows. He was like a God of War who had descended to the mortal world!

"Seniors, I am Radel, from the Hodgson Family of the Star Empire..."

After the Dark Moon knights finished their introductions, Emperor Mu looked at the eight knights in front of the round table and sighed.

"Back then, when the commander and I first established the Knights, there were only three legendary knights. Now, there are already eight of us, excluding our commander... When Elsa joins, there will be nine of us. This table can only accommodate 18 of us. Commander, what should we do if more legendary knights are born in the future?" Emperor Mu asked.

"If there are more and more people in the future, there will be competition. Only the 18 strongest people can participate in the round table meeting. In this world, strength is the most important... For now, the prerequisite for all of this is that the quality of the knights will be recognized by me and everyone else. Therefore, you can't slack off in your cultivation. You're the first to embark on this path. Your starting point is already higher than many people, so you have to be an example."

"Understood. This is a little exciting," the Black Knight said with a smile.

"By the way, Emperor Mu, how's the war in the Realm of Ice?" Levi asked.

"Currently, the dark wizards are still in charge. Some cities have been taken back by the righteous wizards. Elsa and I are in the Snow Capital now. We're waiting for you, commander. The Snow Capital is the city of the righteous wizards. You can come here without worry, commander," Emperor Mu said.

"That's good. I see that you've been looking a little weak recently. Don't fall behind in your cultivation," Levi reminded.

Mu Di's face turned red. "Recently, the battle has been too intense and I've consumed a lot of energy... Oh right, commander, my cultivation speed is a little slow now. Perhaps it's because of the quality of the secret medicine you mentioned. I found a peak second-circle Iceberg Giant Ape in the Realm of Ice some time ago. I need your help."

Levi replied, "No problem. However, the Saint Ape belongs to the earth element. Under normal circumstances, the Iceberg Giant Ape belongs to the frost element. The effect might not be as good as the first-circle Red Sand Ape secret medicine you're using now."

Currently, the source of secret medicine for the members of the Dusk Holy Temple mainly relied on the creatures in the mortal world or used the resources at hand to exchange for secret medicine ingredients in the holy temple. The secret medicines in the holy temple were all ingredients that Levi obtained from killing and robbing people. They were not used for his elimination.

The Ancient Saint plane was filled with lizards, snakes, and other reptilian transcendent creatures. There were very few beasts, so it was impossible to satisfy all the knights.

However, when the Dark Wave recovered further in the future and the elemental power became richer, transcendent creatures in the human world should gradually appear.
