

## **Wizard 931**

Chapter 931: Advancing to the Fourth-Circle! (5)

Levi discovered this phenomenon when he first entered the Ashen World. Only the storage space that contained dead things could be opened.

Unless the transcendent creature space was built on other planes, it could not be opened on other planes.

So far, according to the wizards' research, there were only two types of living spaces that could be opened without the restrictions of any plane.

The first type was a Spiritual Space similar to the School of Spiritualism. This kind of space was rather special. It was opened up in the body on its own. It was equivalent to space being a part of the body.

The second type was the "Legendary Demi-plane" of Legendary Wizards. Needless to say, it was essentially a higher-level internal space.

Watching the transcendent creatures gradually disappear into the forest, Levi turned around and left.

Holy Brilliance Calendar Year 1130, Month of Flowers.

The human world was already full of vitality and the season for all living things to grow. However, in the Frost Realm, it was still a world of ice and snow.

This was a world filled with frost elemental power. Only plants and animals that had adapted to extreme cold could survive here.

After waiting in the human world for a few months, Levi did not see the existence of the Forsaken Land of the God come to find trouble.

There was a high chance that the other party knew where his plane was, but he was delayed by something.

However, Levi couldn't wait any longer. In any case, there was the Senior State Assembly there, so there shouldn't be any problems.

He did not go directly to the coordinates of the Realm of Ice, so he first returned to the Endless Sea from the human world and then came to the Frost Realm through the teleportation portal of the Endless Sea.

Although Levi had never been to this place before, he had a deep relationship with Levi.

When he was in the human world, he had once obtained a Frost Giant Armor.

It was a relic of the Giant family from about a thousand years ago. Its creator was the Legendary wizard of the current Frost Realm.

Frost Witch Gullwig.

However, in the early battles, this simple mithril armor had been destroyed, but Levi could not bear to throw it away.

The Mellon family must have some connection with the Frost Witch to be able to obtain the armor forged by Gullwig.

In the Realm of Ice, Levi heard a saying:

The Frost Witch was not an ordinary person. She had the strongest frost-type special talent in the history of the Wizard World, Frost Overlord!

Rumor had it that this special talent came from the Frost Witch's Bloodline of God.

This god was the king of Jotunheim, the Kingdom of Giants.

Frost Giant Ancestor, Yugmir!

According to the historical records of the Multidimensional Plane compiled by some wizards, as the powerful ruler of the Jotunheim plane, for some reason, Yugmir had once held a battle axe in his hand and fought against the gods of the astral world. In the end, he died. All the Frost Giants were also punished by the gods and demoted to Frost Remnants. In the end, they became weaker and weaker. Until now, they might have disappeared.

Gullwig was the youngest of the 12 legendaries in the congress and one of the few witches.

In the witches' hearts, she held a very high position, so she could run for the position of Grand Council Chairman with the veteran legendary Blazing Sun God Wizard Edmund.

On the way, Levi learned a little about the local customs and hurried to the Snow Capital.

In a mansion in the Snow Capital.

Emperor Mu and Elsa prepared a table of local mortal delicacies.

He knew that his commander liked to drink good wine from the mortal world and eat the delicacies from the mortal world, so he specially prepared this.

"Emperor Mu, I'm a little nervous. Do you think our commander won't like me?" Elsa, who was wearing a gorgeous blue dress, grabbed Emperor Mu's hand and said softly.

Emperor Mu hugged Elsa's slender waist and gently kissed her forehead. Elsa's long eyelashes trembled.

"He's a good person. Don't worry. If not for the commander, I might still be an apprentice wizard now. At most, I'll become a First-Circle Wizard. Then, I'll turn into dust in a few years."

"That's a relief. Am I pretty today?"

"Of course you're beautiful!"

The two of them chatted intimately.

In the snow outside the door, a figure walked alone on the streets of the Snow Capital, looking rather bleak.

"Commander!"

Seeing that someone familiar was here, Emperor Mu immediately rushed out and gave him a bear hug.

"Looks like I came at the wrong time." Levi smiled.

"No, we're just waiting for you. Elsa, this is our commander, the supreme knight Levi." Emperor Mu pulled Elsa's hand and came to Levi.

"This is Goddess Knight Elsa... She's also my wife now," Emperor Mu introduced to Levi.

"That's nice, a perfect match." Levi nodded. This combination reminded him of Beauty and the Beast from his previous life.

"Come, sit down and talk while we eat." Elsa looked at Levi.

"This is the man who makes Emperor Mu yearn for! As expected, he has the same style as Emperor Mu, but he looks more composed.

"The vitality power in his body is as vast as the sea. Although I'm already at the peak of legendary, it's not worth mentioning in front of him..." Elsa muttered to herself.

After eating and drinking his fill, Levi said seriously, "Elsa, actually, I've already understood a lot about you from Emperor Mu over the years. I also believe in your character. Congratulations on becoming the ninth official member of the Twilight Knights!"

Hearing this, Elsa finally felt relieved.

Levi mainly wanted to see this legendary knight with his own eyes before he could let her join him.

"Thank you, commander!"

After resting for a day on Emperor Mu's side, he simply let Elsa complete the oath-taking ceremony.
