

Wizard 932

Chapter 932: Advancing to the Fourth-Circle! (6)

Under Emperor Mu's lead, Levi went to the place where the Iceberg Giant Ape appeared.

In Snowfield Hills, a huge and fierce-looking ape appeared.

"Commander, that's it. It should have a special bloodline. I think I can only take it down after I enter the Blood Source realm."

Levi looked at the giant ape and smiled. "This giant ape is of the dual attributes of frost and earth. It indeed has a strange bloodline. I'll take it down today and give it to you as a wedding gift for your wedding... If you have the conditions, you still have to tame a transcendent creature to sustain your growth."

"Why aren't you helping?" Elsa frowned and pinched Emperor Mu's arm.

"If I do it, it will be disrespectful to our commander. I might even drag him down and be despised by him..." Emperor Mu shrugged and said. It was obvious that he knew Levi's personality very well.

The Iceberg Giant Ape felt the horror of the figure coming from the sky in front of it, but it was not afraid. The strange bloodline in its body made it face Levi directly. With a roar, it jumped high into the air and punched Levi with the convergence of earth and frost elements!

Levi remained motionless and silent. His right arm turned into flames and formed a huge flaming palm that blotted out the sky.

Boom!

The huge palm slapped down.

The Iceberg Giant Ape fell to the ground, creating a deep pit. It could not get up again!

Emperor Mu was used to it, but Elsa was shocked.

She often heard Emperor Mu talk about how powerful their commander was, but she didn't expect him to be so powerful. He could suppress a transcendent creature that was close to the third-circle with just a raise of his hand.

Levi had deliberately stopped. Otherwise, it would have died without a doubt!

He took out a second-circle Spirit Binding Ring, which belonged to some unlucky dark wizard.

Relying on this Wizard Tool to subdue the giant ice ape, Levi handed it to Emperor Mu.

"Take good care of it. You might have a chance to advance to the third-circle in the future. You can spend a long time with it... If you don't cultivate hard, there's a high chance that it will send you away."

"Thank you, commander. I will definitely work hard to cultivate. I won't be surpassed by a pet!" Emperor Mu was full of fighting spirit.

"Oh right, commander, this is the inheritance of the Ice Body Tempering Technique. I've already mastered it. I'll leave it to you now!" Elsa took out a piece of blue ice.

"I'll take it. You guys can do your own things from now on. I'm going to go into seclusion for a period of time. It can be as short as five years or as long as ten years."

Levi put away the Ice Body Tempering Technique and took a rough look. This body tempering technique was actually of fifth-circle quality!

It was enough for him to cultivate to the fifth-circle body-refining wizard realm. It was even better than the Luminant Gold Body-Refining Technique he had obtained from Barzan.

There were not many body tempering techniques of this level in the Wizard World.

"After I break through to the fourth-circle, I'll try to integrate the body tempering techniques I have. Perhaps my Metal Voodoo Body can become stronger!"

In the Snow Capital.

City Lord's Mansion.

Levi revealed his cultivation as a peak third-circle wizard.

In the Snow Capital, such a level of cultivation was considered above average, so the guard was naturally extremely respectful.

"Are you here to cultivate in the Eye of the Ice Emperor?" he asked.

Levi nodded.

"What level do you want, sir?"

"Is this thing divided into grades?"

"Yes, the Eye of the Ice Emperor. The lower you go, the richer the frost elemental power, and the lower the temperature. Therefore, the cultivation secret room is also divided into three levels:

"The low-grade secret room costs three Aether Stones a day. If it's medium-grade, it costs ten Aether Stones a day. If it's the best, it costs thirty Aether Stones a day."

"Let's rent the best room for five years."

"Alright, I'll check in for you now."

The guard led Levi to a cave in the Castellan's residence, and Levi followed him deeper underground.

Levi had asked around before coming here. Although the City Lord of the Snow King City was greedy and shrewd, he kept his word.

Therefore, cultivating here was generally not a problem.

About a thousand meters underground, a huge ice cave appeared, and his vision suddenly became clear.

An ice-blue cold pool appeared in front of Levi. The cold pool was not big, less than a hundred meters in diameter.

However, on the shore of the cold pool and in the center of the cold pool, there were dozens of cultivation secret rooms.

Moreover, from the arrays outside, more than half of these secret rooms were used by people.

"He really knows how to make money. This City Lord's net worth isn't low..." Levi thought to himself.

"The upper-class secret room is located at the bottom of the cold pool. You can take the number plate and go to your secret room. However, the temperature in the upper-class secret room is extremely low. Even a third-circle protective force field won't be able to withstand it for a long time."

"You'd better come out every once in a while. Otherwise, if you freeze to death inside, the City Lord Manor won't be responsible. You've seen the exemption clauses."

"Also, fighting is strictly prohibited here. At the bottom of the cold lake, our City Lord cultivates there all year round. If anyone causes trouble and angers this Fifth-Circle Wizard, the consequences can be imagined."

"I understand." Levi nodded. This cold pool was indeed cold. With his physique, even standing on the shore, he could feel the cold that he had not felt for a long time.

Levi jumped into the cold pool and kept descending. The temperature became lower and lower.

He found his own secret room.

At this moment, Levi's body was already slightly frozen, but he did not use the Flame Dragon's true form to ward off the cold.

He needed this kind of extreme cold to liquefaction his spiritual force. As long as he did not freeze to death, he would freeze to death!

He looked down. At the center of the spring, where the frost element was the densest, there was a wizard tower standing there.

This should be the cultivation place of the City Lord. With him guarding it, there was no problem with the order here.

Levi entered the secret room and closed the door. There was no cold water inside, but the temperature was still extremely cold.

He activated the array that isolated detection and protection. Other than that, he also set up some arrays himself.

In the end, he released the Poison Fire Corpse Demon.

"Guillermo, protect me. Anyone who enters the secret room without permission will be killed!"

"Yes, Master."

Before he was completely frozen into an ice sculpture, Levi swallowed the purple potion that emitted the fragrance of milk.

The potion melted in his mouth and turned into a purple warm current that flowed through his limbs and bones before finally entering Levi's mind.

The Gas spiritual force magic ring began to tremble. The Divine Ring Tower spun rapidly. That extremely cold power made the restless spiritual force start to calm down and continuously compress and condense.

Levi closed his eyes and his aura began to weaken. The ice on his body became thicker and thicker, wrapping around him layer by layer.

In the end, his entire body was frozen in ice. He was like a statue, not moving at all. Only his heart trembled slightly.

His consciousness was unprecedentedly clear. With his powerful physique, even if he was frozen, his life would not be in danger. He could break out of the ice at any time.

"Let's begin."

On this day.

Levi had only entered the secret room for three months.

In the ice sculpture, Levi suddenly opened his eyes. His expression was strange and unbelievable.

In his mind, on the surface of the Gas-form spiritual power magic ring, wisps of dense spiritual power fog filled the air.

The mist was absorbed by the Divine Ring Tower, and Levi's consciousness entered the Divine Ring Tower.

This place was pitch-black, a boundless dark void.

The white fog that entered it kept rolling, spinning, and collapsing, as if a star was born in a nebula.

A drop of dew began to condense and finally take shape.

The dew hung high in the dark void, emitting a bright light.

If one looked carefully, they would discover that the dew seemed to contain four colors. Earth, Fire, Wind, and Water spun in it, as if the four seasons of the human world had changed.

It was as if a drop of dew was a star and a world.

Three thousand worlds, the number of sands in the Ganges River, the myriad mysteries in the universe, and many truths appeared and disappeared in it.

Before Levi could react, another drop of dew appeared, turning the starry sky into a “star”.

The two “stars” maintained a distance from each other and slowly rotated.

Then, the third drop, the fourth drop...

It was like a torrential flood or a volcanic eruption. The liquid droplets that were still accumulating surged out like a hot knife through butter!

In just a short while, a total of 36 drops of dew appeared!

So many “stars” were all arranged in strange positions in the starry sky inside the Divine Ring Tower.

And the Divine Ring Tower had formed an unbreakable protection for these “stars”.

At this moment, the feeling of exhaustion and powerlessness surfaced in his mind.

After a long silence, Levi couldn't help but mutter to himself.

"Fourth-circle... That's it?"
